China Development Financial Holding Corporation and Subsidiaries

Consolidated Financial Statements for the Years Ended December 31, 2023 and 2022 and Independent Auditors' Report

INDEPENDENT AUDITORS' REPORT

The Board of Directors and Shareholders China Development Financial Holding Corporation

Opinion

We have audited the accompanying consolidated financial statements of China Development Financial Holding Corporation (the "Corporation") and subsidiaries (collectively referred to as the "Group"), which comprise the consolidated balance sheets as of December 31, 2023 and 2022, and the consolidated statements of comprehensive income, changes in equity and cash flows for the years then ended, and the notes to the consolidated financial statements, including material accounting policy information (collectively referred to as the "consolidated financial statements").

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as of December 31, 2023 and 2022, and its consolidated financial performance and its consolidated cash flows for the years then ended in accordance with the Regulations Governing the Preparation of Financial Reports by Financial Holding Companies, Regulations Governing the Preparation of Financial Reports by Public Banks, Regulations Governing the Preparation of Financial Reports by Securities Firms, Regulations Governing the Preparation of Financial Reports by Securities Firms, Regulations Governing the Preparation of Financial Reports by Securities Issuers, Regulations Governing the Preparation of Financial Reports by Insurance Enterprises, the guidelines issued by the authority and International Financial Reports Standards (IFRS), International Accounting Standards (IAS), IFRIC Interpretations (IFRIC), and SIC Interpretations (SIC) endorsed and issued into effect by the Financial Supervisory Commission of the Republic of China.

Basis for Opinion

We conducted our audits in accordance with the Regulations Governing Financial Statement Audit and Attestation Engagements of Certified Public Accountants and the Standards on Auditing of the Republic of China. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Corporation and its subsidiaries in accordance with The Norm of Professional Ethics for Certified Public Accountant of the Republic of China, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

The key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements for the year ended December 31, 2023. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

The key audit matters of the Group's consolidated financial statements for the year ended December 31, 2023 are as follows:

Impairment of Discounts and Loans

The management assesses impairment of discounts and loans according to the Regulations Governing the Procedures for Banking Institutions to Evaluate Assets and Deal with Non-performing/Non-accrual Loans ("the Procedures") issued by the FSC of the ROC and IFRS 9, respectively, and then recognizes the higher estimated amount as a reserve for asset impairment. Under the Procedures, impairment is based on the length of time overdue and the status of the collaterals; under IFRS 9, impairment is assessed by considering the probability of default and loss given default estimated based on historical experience, present market situation and forward-looking information. Since the important assumptions and input values used in revisions and adjustments involve critical judgments and estimates and impairment has a significant impact on the financial statements; therefore, the impairment of discounts and loans is deemed to be a key audit matter for the year ended December 31, 2023.

Refer to Notes 4, 5 and 52 for the accounting policy information, critical judgment, estimation uncertainty and related disclosures of the impairment of discounts and loans.

Our key audit procedures performed in respect of the above matter included the following:

We obtained an understanding of the accounting policies and internal controls related to the recognition of impairment. We verified that the impairment assessment procedures including the classification of the credit assets, the length of time overdue and the status of the collaterals complied with the Procedures. We understood the methodology, main assumptions and parameters adopted by the management in accordance with the IFRS9 impairment model, as well as the important assumptions and input values considered in its revision and adjustment. We selected samples of discounts and loans and evaluated the reasonableness of measuring expected credit losses.

Assessment of Insurance Liabilities and Liability Adequacy Reserve

As stated in Note 5, management uses actuarial models and several material assumptions when assessing the insurance liabilities and liability adequacy reserve. The assumptions were based on the principles embodied in the relevant laws and regulations, which cover the unique risk exposure, product characteristics and experiences of the target markets of KGI Life Insurance Co., Ltd. (KGI Life Insurance, originally called China Life Insurance). The assessment of liability adequacy reserves is in compliance with the relevant norms promulgated by the Actuarial Institute of the Republic of China. When KGI Life Insurance assesses the liability adequacy reserve, the estimated present value of future cash flows from insurance contracts is based on a reasonable estimate of future insurance payments, premium income and related expenses. Since any change in the actuarial model and material assumptions will have a significant influence on insurance liabilities and liability adequacy reserves, we considered them as key audit matters for the year ended December 31, 2023.

Refer to Notes 4, 5 and 51 for the relevant accounting policy, material accounting judgments, estimation uncertainty, and disclosures of assessment of insurance liabilities and liability adequacy reserves.

We understood and assessed KGI Life Insurance's internal controls related to insurance liabilities and liability adequacy reserves. We requested that our internal actuarial specialists assist us in performing our audit procedures regarding insurance liability, including the evaluation of the rationale of relevant assumptions and actuarial models adopted by management. As for the liability adequacy reserve, we assessed the reasonableness of the underlying assumptions and outcomes.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with the Regulations Governing the Preparation of Financial Reports by Financial Holding Companies, Regulations Governing the Preparation of Financial Reports by Public Banks, Regulations Governing the Preparation of Financial Reports by Securities Firms, Regulations Governing the Preparation of Financial Reports by Securities Firms, Regulations Governing the Preparation of Financial Reports by Securities Issuers, Regulations Governing the Preparation of Financial Reports by Securities Issuers, Regulations Governing the Preparation of Financial Reports by Securities Issuers, Regulations Governing the Preparation of Financial Reports by Securities Issuers, Regulations Governing the Preparation of Financial Reports by Insurance Enterprises, the guidelines issued by the authority and International Financial Reporting Standards (IFRS), International Accounting Standards (IAS), IFRIC Interpretations (IFRIC), and SIC Interpretations (SIC) endorsed and issued into effect by the Financial Supervisory Commission of the Republic of China, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance, including the audit committee, are responsible for overseeing the Group's financial reporting process.

Auditors' Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Standards on Auditing of the Republic of China will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with the Standards on Auditing of the Republic of China, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

1. Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- 2. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- 3. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- 4. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- 5. Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- 6. Obtain sufficient and appropriate audit evidence regarding the financial information of entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision, and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements for the year ended December 31, 2023 and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partners on the audits resulting in this independent auditors' report are Yi-Chun Wu and Jr-Shian Ke.

Deloitte & Touche Taipei, Taiwan Republic of China

Notice to Readers

The accompanying consolidated financial statements are intended only to present the consolidated financial position, financial performance and cash flows in accordance with accounting principles and practices generally accepted in the Republic of China and not those of any other jurisdictions. The standards, procedures and practices to audit such consolidated financial statements are those generally applied in the Republic of China.

For the convenience of readers, the independent auditors' report and the accompanying consolidated financial statements have been translated into English from the original Chinese version prepared and used in the Republic of China. If there is any conflict between the English version and the original Chinese version or any difference in the interpretation of the two versions, the Chinese-language independent auditors' report and consolidated financial statements shall prevail.

The accompanying notes are an integral part of the consolidated financial statements. (Concluded)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEARS ENDED DECEMBER 31, 2023 AND 2022 (In Thousands of New Taiwan Dollars, Unless Stated Otherwise)

1. GENERAL INFORMATION

China Development Financial Holding Corporation (the "Corporation") was established by CDIB Capital Group (formerly China Development Industrial Bank) through a share swap on December 28, 2001 made under the Financial Holding Company Act and related regulations. CDIB Capital Group became a wholly owned subsidiary of the Corporation after the share swap.

The Corporation acquired First Taiwan Securities Corporation (First Taiwan) and Grand Cathay Securities Corporation (Grand Cathay) through a share swap on November 8, 2002. The effective date of the merger between Grand Cathay and First Taiwan was December 31, 2003. Grand Cathay was the survivor company after the merger.

In 2012, the Corporation acquired 81.73% of KGI Securities' shares through public tender offer. Afterwards, the Corporation acquired KGI Securities' remaining shares through a share swap and completed on January 18, 2013. Thus, KGI Securities is a 100% subsidiary of the Corporation. The effective date of the merger between KGI Securities and Grand Cathay was June 22, 2013. KGI Securities was the survivor company after the merger.

On September 15, 2014, the Corporation acquired KGI Bank Co., Ltd. (KGI Bank) through a share swap. Thus, KGI Bank became the Corporation's wholly owned subsidiary.

On March 13, 2017, the Corporation hold 100% equity interests of China Development Asset Management Corporation, which was previously held by CDIB Capital Group.

In 2017, the Corporation acquired 25.33% ordinary shares of KGI Life Insurance through public tender offer. After the acquisition, KGI Life Insurance became a subsidiary of the Corporation as defined by the Financial Holding Company Act. After the participation of capital increase by cash of KGI Life Insurance and acquisition of ordinary shares through public tender offer, on December 30, 2021, the Corporation acquired KGI Life Insurance through a share swap. Thus, KGI Life Insurance became the Corporation's wholly owned subsidiary.

On July 1, 2023, the Corporation acquired 100% equity interests in KGI Securities Investment Trust Co., Ltd, which were previously held by KGI Securities.

The Corporation mainly engages in financial holding, invests in and manages the businesses of finance-related institutions domestic and foreign approved by authorities and investees.

The Corporation's shares have been listed on the Taiwan Stock Exchange (TSE).

CDIB Capital Group was incorporated under the Company Act and relevant regulations and started operations on May 14, 1959. Effective January 1999, CDIB Capital Group was converted from a trust corporation into an industrial bank under government approval. On May 1, 2015, CDIB Capital Group transfer banking business to KGI Bank. On March 15, 2017, China Development Industrial Bank was converted, and the name became CDIB Capital Group, and main operations included securities investment, investment financial related business and venture capital, etc.

KGI Securities was established on September 14, 1988, and operates as a securities underwriter, dealer, broker, future trading, future dealer, trust, wealth management, offshore securities and other related business as approved by authorities.

KGI Bank was established on January 14, 1992, and mainly engages in banking operations are regulated under the banking Act.

China Development Asset Management Corporation was established on November 5, 2003, and mainly engages in acquiring and disposal of debts from financial institution, investment in foreclosed real estate, etc.

KGI Life Insurance was incorporated in Taiwan on April 25, 1963, and is mainly engaged in the business of life insurance, offshore life insurance paid and received for foreign currency and other insurance-related businesses approved by competent authorities.

KGI Securities Investment Trust Co., Ltd. was established on April 19, 2001, and is mainly engaged in Nominee services, discretionary investment services, and other related business approved by authorities.

2. APPROVAL OF FINANCIAL STATEMENTS

The consolidated financial statements were reported to the board of directors and authorized for issue on March 11, 2024.

3. APPLICATION OF NEW, AMENDED AND REVISED STANDARDS AND INTERPRETATIONS

a. Initial application of the International Financial Reporting Standards (IFRS), International Accounting Standards (IAS), IFRIC Interpretations (IFRIC), and SIC Interpretations (SIC) endorsed by the FSC

The related amendments to the International Financial Reporting Standards (IFRSs) did not have any material impact on the Group's accounting policies.

b. The IFRS Accounting Standards endorsed by the FSC for application starting from 2024

| New, Amended and Revised Standards and Interpretations | Effective Date Announced by IASB |
|--|-------------------------------------|
| Amendments to IFRS 16 "Leases Liability in a Sale and Leaseback" | January 1, 2024 (Note 1) |
| Amendments to IAS 1 "Classification of Liabilities as Current or | January 1, 2024 |
| Non-current" | |
| Amendments to IAS 1 "Non-current Liabilities with Covenants" | January 1, 2024 |
| Amendments to IAS 7 and IFRS 7 "Supplier Finance Arrangements" | January 1, 2024 (Note 2) |

Note 1: A seller-lessee shall apply the Amendments to IFRS 16 retrospectively to sale and leaseback transactions entered into after the date of initial application of IFRS 16.

Note 2: The amendments provide some transition relief regarding disclosure requirements.

As of the date of issuance of these consolidated financial statements, the Company and its subsidiaries have assessed that the amendments to the above standards and interpretations will not have a significant impact on their financial position and financial performance.

c. The IFRS Accounting Standards in issue but not yet endorsed and issued into effect by the FSC

| New, Amended and Revised Standards and Interpretations | Effective Date Announced by IASB (Note 1) |
|---|--|
| Amendments to IFRS 10 and IAS 28 "Sale or Contribution of Assets between an Investor and its Associate or Joint Venture" | To be determined by IASB |
| IFRS 17 "Insurance Contracts" | January 1, 2023 |
| Amendments to IFRS 17 | January 1, 2023 |
| Amendments to IFRS 17 "Initial Application of IFRS 9 and IFRS 17 - Comparative Information" | January 1, 2023 |
| Amendments to IAS 21 "Lack of Exchangeability" | January 1, 2025 (Note 2) |

- Note 1: Unless stated otherwise, the above IFRS Accounting Standards are effective for annual reporting periods beginning on or after their respective effective dates.
- Note 2: An entity shall apply those amendments for annual reporting periods beginning on or after January 1, 2025. Upon initial application of the amendments, the entity recognizes any effect as an adjustment to the opening balance of retained earnings. When the entity uses a presentation currency other than its functional currency, it shall, at the date of initial application, recognize any effect as an adjustment to the cumulative amount of translation differences in equity.
- 1) Amendments to IFRS 10 and IAS 28 "Sale or Contribution of Assets between an Investor and its Associate or Joint Venture"

The amendments stipulated that, when the Group sells or contributes assets that constitute a business (as defined in IFRS 3) to an associate, the gain or loss resulting from the transaction is recognized in full. Also, when the Group loses control of a subsidiary that contains a business but retains significant influence or joint control, the gain or loss resulting from the transaction is recognized in full.

Conversely, when the Group sells or contributes assets that do not constitute a business to an associate, the gain or loss resulting from the transaction is recognized only to the extent of the Group's interest as an unrelated investor in the associate, i.e. the Group's share of the gain or loss is eliminated. Also, when the Group loses control of a subsidiary that does not contain a business but retains significant influence control in an associate, the gain or loss resulting from the transaction is recognized only to the extent of the Group's interest as an unrelated investor in the associate, the gain or loss resulting from the transaction is recognized only to the extent of the Group's interest as an unrelated investor in the associate, i.e. the Group's share of the gain or loss is eliminated.

2) IFRS 17 "Insurance Contract" and its amendments

IFRS 17 establishes the principle for the accounting treatment of insurance contracts and supersedes IFRS 4 "Insurance Contract". The principle is as follows:

Level of aggregation

An entity shall identify portfolios of insurance contracts. A portfolio comprises contracts that are subject to similar risks and managed together. Contracts within a particular product line, such as motor policies, are expected to have similar risks, and if they are managed together would be in the same portfolio. For all issued insurance contracts in a portfolio, any entity shall divide it into:

- a) A group of contracts that are onerous at initial recognition, if any;
- b) A group of contracts that at initial recognition have no significant risk of becoming onerous, if any, and

c) A group of the remaining contracts in the portfolio, if any.

An entity is not permitted to include contracts issued more than one year apart in the same group, and shall apply IFRS 17 recognition and measurement principles to the contract groups decided to be issued.

Recognition

An entity shall recognize a group of insurance contracts it issues from the earliest of:

- a) The beginning of the coverage period of a group of insurance contracts;
- b) The date when the first payment from a policyholder of the group becomes due; and
- c) When the Group becomes onerous.

Measurement

On initial recognition, an entity shall measure a group of contracts at the total of the amount of fulfilment cash flows ("FCF") and the contractual service margin ("CSM"). FCF comprises the estimate of future cash flow, an adjustment to reflect the time value of money and the financial risks associated with the future cash flows and risk adjustment for non-financial risk. The CSM represents the unearned profit the entity will recognize as it provides services in the future. This is measured on initial recognition of a group of insurance contracts at an amount that, unless the Group of contracts is onerous, results in no income or expenses arising from:

- a) The initial recognition of an amount for the FCF;
- b) The cash inflows and outflows arising from the contracts in the Group at that date; and
- c) The derecognition at that date of below items for acquisition cash flows:
 - i. Any asset recognized for acquisition cash flows; and
 - ii. Any other asset or liability related to a group of contracts which had been recognized for cash flows before.

Subsequent measurement

At the end of each subsequent reporting period, the carrying amount of a group of insurance contracts is remeasured to be the sum of the liability for remaining coverage and the liability for incurred claims, both determined as at that date. The liability for remaining coverage comprises the fulfilment cash flows related to the allocated future service and the contractual service margin; the liability for incurred claims comprises the fulfilment cash flows related to the allocated past service. If a group of insurance contracts becomes onerous (or more onerous) on subsequent measurement, the Group recognizes loss immediately.

Onerous contracts

An insurance contract is onerous at initial recognition if the total of the FCF, any preciously recognized acquisition cash flows and any cash flows arising from the contract at that date is a net outflow. An entity shall recognize a loss in profit or loss for the net outflow, resulting in the carrying amount of the liability for the Group being equal to the FCF and the CSM of the Group being zero. The CSM cannot increase and no revenue can be recognized, until the onerous amount previously recognized has been reversed in profit or loss as part of a service expense.

Premium allocation approach

An entity may simplify the measurement of the liability for remaining coverage of a group of insurance contracts using the premium allocation approach (PAA) on the condition that:

- a) The entity reasonably expects that this will be an approximation of General Model; or
- b) The coverage period of each contract in the group is one year or less.

If at the inception of the Group, an entity expects significant variance in the FCF during the period before a claim is incurred, such contracts are not eligible to condition (a).

Using the PAA, the liability for remaining coverage shall be:

- a) Initially recognized at the premiums
- b) Received at initial recognition, minus any insurance acquisition cash flows if any; and
- c) The derecognition at that date of below items for acquisition cash flows:
 - i. Any asset recognized for acquisition cash flows; and
 - ii. Any other asset or liability related to a group of contracts which had been recognized for cash flows before.

Subsequently, the liability for remaining coverage should be adjusted as plus the premiums received and the amortization of insurance acquisition cash flows and minus the amount recognized as insurance revenue for services provided and any investment component paid or transferred to the liability for incurred claims in the period.

Investment contracts with a discretionary participation feature

An investment contract with a discretionary participation feature (DPF) is a financial instrument and it does not include a transfer of significant insurance risk. It is in the scope of IFRS 17 only if the issuer also issues insurance contracts.

Modification and derecognition

If the terms of an insurance contract are modified, an entity shall derecognize the original contract and recognize the modified contract as a new contract if there is a substantive modification, based on meeting any of the specified criteria.

An entity shall de-recognize an insurance contract when it is extinguished or substantially modified.

Transition

An entity shall apply IFRS 17 retrospectively unless impracticable, in which case entities have the option of using either the modified retrospective approach or the fair value approach.

Under the modified retrospective approach, an entity shall utilize reasonable and supportable information and maximize the use of information that would have been used to apply a full retrospective approach, but need only use information available without undue cost or effort. Fair value approach shall be used if the information is not reasonable and supportable information.

Under the fair value approach, an entity determines the CSM at the transition date as the difference between the fair value of a group of insurance contracts at that date and the FCF measured at that date.

Redesignation of financial assets

At the date of initial application of IFRS 17, an entity to which IFRS 9 has applied may redesignate and reclassify financial assets that meet the requirements of paragraph C29 of IFRS 17. The entity is not required to restate comparative information to reflect changes in the reclassification of these assets, so the difference between the previous carrying amount of these financial assets and their carrying amount at the date of initial application is recognised in the initial retained earnings (or other equity as appropriate) at the date of initial application. If an entity restates the comparative information, the restatement must reflect the requirements of IFRS 9 for these affected financial assets.

In addition, for enterprises that have applied IFRS 9 before the initial application of IFRS 17, for financial assets that have been delisted in the comparative period on the date of initial application of IFRS 17, the enterprise could choose to apply the classification overlay method on the basis of individual financial assets. requirements as if those financial assets had been reclassified in the comparative period in accordance with the redesignation requirements in paragraph C29 of IFRS 17.

Except for the above impact, as of the date the consolidated financial statements were authorized for issue, the Group is continuously assessing the possible impact that the application of the standards and interpretations will have on the Group's financial position and financial performance, and will disclose the relevant impact when the assessment is completed.

4. SUMMARY OF MATERIAL ACCOUNTING POLICY INFORMATION

Statement of Compliance

The accompanying consolidated financial statements have been prepared in conformity with Regulations Governing the Preparation of Financial Reports by Financial Holding Companies, Regulations Governing the Preparation of Financial Reports by Public Banks, Regulations Governing the Preparation of Financial Reports by Securities Firms, Regulations Governing the Preparation of Financial Reports by Securities Issuers, Regulations Governing the Preparation of Financial Reports by Securities Issuers, Regulations Governing the Preparation of Financial Reports by Securities Issuers, Regulations Governing the Preparation of Financial Reports by Securities Issuers, Regulations Governing the Preparation of Financial Reports by Insurance Enterprises and IFRS Accounting Standards as endorsed and issued into effect by the FSC.

Basis of Preparation

The consolidated financial statements have been prepared on the historical cost basis except for financial instruments that are measured at fair value and net defined benefit liabilities which are measured at the present value of the defined benefit obligation less the fair value of plan assets. Historical cost is generally based on the fair value of the consideration given in exchange for assets.

All the consolidated accounts in the financial statements were categorized according to the nature of each account and sequenced by their liquidity rather than classified as current or noncurrent assets/liabilities.

Principles for Preparing Consolidated Financial Statements

The consolidated financial statements include the financial statements of the Group. All significant intra-group transactions, balances, income and expenses have been eliminated in full upon consolidation.

The accounting policies of the subsidiary are applied consistently with the Corporation.

The functional currency of the Corporation is the New Taiwan dollar, and the consolidated financial statements are presented in New Taiwan dollars.

As of December 31, 2023 and 2022, the consolidated entities included in the consolidated financial statements included 62 and 59 companies, respectively (please refer to the attached Table 8).

Business Combinations

Acquisitions of businesses are accounted for using the acquisition method. Acquisition-related costs are generally recognized in profit or loss as they are incurred.

Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree, and the fair value of the acquirer's previously held equity interests in the acquiree over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed. If, after re-assessment, the net of the acquisition date amounts of the identifiable assets acquired and liabilities assumed exceeds the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree, and the fair value of the acquirer's previously held interests in the acquiree, the excess is recognized immediately in profit or loss as a bargain purchase gain.

Non-controlling interests may be initially measured either at fair value or at the non-controlling interests' proportionate share of the recognized amounts of the acquiree's identifiable net assets. The choice of the measurement basis is made on a transaction-by-transaction basis.

According to the Official Letter No. 10302153881 issued by the FSC on February 10, 2015, the insurance enterprises recognizes the increase in retained earnings arising from bargain purchase gain due to mergers and acquisitions, and should provide the same amount of special surplus reserve. The special surplus reserve can cover the losses after one full years since the recognition date. When the value of the assets under evaluation of the merger is similar to that at the time of merger and acquisition, and there is no unanticipated significant impairment, then it would be transferred to paid-in capital.

Foreign Currencies

The Group recognizes at the rates of exchange prevailing at the dates of the transactions.

At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Exchange differences on monetary items arising from settlement or translation are recognized in profit or loss in the period occurred.

Non-monetary items measured at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined. Exchange differences arising on the retranslation of non-monetary items are included in profit or loss for the year except for exchange differences arising from the retranslation of non-monetary items in respect of which gains and losses are recognized directly in other comprehensive income, in which case, the exchange differences are also recognized directly in other comprehensive income.

Nonmonetary items that are measured at historical cost in a foreign currency are not retranslated.

For the purposes of presenting consolidated financial statements, the assets and liabilities of the Group's foreign operations are translated into New Taiwan dollars using exchange rates prevailing at the end of each reporting period. Income and expense items are translated at the average exchange rates for the year. Exchange differences arising are recognized in other comprehensive income (attributed to the shareholders of the parent company and non-controlling interests as appropriate).

On the disposal of a foreign operation (i.e. a disposal of the Group's entire interest in a foreign operation, or a disposal involving loss of control over a subsidiary that includes a foreign operation, or a partial disposal of an interest in a joint arrangement or an associate that includes a foreign operation of which the retained interest becomes a financial asset), all of the exchange differences accumulated in equity in respect of that operation are reclassified to profit or loss.

In relation to a partial disposal of a subsidiary that does not result in the Group losing control over the subsidiary, the proportionate share of accumulated exchange differences is re-attributed to non-controlling interests of the subsidiary and is not recognized in profit or loss. For all other partial disposals, the proportionate share of the accumulated exchange differences recognized in other comprehensive income is reclassified to profit or loss.

Cash Equivalents

Cash equivalents include time deposits that can be terminated on demand without reducing principal, which are highly liquid, readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value.

Investments in Associates and Joint Ventures

An associate is an entity over which the Group has significant influence and which is neither a subsidiary nor an interest in a joint venture. A joint venture is a joint arrangement whereby the Group and other parties that have joint control of the arrangement have rights to the net assets of the arrangement. The Group uses the equity method to account for its investments in associates and joint ventures.

The Group uses the equity method to account for their investments in associates and joint ventures. Subsidiaries in the Group with venture capital can choose to measure investments in associates and joint ventures by equity method or by fair value through profit or loss.

Under the equity method, investments in an associate and a joint venture are initially recognized at cost and adjusted thereafter to recognize the Group's share of the profit or loss and other comprehensive income of the associate and joint venture. The Group also recognizes the changes in the Group's share of equity of associates and joint ventures.

Any excess of the cost of acquisition over the Group's share of the net fair value of the identifiable assets and liabilities of an associate and a joint venture recognized at the date of acquisition is recognized as goodwill, which is included within the carrying amount of the investment and is not amortized. Any excess of the Group's share of the net fair value of the identifiable assets and liabilities over the cost of acquisition, after reassessment, is recognized immediately in profit or loss.

When the Group subscribes for additional new shares of the associate and joint venture at a percentage different from its existing ownership percentage, the resulting carrying amount of the investment differs from the amount of the Group's proportionate interest in the associate and joint venture. The Group records such a difference as an adjustment to investments with the corresponding amount charged or credited to capital surplus - changes in the Group's share of equity of associates and joint ventures and joint ventures. If the Group's ownership interest is reduced due to the additional subscription of the new shares of associate and joint venture, the proportionate amount of the gains or losses previously recognized in other comprehensive income in relation to that associate and joint venture is reclassified to profit or loss on the same basis as would be required if the investee had directly disposed of the related assets or liabilities. When the adjustment should be debited to capital surplus, but the capital surplus recognized from investments accounted for by the equity method is insufficient, the shortage is debited to retained earnings.

When the Group's share of losses of an associate and a joint venture equals or exceeds its interest in that associate and joint venture (which includes any carrying amount of the investment accounted for by the equity method and long-term interests that, in substance, form part of the Group's net investment in the associate and joint venture), the Group discontinues recognizing its share of further losses. Additional losses and liabilities are recognized only to the extent that the Group has incurred legal obligations, or constructive obligations, or made payments on behalf of that associate and joint venture.

The entire carrying amount of an investment (including goodwill) is tested for impairment as a single asset by comparing its recoverable amount with its carrying amount. Any impairment loss recognized is not allocated to any asset, including goodwill, that forms part of the carrying amount of the investment. Any reversal of that impairment loss is recognized to the extent that the recoverable amount of the investment subsequently increases.

The Group discontinues the use of the equity method from the date on which it ceases to have significant influence over the associate and joint venture. Any retained investment is measured at fair value at that date and the fair value is regarded as its fair value on initial recognition as a financial asset. The difference between the previous carrying amount of the associate and joint venture attributable to the retained interest and its fair value is included in the determination of the gain or loss on disposal of the associate and joint venture. The Group accounts for all amounts previously recognized in other comprehensive income in relation to that associate and joint venture on the same basis as would be required if that associate had directly disposed of the related assets or liabilities.

When the Group transacts with its associate, profits and losses resulting from the transactions with the associate and joint venture are recognized in the Group's consolidated financial statements only to the extent of interests in the associate and joint venture that are not related to the Group.

Investment in associates and joint ventures measured by fair value through profit or loss are recognized as financial assets at fair value through profit or loss and the change in fair value is recognized in profit or loss.

Financial Instruments

Financial assets and financial liabilities are recognized when the Group becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognized immediately in profit or loss.

Financial assets and liabilities

All regular way purchases or sales of financial assets and liabilities are recognized and derecognized on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

a. Measurement category

Financial assets are classified into the following categories: Financial assets at FVTPL, financial assets at amortized cost, investments in debt instruments at FVTOCI and investments in equity instruments at FVTOCI.

1) Financial assets or liabilities at FVTPL

Financial assets or liabilities are classified as at FVTPL when such financial assets or liabilities are mandatorily classified or designated as at FVTPL. Financial assets or liabilities mandatorily classified as at FVTPL include investments in equity instruments which are not designated as at FVTOCI and debt instruments that do not meet the amortized cost criteria or the FVTOCI criteria.

A financial asset or liability may be designated as at FVTPL upon initial recognition if such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise.

Financial assets at FVTPL are subsequently measured at fair value, with any gains or losses arising on remeasurement recognized in profit or loss. The net gain or loss recognized in profit or loss incorporates any dividends or interest earned on such a financial asset. Fair value is determined in the manner described in Note 50.

2) Financial assets at amortized cost

Financial assets that meet the following conditions are subsequently measured at amortized cost:

- a) The financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows; and
- b) The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Subsequent to initial recognition, financial assets at amortized cost are measured at amortized cost, which equals the gross carrying amount determined using the effective interest method less any impairment loss. Exchange differences are recognized in profit or loss.

Interest income is calculated by applying the effective interest rate to the gross carrying amount of such a financial asset, except for:

- a) Purchased or originated credit-impaired financial assets, for which interest income is calculated by applying the credit-adjusted effective interest rate to the amortized cost of such financial assets; and
- b) Financial assets that are not credit-impaired on purchase or origination but have subsequently become credit-impaired, for which interest income is calculated by applying the effective interest rate to the amortized cost of such financial assets in subsequent reporting periods.
- 3) Investments in debt instruments at FVTOCI

Debt instruments that meet the following conditions are subsequently measured at FVTOCI:

- a) The debt instrument is held within a business model whose objective is achieved by both the collecting of contractual cash flows and the selling of such financial assets; and
- b) The contractual terms of the debt instrument give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Investments in debt instruments at FVTOCI are subsequently measured at fair value. Changes in the carrying amounts of these debt instruments relating to changes in foreign currency exchange rates, interest income calculated using the effective interest method and impairment losses or reversals are recognized in profit or loss. Other changes in the carrying amount of these debt instruments are recognized in other comprehensive income and will be reclassified to profit or loss when the investment is disposed of.

4) Investments in equity instruments at FVTOCI

On initial recognition, the Group may make an irrevocable election to designate investments in equity instruments as at FVTOCI. Designation as at FVTOCI is not permitted if the equity investment is held for trading or if it is contingent consideration recognized by an acquirer in a business combination.

Investments in equity instruments at FVTOCI are subsequently measured at fair value with gains and losses arising from changes in fair value recognized in other comprehensive income and accumulated in other equity. The cumulative gain or loss will not be reclassified to profit or loss on disposal of the equity investments; instead, it will be transferred to retained earnings.

Dividends on these investments in equity instruments are recognized in profit or loss when the Group's right to receive the dividends is established, unless the dividends clearly represent a recovery of part of the cost of the investment.

b. Margin loans and stock loans

"Receivable amount for margin loans" is the margin loans extended to the customers to buy securities. The securities bought by the customers are held as pledges on the loan provided, and these securities are recorded as "securities deposited by customers" using memo entries.

The securities refinance customer loans from securities finance companies, and the related amount is recorded as "refinancing borrowings" and is pledged with the underlying securities bought by the customers.

The subsidiaries of the Corporation provide financing to customers for the short sale of pledged securities from margin loans or short sale of securities borrowed from securities finance companies. The proceeds from short sale of securities borrowed by customers, net of commissions and securities transaction tax, are retained by the subsidiaries and recorded as "deposit payable for securities financing." In addition, the Securities and Futures Bureau (SFB), Financial Supervisory Commission, Executive Yuan, ROC requires that customers should make a guarantee deposit to the subsidiaries or provide securities in lieu of cash deposit, which are recorded as "securities financing guarantee deposit."

c. Guarantee deposits received on futures contracts and customers' equity accounts - futures

Margin deposits received from clients are debited to "guarantee deposits received on futures contracts" and credited to "customers' equity accounts - futures" for futures transactions as required by the regulations. Margin deposit balances are calculated daily by marking to market the open positions of each customer and determining the required margin levels. The debit balance of "customers' equity accounts - futures" which results from losses on futures transactions in excess of the margin deposit, is recorded as "accounts receivable - futures guarantee deposits." Customer's equity accounts - futures these accounts pertain to the same customers.

d. Impairment of financial assets

The Group recognizes a loss allowance for expected credit losses on financial assets at amortized cost and investments in debt instruments that are measured at FVTOCI.

For financial instruments, the Group recognizes lifetime ECLs when there has been a significant increase in credit risk since initial recognition. If, on the other hand, the credit risk on a financial instrument has not increased significantly since initial recognition, the Group measures the loss allowance for that financial instrument at an amount equal to 12-month ECLs.

Expected credit losses reflect the weighted average of credit losses with the respective risks of default occurring as the weights. Lifetime ECLs represent the expected credit losses that will result from all possible default events over the expected life of a financial instrument. In contrast, 12-month ECLs represent the portion of lifetime ECLs that is expected to result from default events on a financial instrument that are possible within 12 months after the reporting date.

The Group recognizes an impairment gain or loss in profit or loss for all financial instruments with a corresponding adjustment to their carrying amount through a loss allowance account, except for investments in debt instruments that are measured at FVTOCI, for which the loss allowance is recognized in other comprehensive income and does not reduce the carrying amount of such a financial asset.

Based on the Regulations Governing the Procedures for Banking Institutions to Evaluate Assets and Deal with Non-performing/Non-accrual loans, credit assets classified as normal (this balance should be net of the balance of borrowings by ROC government agencies from the Bank), special mention, substandard, with doubtful collectability and uncollectable or loss incurring are evaluated on the basis of the borrowers'/clients' financial condition and delinquency record on interest payments.

These assets have allowances at 1%, 2%, 10%, 50% and 100%, respectively, of outstanding credit. The doubtful accounts of credit cards receivables are evaluated on the basis of Regulations Governing Institutions Engaging in Credit Card Business. The minimum allowance for credit assets on or off balance sheet is equal to the book value of the above listed.

Based on Order No. 10300329440 issued by the FSC, for the Bank to have an enhanced risk coverage, the minimum provision for the loan loss reserve is 1.5% of the mortgage and construction loans that have been classified as normal assets, excluding policy-based loan, effective from January 1, 2011. Based on Order No. 10410001840 issued by the FSC, for the Bank to have an enhanced control on the exposure to the risk in mainland China, the minimum provision for credit loss reserve is 1.5% of the credit, which includes short-term trade financing that were granted to companies based in mainland China and classified as normal assets.

Credit deemed uncollectable of KGI Bank may be written off under the approval of the board of directors.

In accordance with the regulation of "Guidelines for Handling Assessment of Assets, Loans Overdue, Receivable on Demand and Bad Debts by Insurance Enterprises", KGI Life Insurance is required to record the minimum amounts based upon each of the following category for allowance of uncollectible accounts:

- 1) Total amount of 0.5% of the ending balance for the first category of loan assets excluding life insurance loans, automatic premium loans and holding government debts, 2% of the ending balance for the second category of loan assets that should be paid attention, 10% of the ending balance for the third category of loan assets that are expected to recover, 50% of the ending balance for the fourth category of loan assets that are difficult to recover and 100% of the ending balance for the fifth category of loan assets that are not expected to recover are aggregated.
- 2) 1% of the ending balance for all the five categories of loan assets excluding life insurance loans, automatic premium loans and holding government debts.
- 3) Total unsecured portion of loans overdue and receivable on demand.

4) If total amount of minimum allowance of uncollectible accounts measured from the categories above are less than the amount in accordance with GAAP, it should refer to the amount in accordance with GAAP as minimum allowance of uncollectible accounts.

To strengthen the ability to bear the loss of specific loan assets, the authority may, if necessary, require the Corporation to raise loan loss provision for specific loan assets in specified criteria and deadlines.

e. Derecognition of financial assets

On derecognition of a financial asset at amortized cost in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognized in profit or loss. On derecognition of an investment in a debt instrument at FVTOCI, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss which had been recognized in other comprehensive income is recognized in profit or loss. However, on derecognition of an investment in an equity instrument at FVTOCI, the difference between the asset's carrying amount and the sum of the sum of the consideration received and receivable is recognized in profit or loss. However, on derecognition of an investment in an equity instrument at FVTOCI, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognized in profit or loss, and the cumulative gain or loss which had been recognized in other comprehensive income is transferred directly to retained earnings, without recycling through profit or loss.

f. Equity instruments

Debt and equity instruments issued by the Group are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments issued by the Group are recognized at the proceeds received, net of direct issue costs.

The repurchase of the Corporation's own equity instruments is recognized in and deducted directly from equity, and its carrying amounts are calculated based on weighted average by share types. No gain or loss is recognized in profit or loss on the purchase, sale, issuance or cancellation of the Corporation's own equity instruments.

g. Derivative financial instruments

Derivatives are initially recognized at fair value at the date the derivative contracts are entered into and are subsequently remeasured to their fair value at the end of each reporting period. The resulting gain or loss is recognized in profit or loss immediately unless the derivative is designated and effective as a hedging instrument, in which event the timing of the recognition in profit or loss depends on the nature of the hedge relationship. When the fair value of a derivative financial instrument is positive, the derivative is recognized as a financial asset; when the fair value of a derivative financial instrument is negative, the derivative is recognized as a financial liability.

Derivatives embedded in hybrid contracts that contain financial asset hosts that is within the scope of IFRS 9 are not separated; instead, the classification is determined in accordance with the entire hybrid contract. Derivatives embedded in non-derivative host contracts that are not financial assets that is within the scope of IFRS 9 (e.g., financial liabilities) are treated as separate derivatives when they meet the definition of a derivative; their risks and characteristics are not closely related to those of the host contracts; and the host contracts are not measured at FVTPL.

h. Modification of financial instruments

When a financial instrument is modified, the Group assesses whether the modification will result in derecognition. If modification of a financial instrument results in derecognition, it is accounted for as derecognition of financial assets or liabilities. If the modification does not result in derecognition, the Group recalculates the gross carrying amount of the financial asset or the amortized cost of the financial liability based on the modified cash flows discounted at the original effective interest rate with any modification gain or loss recognized in profit or loss. The cost incurred is adjusted to the carrying amount of the modified financial asset or the modified remaining period.

For the changes in the basis for determining contractual cash flows of financial assets or financial liabilities resulting from the interest rate benchmark reform, the Group elects to apply the practical expedient in which the changes are accounted for by updating the effective interest rate at the time the basis is changed, provided the changes are necessary as a direct consequence of the reform and the new basis is economically equivalent to the previous basis. When multiple changes are made to a financial asset or a financial liability, the Group first applies the practical expedient to those changes required by interest rate benchmark reform, and then applies the requirements of modification of financial instruments to the other changes that cannot apply the practical expedient.

i. Adoption of overlay approach on financial assets

KGI Life Insurance chose to express profit or loss of the designated financial assets in overlay approach in accordance with IFRS 4 "Insurance Contract" since the application of IFRS 9. To those designated financial assets, the Corporation classifies the amount from profit or loss to other comprehensive income, thus making the profit or loss of the designated financial assets as at the reporting date equal to as if they would have been accounted for under IAS 39. Accordingly, the reclassification amount is the difference of the following items:

- 1) The amount of profit or loss of the designated financial assets in accordance with IFRS 9; and
- 2) The amount of profit or loss of the designated financial assets as if applied to IAS 39.

A financial asset is eligible for designation under overlay approach if qualifying for the following conditions:

- 1) In accordance with IFRS 9, the financial asset is measured at fair value through profit or loss. However, if the Corporation applies to IAS 39, the financial asset is not measured at fair value through profit or loss collectively; and
- 2) The financial asset is not held in respect of activities that is unconnected with contracts within the scope of IFRS 4 "Insurance Contract".

A Financial asset is eligible for the overlay approach if either of the following conditions is met:

- 1) The asset is accounted for on initial recognition; or
- 2) The asset now meets the criteria of which is held in respect of activities other than contracts within the scope of IFRS 4 "Insurance Contract" but previously did not.

KGI Life Insurance shall continuously adopt overlay approach to those designated financial assets until derecognition. However, KGI Life Insurance shall remove the designated status when the financial assets held in respect of activities other than contracts within the scope of IFRS 4 "Insurance Contract". In addition, at the beginning date of any annual reporting year, the Corporation is permitted to stop applying overlay approach to all designated financial assets; If it does, the change in the accounting policy is accounted for under IAS 8 "Accounting Policies, Changes in Accounting Estimates and Errors".

j. Reclassification of financial assets

The Group reclassifies all affected financial assets only when it changes the operating model for managing financial assets. Such changes are determined by the Group's senior management based on the results of external or internal changes and must be material to the operations of the Group and presentable to external parties. The reclassification of financial assets is deferred from the date of reclassification.

Hedge Accounting

The Group designate certain hedging instruments as fair value hedges.

At the start of a hedge relationship, the Group document the relationship between the hedging instrument and the hedged item, along with their risk management objectives and their strategy for undertaking various hedge transactions. Further, at the start of the hedge and on an ongoing basis, the Group document whether the hedging instrument is highly effective in offsetting the exposure to adverse changes in fair value or cash flows of the hedged item. Note 12 sets out the details of the fair value of the derivative instruments used for hedging purposes.

Fair value hedges

The change in the fair value of the hedging instrument (e.g., derivative) and the change in the hedged item attributable to the hedged risk are recognized in profit or loss in the line item relating to the hedged item.

The Group discontinue hedge accounting only when the hedging relationship ceases to meet the qualifying criteria; for instance, when the hedging instrument expires or is sold, terminated or exercised.

Securities Purchased and Sold Under Resell and Repurchase Agreements

For securities purchased under resell agreements, the payment to a counterparty is treated as a financing transaction. For securities sold under repurchase agreements, the payment by a counterparty and the related interest revenue or interest expense are recognized on the accrual basis.

Property and Equipment

Property and equipment are stated at cost, less accumulated depreciation and accumulated impairment loss when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably.

Depreciation of property and equipment is recognized using the straight-line method. Each significant part is depreciated separately. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

On derecognition of an item of property, plant and equipment, the difference between the sales proceeds and the carrying amount of the asset is recognized in profit or loss.

Investment Properties

Investment properties are properties held to earn rentals and/or for capital appreciation. Investment properties also include land held for a currently undetermined future use.

Investment properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are measured at cost less accumulated depreciation and accumulated impairment loss. Depreciation is recognized using the straight-line method.

On derecognition of an investment property, the difference between the net disposal proceeds and the carrying amount of the asset is included in profit or loss.

Collaterals Assumed

Collaterals assumed (recognized as other assets) are recorded at cost, which includes the price and the expenditure for placing the collateral in a position to be sold, and are evaluated at their fair value as of the end of the period. An impairment loss is recognized when the cost of collaterals exceeds the fair value.

Intangible Assets

a. Intangible assets acquired separately

Intangible assets with finite useful lives that are acquired separately are initially measured at cost and subsequently measured at cost less accumulated amortization and accumulated impairment loss. Amortization is recognized on a straight-line basis over their estimated useful lives. The estimated useful life, residual value, and amortization method are reviewed at the end of each reporting period. The residual value of an intangible asset with a finite useful life shall be assumed to be zero unless the Group expects to dispose of the intangible asset before the end of its economic life. Intangible assets with indefinite useful lives that are acquired separately are measured at cost less accumulated impairment loss.

b. Intangible assets acquired in a business combination

Intangible assets acquired in a business combination and recognized separately from goodwill are initially recognized at their fair value at the acquisition date (which is regarded as their cost). Subsequent to initial recognition, they are measured on the same basis as intangible assets that are acquired separately.

c. Derecognition of intangible assets

On derecognition of an intangible asset, the difference between the net disposal proceeds and the carrying amount of the asset are recognized in profit or loss.

Impairment of Non-financial Assets

The Group evaluates the possibility of impairment loss on non-financial assets as of the balance sheet date. If there is sufficient objective evidence of asset impairment, the Group recognizes an impairment loss whenever the recoverable amount of the asset or the cash-generating unit is below the carrying amount of an asset, and this impairment loss either is charged to accumulated impairment or reduces the carrying amount of an asset directly. After the recognition of an impairment loss, the depreciation (amortization) charged to the assets should be adjusted in future years at the revised asset carrying amount (net of accumulated impairment), less its salvage value, on a systematic basis over its remaining service life. If asset impairment loss (excluding goodwill) is reversed, the increase in the carrying amount resulting from reversal is credited to current income and debited to accumulated impairment or is used to increase the carrying amount of the asset. However, loss reversal should not be more than the carrying amount (net of depreciation) had the impairment not been recognized.

A cash-generating unit ("CGU"), which goodwill has been allocated is tested for impairment annually at the same time, irrespective of whether there is any indication of impairment. If an impairment loss is to be recognized, it is first allocated to reduce the carrying amount of any goodwill, then to the other assets of CGU pro rata on the basis of the carrying amount of each asset in the unit (group of units). Impairment losses relating to goodwill cannot be reversed in future periods for any reason.

Separate-account Products

KGI Life Insurance sells investment-linked insurance products, of which the applicant pays the premium according to the agreed amount less the expenses incurred by the insurer. In addition, the investment distribution is approved by the applicant and then transferred to specific accounts as requested by the applicant. The value of these specific accounts is determined based on their fair value on the applicable date and the net worth is computed in accordance with the relevant regulations and the IFRSs.

In accordance with Regulations Governing the Preparation of Financial Reports by Insurance Enterprises, assets and liabilities representing the rights and obligations of the applicants, whether arising from an insurance contract or insurance policy with features of financial instruments, are recognized separately as "separate-account product assets" and "separate-account product liabilities". The revenues and expenses of separate-account insurance products in accordance with IFRS 4 Insurance Contracts, separately recognized as "separate-account product revenues" and "separate-account product expenses."

Provisions, Contingent Liabilities and Contingent Assets

Provisions are recognized when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that the Group will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

Provisions are measured at the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (where the effect of the time value of money is material).

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognized as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

A contingent liability is a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence of one or more uncertain future events not wholly within the control of the entity, or a present obligation that arises from past events but is not recognized because it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation or because the amount of the obligation cannot be measured with sufficient reliability. The Group does not recognize contingent liabilities but disclose them in accordance with related rules instead.

A contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence of one or more uncertain future events not wholly within the control of the entity. The Group does not recognize contingent assets but disclose them in accordance with related rules when the inflow of economic benefits is probable.

Insurance Liabilities and Reserve for Insurance Contracts with Feature of Financial Instruments

KGI Life Insurance's reserved funds for insurance contracts and financial instruments whether with or without discretionary participation feature are made in accordance with "Regulations Governing the Setting Aside of Various Reserves by Insurance Enterprises." Furthermore, they have been validated by the certified actuarial professionals approved by Financial Supervisory Commission. The required amount to be reserved for short-term group insurance is based upon the greater of premium received or calculated premium following the Order No. Financial Supervisory-Insurance-Corporate-10704504821 and No. Financial Supervisory-Insurance-Corporate-11004925801. Reserved amount for the rest of other provisions is addressed below:

Moreover, KGI Life Insurance's insurance contract with discretionary participation feature is classified as liability.

a. Unearned premium reserve

For the insurance policy whose term is within one year and has not met the due date or for the injury insurance policy whose term is over one year, the amount of reserve required is based upon the unexpired risk calculation.

b. Reserve for claims

It is a reserve mainly for the reported but not paid claims and unreported claims. The reported but not paid claims reserve is assessed based on relevant information of each case and the amount deposited is further classified by the type of insurance. Unreported claims reserve is calculated and deposited based on the past experiences and expenses occurred and in accordance with the actuarial principles.

c. Reserve for life insurance liabilities

Based on the life table and projected interest rates in the manual provided by the authority for each type of insurance, the dollar amount of life insurance reserve is calculated and deposited according to the calculation method listing on Article 12 of "Regulations Governing the Setting Aside of Various Reserves by Insurance Enterprises" and the manual published by each authority of insurance products.

Starting from policy year of 2003, for valid insurance contract whose dividend calculation is stipulated by the Order No. Financial Supervisory-Insurance-Corporate-11004931041, the downward adjustments of dividend due to the offset between mortality saving (loss) and loss (gain) from difference of interest rates should be recognized and recorded as the increase of reserve for long-term valid contract.

- d. Special reserve
 - For the retained businesses with policy period within 1 year, the special reserve is classified into 2 categories, "Special Capital Reserve - Special Reserve for Major Incidents" and "Special Capital Reserve - Special Reserve for Fluctuation of Risks." The dollar amount of reserve required is addressed as follows:
 - a) Special capital reserve special reserve for major incidents

All types of insurance should follow the special catastrophe reserve rates set by authorities. Upon occurrence of the catastrophic events, actual claims on retained business in excess of NT\$30,000 thousand can be withdrawn from the reserve. If the reserve has been set aside for over 15 years, KGI Life Insurance could have its plan of the recovering process of the reserve assessed by certified actuaries and submit the plan to the authority for reference.

b) Special capital reserve - special reserve for fluctuation of risks

When the actual amount paid for indemnity minus the offsetting amount from special reserve for major incidents is less than the anticipated dollar amount that needs to be paid, 15% of this difference should be reserved in special reserve for fluctuations in risks. When the actual amount paid for indemnity minus the offsetting amount from the special reserve for major incidents is greater than the anticipated dollar amount that needs to be paid, the exceeded amount can be used to write down the special reserve for fluctuating risks. If the special reserve for fluctuation of risks for a specified type of insurance is not enough to be written down, a special reserve for fluctuation of risks for other types of insurance can be used. Also, the type of insurance and total dollar amount written down should be reported to the authority for inspection purposes. When the accumulative dollar amount of special reserve for fluctuation of risks exceeds 30% of the self-retention earned premium within one year, the exceeded amount will be recovered.

For special reserves for major incidents and special reserve for fluctuation of risks addressed previously, the balance of the annual reserve net of tax, the post-tax amount of appropriated and written down or recovery would be recorded in the special capital reserve under equity.

2) KGI Life Insurance sells participating life insurance policy. According to the "Rule Governing application of revenue and expenses related to participating/non-participating policy", the Corporation is required to set aside special reserve for dividend participation based on income before tax and dividend. On the date of declaration, dividend should be withdrawn from this account. The excess dividend should be accounted as special reserve for dividend risks. Additionally, the effects of the gain or loss from disposal of participating life insurance policy approved as equity instrument investments at fair value through other comprehensive income shall transfer directly into special reserve based on income before tax and dividend. If the special reserve is a negative amount, the Corporation shall set aside the same amount of special reserve.

e. Premium deficiency reserve

For the contracts over one year of life, health, or annuities insurance commencing on January 1, 2001, the following rules apply: When the gross premium is less than the valuation net premium, a deficiency reserve is required to be set aside with the value of an annuity, the amount of which shall equal the difference between such premiums and the term of which in years shall equal the number of future annual payments due on such insurance at the date of the valuation.

In addition, for the insurance policy which period is within one year and has not met the due date or accidental insurance policy over one year, the following rules apply: If the probable indemnities and expenses are greater than the aggregate of unearned premium reserves and collectable premiums in the future, the premium deficiency reserve is set aside based on the difference thereof.

f. Other reserve

Pursuant to IFRS 3 "Business Combination", the Corporation shall set aside other reserve for identifiable assets required and liabilities assumed recorded at fair value in order to reflect the fair value of the insurance contract assumed.

g. Liability adequacy reserve

This is the reserve that is set aside based on the adequacy test of liability required by IFRS 4 Insurance Contracts.

h. Reserves for insurance contracts with feature of financial instruments

Financial products without discretionary participation features follows "Regulations Governing the Setting Aside of Various Reserves by Insurance Enterprises" and Depository Accounting.

Foreign Exchange Valuation Reserve

Foreign exchange valuation reserve was appropriated or written-down from the foreign investment assets do not include foreign currency non-investment-linked life insurance product assets) in accordance with "Regulations Governing the Setting Aside of Various Reserves by Insurance Enterprises" and Directions for Foreign Exchange Valuation Reserve by Life Insurance Enterprises". The beginning balance of KGI Life Insurance's foreign exchange valuation reserve is NT\$1,745,679 thousand which has to recognize special reserve within three years since 2012 according to the provision. The recognized amount should not be less than one third of the beginning balance net of tax for the first year. The cumulative recognized amount of the first two years should not be less than two thirds of the beginning balance net of tax. In addition, the saving of hedging costs is transferred to special reserve may be used to increase the share capital or offset deficit. According to "Directions for Foreign Exchange Valuation Reserve by Life Insurance Enterprises" Article 9 and the Official Letter No. 1090490453 issued by the FSC on February 17, 2020, since the Insurance Company set aside the earnings appropriation of 2019, if the Corporation has annual net tax earning, then it should appropriate 10% of that earning to special reserve after shareholders' meeting.

Employee Benefits

a. Short-term employee benefits

The undiscounted amount of the benefits expected to be paid in respect of service rendered by employees in an accounting period is recognized in that period.

b. Retirement benefits

Payments to defined contribution retirement benefit plans are recognized as an expense when employees have rendered service entitling them to the contributions.

Defined benefit costs (including service cost, net interest and remeasurement) under the defined benefit retirement benefit plans are determined using the projected unit credit method. Service cost (including current service cost) and net interest on the net defined benefit liability (asset) are recognized as employee benefits expense in the period they occur. Remeasurement, comprising actuarial gains and losses, (the effect of the changes to the asset ceiling) and the return on plan assets (excluding interest), is recognized in other comprehensive income in the period in which they occur. Remeasurement recognized in other comprehensive income is reflected immediately in retained earnings and will not be reclassified to profit or loss.

Net defined benefit liabilities (assets) represent the actual deficit (surplus) in the Group's defined benefit plan. Any surplus resulting from this calculation is limited to the present value of any refunds from the plans or reductions in future contributions to the plans.

c. Other long-term benefits

Other long-term employee benefits are accounted for in the same way as the accounting required for defined benefit plan except that remeasurement is recognized in profit or loss.

Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

a. Current tax

Income tax payable (recoverable) is based on taxable profit (loss) for the year determined according to the applicable tax laws of each tax jurisdiction.

According to the Income Tax Act in the ROC, an additional tax on unappropriated earnings is provided for in the year the shareholders approve to retain earnings.

Adjustments of prior years' tax liabilities are added to or deducted from the current year's tax provision.

The Corporation and its eligible subsidiaries use the linked-tax system in the filing of tax returns. The accounting treatment applied by the Group to the income tax is to adjust in the Corporation's and its subsidiaries' book by a prorated share amount the difference between the combined current/deferred taxes and the total of each Group member's current/deferred taxes. Related payables and receivables are recorded in each of the Group members' books.

Based on the "Basic Income Tax Act," if the basic income tax is greater than the amount of regular income tax, the income tax payable should be the basic income tax. The incremental tax payable is recorded as current income tax expense.

b. Deferred tax

Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences, unused loss carry forward and unused tax credits to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized.

Deferred tax liabilities are recognized for taxable temporary differences associated with investments in subsidiaries and associates, except where the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognized to the extent that it is probable that there will be sufficient taxable profits against which to utilize the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered. A previously unrecognized deferred tax asset is also reviewed at the end of each reporting period and recognized to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expected, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

c. Current and deferred tax for the year

Current and deferred taxes are recognized in profit or loss, except when they relate to items that are recognized in other comprehensive income or directly in equity, in which case, the current and deferred taxes are also recognized in other comprehensive income or directly in equity respectively.

Revenue Recognition

Interest revenue arisen from credits are estimated on an accrual basis. All interest accrued shall be suspended from the date the loans are classified as nonperforming loans. Interest earned from nonperforming loans shall be recognized as interest income when the interest has been collected by the Group.

Service fee income is recognized when collected or when the majority of project is completed. Service fee income is received when loans and receivables are recognized. The service fee income which are caused by loans or receivables shall be recognized as interest revenue when they meet a suggested policy announced by the Bankers Association of the Republic of China. This policy requires an individual loan that meets the materiality criteria to have its effective interest rate be consistent with its interest revenue. Overall, the service fees shall be adjusted from the original agreed interest rate to the effective interest rate.

Revenue from rendering services - brokerage and underwriting commissions and fees, stock transaction agent fees, futures trading commissions and fees - is recognized on the basis of the stage of completion of related services as of the balance sheet dates.

Insurance Premium Income and Expenses

Insurance contract and financial instruments with discretionary participation features, the initial and renewal premium are only recognized as revenue after collection and underwriting procedures, and subsequent session of collection are completed, respectively. In terms of the acquisition cost such as commission expense and brokerage expenses, the related expense will be recognized in that period after commencement of the insurance contract.

For non-separate-account insurance product that is also classified as financial products without discretionary participation features, the insurance revenue collected is recognized on the balance sheet as "reserves for insurance contracts with feature of financial instruments." The related acquisition costs will be written-down in that period after commencement of the insurance contract under "reserves for insurance contracts with feature of financial instruments."

Leases

At the inception of a contract, the Group assesses whether the contract is (or contains) a lease.

For a contract that contains a lease component and non-lease components, the Group allocates the consideration in the contract to each component on the basis of the relative stand-alone price and accounts for each component separately.

a. The Group as lessor

Leases are classified as finance leases whenever the terms of a lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

Under finance leases, the net investment in a lease is measured at (a) the present value of the sum of the installment accounts receivable and lease payments receivable by a lessor and any unguaranteed residual value accrued to the lessor plus (b) initial direct costs and is presented as a finance lease receivable. Finance lease income is allocated to the relevant accounting periods so as to reflect a constant, periodic rate of return on the Group's net investment outstanding in respect of leases.

Lease payments less any lease incentives payable from operating leases are recognized as income on a straight-line basis over the terms of the relevant leases.

b. The Group as lessee

The Group recognizes right-of-use assets and lease liabilities for all leases at the commencement date of a lease, except for short-term leases and low-value asset leases accounted for applying a recognition exemption where lease payments are recognized as expenses on a straight-line basis over the lease terms.

Right-of-use assets are initially measured at cost, which comprises the initial measurement of lease liabilities adjusted for lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs needed to restore the underlying assets, and less any lease incentives received. Right-of-use assets are subsequently measured at cost less accumulated depreciation and impairment losses and adjusted for any remeasurement of the lease liabilities. Right-of-use assets are presented on a separate line in the consolidated balance sheets.

Right-of-use assets are depreciated using the straight-line method from the commencement dates to the earlier of the end of the useful lives of the right-of-use assets or the end of the lease terms. However, if leases transfer ownership of the underlying assets to the Group by the end of the lease terms or if the costs of right-of-use assets reflect that the Group will exercise a purchase option, the Group depreciates the right-of-use assets from the commencement dates to the end of the useful lives of the underlying assets.

Lease liabilities are initially measured at the present value of the lease payments. The lease payments are discounted using the interest rate implicit in a lease, if that rate can be readily determined. If that rate cannot be readily determined, the Group uses the lessee's incremental borrowing rate.

Subsequently, lease liabilities are measured at amortized cost using the effective interest method, with interest expense recognized over the lease terms. When there is a change in a lease term, a change in the assessment of an option to purchase an underlying asset, or a change in future lease payments resulting from a change in an index or a rate used to determine those payments, the Group remeasures the lease liabilities with a corresponding adjustment to the right-of-use-assets. However, if the carrying amount of the right-of-use assets is reduced to zero, any remaining amount of the remeasurement is recognized in profit or loss. Lease liabilities are presented on a separate line in the consolidated balance sheets.

The Group negotiates with the lessor for rent concessions as a direct consequence of the Covid-19 to change the lease payments originally due by June 30, 2022, that results in the revised consideration for the lease less than, the consideration for the lease immediately preceding the change. There is no substantive change to other terms and conditions. The Group elects to apply the practical expedient to all of these rent concessions, and therefore, does not assess whether the rent concessions are lease modifications. Instead, the Group recognizes the reduction in lease payment in profit or loss in the period in which the events or conditions that trigger the concession occurs, and makes a corresponding adjustment to the lease liability.

Share-based Payment Arrangements

Restricted shares for employees are measured at fair value on the date of grant, with a corresponding increase in capital surplus - restricted shares for employees.

The fair value determined at the grant date of the employee share options is expensed on a straight-line basis over the vesting period, based on the Group's estimate of employee share options that will eventually vest, with a corresponding increase in capital surplus - employee share options.

When the share-based payment awards held by the employees of an acquiree (acquiree awards) are replaced by the Group's share-based payment awards (replacement awards), both the acquiree awards and the replacement awards are measured in accordance with the market-based measure at the acquisition date. The portion of the replacement awards that is included in measuring the consideration transferred in a business combination equals the market-based measure of the acquiree awards multiplied by the ratio of the portion of the vesting period completed to the greater of the total vesting period or the original vesting period of the acquiree award.

Reinsurance

Premiums ceded to reinsurers and reinsurance commission income generated from ceded reinsurance business and due to reinsurers and ceding companies are recognized in the same period with income or expense of the related insurance contract. As the net right of holding reinsurance contract includes reinsurance reserve assets, claims recoverable from reinsurers and due from reinsurers and ceding companies, they are recognized according to the method of signed reinsurance contract and related insurance contract liabilities. The assets, liabilities, income and expense of reinsurance contract cannot offset with the income and expense of related insurance liabilities and insurance contract.

KGI Life Insurance holds the right over re-insurer for reinsurance reserve assets, claims recoverable from reinsurers-net and due from reinsurers and ceding companies, and regularly assess if impairment has occurred to such rights or the rights can no longer be recovered. When objective evidences demonstrate that such rights after initial recognition may lead to KGI Life Insurance not recovering all contractual terms of the amount due; and the above events can be recovered from reinsurers at the impacted amount, then KGI Life Insurance can retrieve an amount that is less than the carrying value of the aforementioned rights, and recognize impairment losses.

For the classification of reinsurance contracts, KGI Life Insurance assesses whether the transfer of significant insurance risk to the re-insurer has occurred. If the transfer of significant insurance risk is not apparent, then the contract is recognized and evaluated with deposit accounting.

For reinsurance contracts that have their significant insurance risk transferred, if KGI Life Insurance can separate and measure the individual deposit component, then the reinsurance contracts need to be recognized separately as the insurance component and the deposit component. That is, KGI Life Insurance receives (or pays) the contract's value minus the insurance component, recognizing it as financial liabilities (or assets), and not as incomes (or expenses). The financial liabilities (or assets) are recognized with the fair value approach and uses the present value of future cash flow as the basis for the fair value approach.

5. MATERIAL ACCOUNTING JUDGMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

In the application of the Group's accounting policies, which are described in Note 4, management is required to make judgments, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed by management on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

a. Impairment loss on discounts and loans

The management regularly review loans portfolios in accordance with IFRS 9 to assess impairment periodically. To determine whether an impairment loss should be recognized, the management exercises its judgments on whether there has been a significant increase in credit risk or there is any indication of credit impairment. For the purpose of impairment assessment, the management determines the expected future cash flows based on past events, present conditions and future economic circumstances of the assets with similar credit risks. The management also reviews periodically the methodology and assumptions adopted for both expected future cash flow and its timing to decrease the difference between estimated and actual amount of impairment. Also, the management should consider the specifications of the Procedures to make sure that it is in compliance with the minimum eligibility criteria. Furthermore, interest rate fluctuations impacted on financial assets credit risk, lead the uncertainty of estimating default probability and default loss rate to increase.

b. Assessment of insurance liabilities and liability adequacy reserve

Management uses actuarial model and several material assumptions when assessing the insurance liabilities and liability adequacy reserve. The assumptions were based on the principles embodied in the relevant laws and regulations, which cover the unique risk exposure, product characteristics and experiences from target markets of KGI Life Insurance. The assessment of liability adequacy reserve is in compliance with the relevant norms promulgated by The Actuarial Institute of the Republic of China. When KGI Life Insurance assesses the liability adequacy reserve, the estimated present value of future cash flows of insurance contracts is based on reasonable estimate of future insurance payments, premium income and related expenses.

6. CASH AND CASH EQUIVALENTS

| | December 31 | |
|---|---------------------------------------|-----------------------|
| | 2023 | 2022 |
| Cash in banks Due from banks Others | \$ 49,087,34 17,657,40 6,120,03 | 9,047,945 |
| | <u>\$ 72,864,77</u> | <u>\$ 132,489,379</u> |

Cash and cash equivalents as of December 31, 2023 and 2022 as shown in the consolidated statement of cash flows can be reconciled to the related items in the balance sheets as follows; please refer to the consolidated statement of cash flows for the reconciliation information.

7. DUE FROM THE CENTRAL BANK AND CALL LOANS TO FINANCIAL INSTITUTIONS

| | December 31 | |
|--|----------------------|----------------------|
| | 2023 | 2022 |
| Deposit reserve - demand accounts | \$ 12,306,162 | \$ 12,357,783 |
| Call loans to financial institutions | 9,485,620 | 30,930,435 |
| Deposit reserve - checking accounts | 4,068,943 | 7,449,871 |
| Due from the Central Bank - interbank settlement funds | 3,606,610 | 3,513,861 |
| Deposit reserve - foreign currencies | 215,145 | 199,602 |
| | <u>\$ 29,682,480</u> | <u>\$ 54,451,552</u> |

Under a directive issued by the Central Bank of the ROC, New Taiwan dollar (NTD) - denominated deposit reserve is determined monthly at prescribed rates based on average balance of the Bank's deposits. Deposit reserve - demand account should not be used, except for adjusting the deposit reserve account monthly.

In addition, separate foreign-currency deposit reserves are determined at prescribed rates based on balances of foreign-currency deposits. These reserves may be withdrawn anytime at no interest.

There are no certificates of deposit issued by the Central Bank of the ROC pledged as collateral for the Group.

As of December 31, 2022, bank debentures issued by the Group designated as at FVTPL were as follows:

| Bank Debenture Number | December 31, 2022 | Issuance Period | Method of Paying Principles and Interests | Interest Rate |
|--------------------------|--|--|--|------------------|
| P18KGIB1 P18KGIB2 | \$ 6,141,600 <u>4,913,280</u> 11,054,880 | January 30, 2018-January 30, 2048 (Note) February 27, 2018-February 27, 2048 (Note) | Principal due on maturity Principal due on maturity | 0% 0% |
| Valuation adjustments | (25,291) \$ 11,029,589 | | | |

Note: Based on 100% of the carrying value of each bond principal plus the interest; the Bank may redeem all the debentures after five years from the issue date (inclusive).

KGI Life Insurance elected to adopt the overlay approach in expressing financial assets designated as at FVTPL under IFRS 4 "Insurance Contracts" starting from application of IFRS 9. Investment of financial assets relating insurance contracts issued by KGI Life Insurance designated as at adoption of the overlay approach financial assets were as follows:

Financial assets mandatorily classified as at FVTPL

| | December 31 | |
|-----------------|-----------------------|-----------------------|
| | 2023 | 2022 |
| Mutual funds | \$ 171,271,175 | \$ 146,941,589 |
| Shares | 164,345,519 | 134,671,411 |
| Bank debentures | 41,585,764 | 40,468,179 |
| Corporate bonds | 5,105,865 | 4,924,526 |
| | <u>\$ 382,308,323</u> | <u>\$ 327,005,705</u> |

For the years ended December 31, 2023 and 2022, reclassification amount under profit or loss and other comprehensive income of designated as at adoption of the overlay approach financial assets is described as follows:

| | For the Year Ended December 31 | |
|--|--------------------------------|---------------------------------|
| | 2023 | 2022 |
| Gain (loss) on application of IFRS 9 Loss (gain) on application of IAS 39 | \$ 60,248,902 (26,808,352) | \$ (41,599,546) (23,653,586) |
| Gain (loss) on reclassification using the overlay approach | <u>\$ 33,440,550</u> | <u>\$ (65,253,132</u>) |

Due to the adjustment of the overlay approach, gain on financial assets measured at FVTPL decreased from \$42,602,842 thousand to gain on \$9,162,292 thousand for the year ended December 31, 2023; and loss of financial assets measured at FVTPL decreased from \$127,915,536 thousand to loss of \$62,662,404 thousand for the year ended December 31, 2022.

The contract (nominal) amounts of the Group's outstanding derivative financial instruments as of December 31, 2023 and 2022 are summarized as follows:

| | December 31 | |
|--|------------------|------------------|
| | 2023 | 2022 |
| Currency swap and forward exchange contracts | \$ 2,317,652,516 | \$ 2,074,150,069 |
| Interest rate swap contracts | 528,624,852 | 519,646,961 |
| Non-deliverable forward contracts | 402,196,302 | 318,535,556 |
| Options and futures contracts | 281,308,026 | 179,725,036 |

| | <u>\$ 249,360,614</u> | <u>\$ 215,165,592</u> |

a. Investments in debt instruments at FVTOCI

As of December 31, 2023 and 2022, investments in debt instruments at FVTOCI, with aggregate carrying values of \$67,514,613 thousand and \$66,591,344 thousand had been sold under repurchase agreements (recognized as notes and bonds issued under repurchase agreements).

For the information on investments in debt instruments at FVTOCI pledged as collateral for the Group, please refer to Note 47.

For the information regarding credit risk analysis and assessment of impairment on investments in debt instruments at FVTOCI, please refer to Note 52.

b. Investments in equity instruments at FVTOCI

For the years ended December 31, 2023 and 2022, the Group sold its shares in order to manage its investment portfolio. The sold shares had a fair value of \$7,268,369 thousand and \$27,674,969 thousand, respectively. The Group transferred a gain of \$1,047,715 thousand and a gain of \$2,262,417 thousand from other equity related-unrealized gain or loss on financial assets at fair value through other comprehensive income to retained earnings.

For the years ended December 31, 2023 and 2022, dividend income for \$818,614 thousand and \$1,760,715 thousand, respectively, and those related to investment held as of December 31, 2023 and 2022 were \$700,483 thousand and \$845,975 thousand, respectively, and those related to investment derecognized for the years ended December 31, 2023 and 2022 were \$118,131 thousand and \$914,740 thousand, respectively.

There are no investments in equity instruments at FVTOCI pledged as collateral for the Group.

11. FINANCIAL ASSETS AT AMORTIZED COST

| | December 31 | |
|------------------|-------------------------|-------------------------|
| | 2023 | 2022 |
| Bank debentures | \$ 792,167,984 | \$ 778,845,092 |
| Corporate bonds | 567,064,085 | 566,594,548 |
| Government bonds | 247,451,871 | 281,696,443 |
| Others | 61,333,741 | 51,470,852 |
| | <u>\$ 1,668,017,681</u> | <u>\$ 1,678,606,935</u> |

As of December 31, 2023 and 2022, investments in debt instruments at amortized cost, with aggregate carrying values of \$927,945 thousand and \$797,576 thousand had been sold under repurchase agreements (recognized as notes and bonds issued under repurchase agreements).

For the years ended December 31, 2023 and 2022, Financial assets at amortized cost are derecognized because of the credit risk are increasing, seldomly selling, or both individually and totally amounts is lower than the materiality, corporation recognizes the gain on disposal \$241,263 thousand and the gain on disposal \$317,154 thousand.

For the information on investments in debt instruments at amortized cost pledged as collateral for the Group, please refer to Note 47.

For the information regarding credit risk analysis and assessment of impairment on investments in debt instruments at amortized cost, please refer to Note 52.

12. FINANCIAL INSTRUMENTS FOR HEDGING

| Right-of-use assets - superficies of royalties | 3,711,997 | 4,057,554 | |
| Right-of-use assets - land | 453,228 | 481,615 | |
| | <u>\$ 59,391,549</u> | <u>\$ 58,626,748</u> | |

The changes in the Group's investment properties were as follows:

| | For the Year Ended December 31 | | |
|--|---|---|--|
| | 2023 | 2022 | |
| Cost | | | |
| Beginning balance Additions Disposals Reclassification Ending balance <u>Accumulated depreciation</u> | \$ 61,998,195 145,738 (397,692) <u>1,700,555</u> <u>63,446,796</u> | \$ 38,128,494 23,668,779 (359,294) <u>560,216</u> 61,998,195 | |
| Beginning balance Depreciation Disposals Reclassification Ending balance | $\begin{array}{c} (2,790,965) \\ (629,068) \\ 29,525 \\ \underline{\qquad (82,604)} \\ (3,473,112) \end{array}$ | (2,279,484) (538,250) 10,829 <u>15,940</u> (2,790,965) (Continued) | |

| | For the Year Ended December 31 | | | |
|----------------------------|--------------------------------|-------------------|-----------|---------------------------|
| | | 2023 | | 2022 |
| Accumulated impairment | | | | |
| Beginning balance | \$ | (580,482) | \$ | (549,112) |
| Reserve of impairment loss | | (1,653) | | (33,730) |
| Disposals | | - | | 2,537 |
| Reclassification | | | | (177) |
| Ending balance | | (582,135) | | (580,482) |
| Carrying amount | <u>\$</u> | <u>59,391,549</u> | <u>\$</u> | 58,626,748 (Concluded) |

The above items of investment property are depreciated on a straight-line basis at estimated economic lives as follows:

| Buildings and facilities | 5-60 years |
|--|------------|
| Right-of-use assets - superficies of royalties | 70 years |
| Right-of-use assets - land | 70 years |

The fair values of the Group's investment property as of December 31, 2023 and 2022 were \$61,489,628 thousand and \$60,163,720 thousand, respectively. Investment property was categorized into Level 3.

The Corporation's subsidiaries had development of the vacant land and prepayments for buildings without construction license, and the carrying amount was \$2,434,887 thousand and \$2,436,553 thousand, respectively, on December 31, 2023 and 2022. Because its fair value cannot be reliably determined, it was excluded from the amount of fair value above mentioned.

Valuation of fair values above mentioned, except the fair values of investment properties held by CDIB Capital Group and KGI Securities and or the year ended December 31, 2023 and 2022 were arrived at without appraisal from independent appraisers. All the other subsidiaries of the Group engaged independent appraisers for the valuation of their investment properties. The sales comparison approach and income approach were used in the valuation, whereby the sales comparison approach compares a subject property's characteristics with those of comparable properties which have been recently sold in similar transaction, and income approach takes the net operating income of the rent collected and divides it by the capitalization rate.

The Group's investment property is mainly based on leased building with lease terms of 1 to 20 years and some lessees have priority to rent the leased building. The lease contracts contain market review clauses in the event that the lessees exercise their options to extend.

The maturity analysis of lease payments receivable under operating leases of investment properties was as follows:

| | December 31 | | |
|----------------|---------------------|---------------------|--|
| | 2023 | 2022 | |
| Year 1 | \$ 1,101,630 | \$ 1,252,873 | |
| Year 2 | 920,818 | 972,432 | |
| Year 3 | 683,978 | 745,190 | |
| Year 4 | 572,064 | 522,771 | |
| Year 5 | 455,103 | 434,429 | |
| Year 5 onwards | 3,793,966 | 3,862,022 | |
| | <u>\$ 7,527,559</u> | <u>\$ 7,789,717</u> | |

The investment property leased by the Group for operating leases is depreciated on a straight-line basis over their estimated useful lives as follows:

| Estimated |
|---------------------|
| Useful Lives |

10-60 years

Buildings and facilities

All of the Group's investment property were held under freehold interests. The carrying amount of the investment properties that had been pledged for the Group to secure borrowings were reflected in Note 47.

|---|------------------------------------|------------------------------------|
| | 2023 | 2022 |
| Not later than 1 year Later than 1 year and not later than 5 years Later than 5 years and not later than 10 years | \$ 725,228 1,827,967 624,025 | \$ 866,588 2,181,415 671,268 |
| Later than 10 years | 3,118,622 | 3,195,080 |
| | <u>\$ 6,295,842</u> | <u>\$ 6,914,351</u> |

c. Material lease-in activities and terms

The Group leases land, building and facilities, computer equipment, transportation equipment and other equipment with lease terms of 1 to 15 years. In the contract, the Group has options to lease the building at the end of the lease terms. The lease contract for the right of superficies has been established indicates that KGI Life Insurance also leases land with lease terms of 70 years.

d. Other lease information

Lease arrangements under operating leases for the leasing out of investment properties and freehold property, plant and equipment for the Group, please refer Notes 20 and 21, respectively.

| | For the Year Ended December 31 | |
|---|--------------------------------|-------------------|
| | 2023 | 2022 |
| Expenses relating to short-term leases | <u>\$ 29,617</u> | <u>\$ 37,287</u> |
| Expenses relating to low-value asset leases | <u>\$ 6,663</u> | <u>\$ 7,496</u> |
| Total cash outflow for leases | <u>\$ 970,816</u> | <u>\$ 955,848</u> |

The Group leases certain assets which qualify as short-term leases and certain assets which qualify as low-value asset leases. The Group has elected to apply the recognition exemption and thus, did not recognize right-of-use assets and lease liabilities for these leases.

23. INTANGIBLE ASSETS

| | December 31 | |
|-----------------------|----------------------|----------------------|
| | 2023 | 2022 |
| Purchase policy value | \$ 11,080,843 | \$ 11,397,891 |

Reported but not paid claims are reserved according to insurance type and claims department's estimates based on each individual case's related information without exceeding promised insurance amount for covered accidents. Those reported but not paid reserve is reasonably assessed, sufficient to reflect actual claims paid. In addition, some types of claims are not expected to close shortly because these claims usually depend on court judgments before the closure. The legal department tracks the development of these claims and reasonably estimates claims reserve. The actuarial department assesses final unreported claims based on past claims experience with consideration of claims development trends for past closed cases, and then develop the final claims based on homogeneous features of each insurance through the loss development triangle method and Bornhuetter-Ferguson Method. Reserve for unreported and unclosed claims changes according to external environment. For example, actual loss rate will lead to fluctuations of claims. The actuarial department will evaluate periodically to make reasonable estimate of claims reserve.

- i. Foreign exchange valuation reserve
 - 1) The hedge strategy and risk exposure

KGI Life Insurance Co., Ltd. consistently adjusts the hedge ratios to establish an adequate risk exposure planning based on the new foreign exchange valuation exposure principle by integrating the exchange rate and interest rate trends of domestic and foreign financial markets. However, changes in the hedge and risk exposure ratios should follow the internal risk control to alert and adjust hedge strategy in advance to meet the optimal hedge considerations.

2) Adjustment in foreign exchange valuation reserve

33. RETIREMENT BENEFIT PLANS

a. Defined contribution plans

The Corporation and domestic subsidiaries adopted a pension plan under the Labor Pension Act (the "LPA"), which is a state-managed defined contribution plan. Under the LPA, the Corporation makes monthly contributions to employees' individual pension accounts at 6% of monthly salaries and wages. The total expenses recognized in profit or loss were \$705,158 thousand and \$654,144 thousand for the years ended December 31, 2023 and 2022, respectively.

The Corporation's foreign subsidiaries recognized their contributions as pension expenses in accordance with their local laws and regulation and amounting to \$2,245 thousand and \$2,308 thousand for the years ended December 31, 2023 and 2022, respectively.

b. Defined benefit plans

The Corporation and domestic subsidiaries adopted a defined benefit pension plan for all formal employees based on the Labor Standards Act. Benefit payments are based on service periods and basic salaries and wages at the time of retirement.

Under the defined benefit plan, CDIB Capital Group has made monthly contributions at 13% of salaries and wages to a pension fund. In February 2006, CDIB Capital Group changed the contribution rate from 13% to 4.5% and then further adjusted the contribution rate from 4.5% to 3.14% in November 2008. The fund is managed by the Employees' Pension Reserve Supervisory Committee and deposited in the Bank of Taiwan in the committee's name. Before the end of each year, CDIB Capital Group assesses the balance in the pension fund. If the amount of the balance in the pension fund is inadequate to pay retirement benefits for employees who conform to retirement requirements in the next year, CDIB Capital Group is required to fund the difference in one appropriation that should be made before the end of March of the next year.

KGI Securities and domestic subsidiaries contributes monthly an amount equal to 2% of the monthly salaries to a defined benefit pension fund and to the employees' individual defined contribution pension funds. The funds are managed by the Employees' Pension Reserve Supervisory Committee and deposited in the Bank of Taiwan in the committee's name. Before the end of each year, KGI assesses the balance in the pension fund. If the amount of the balance in the pension fund is inadequate to pay retirement benefits for employees who conform to retirement requirements in the next year, KGI is required to fund the difference in one appropriation that should be made before the end of March of the next year.

KGI Bank places its monthly contributions to the non-managers' pension fund at authorized ratios in the Employees' Pension Reserve, which is deposited in the Bank of Taiwan. Managers' pension funds are managed by the Employee Retirement Fund Management Committee and deposited in KGI Bank's Zhonghe Branch in the committee's name. Before the end of each year, KGI Bank assesses the balance in the pension fund. If the amount of the balance in the pension fund is inadequate to pay retirement benefits for employees who conform to retirement requirements in the next year, KGI Bank is required to fund the difference in one appropriation that should be made before the end of March of the next year.

KGI Life Insurance adopted a pension plan under the Labor Pension Act, which is a state-managed defined contribution plan. KGI Life Insurance contributes monthly a proportion amount of the monthly salaries to a defined benefit pension fund and to the employees' individual defined contribution pension funds. The funds are managed by the Employees' Pension Reserve Supervisory Committee and deposited in the Bank of Taiwan in the committee's name. Before the end of each year, KGI Life Insurance assesses the balance in the pension fund. If the amount of the balance in the pension fund is inadequate to pay retirement benefits for employees who conform to retirement requirements in the next year, KGI Life Insurance is required to fund the difference in one appropriation that should be made before the end of March of the next year.

The amounts included in the consolidated balance sheets in respect of the Group's defined benefit plans were as follows:

| | December 31 | |
|--|-----------------------------|-----------------------------|
| | 2023 | 2022 |
| Present value of defined benefit obligation Fair value of plan assets | \$ 2,738,200 (2,153,611) | \$ 2,679,052 (2,090,618) |
| Net defined benefit liabilities | <u>\$ 584,589</u> | <u>\$ 588,434</u> |

Movements in net defined benefit liabilities (assets) were as follows:

The Group

| Balance at December 31, 2022 | <u>\$ 2,679,052</u> | <u>\$ (2,090,618</u>) | <u>\$ 588,434</u> |

Through the defined benefit plans under the Labor Standards Law, the Group is exposed to the following risks:

- 1) Investment risk: The plan assets are invested in domestic and foreign equity and debt securities, bank deposits, etc. The investment is conducted at the discretion of the Bureau or under the mandated management. However, in accordance with relevant regulations, the return generated by plan assets should not be below the interest rate for a 2-year time deposit with local banks.
- 2) Interest risk: A decrease in the government and corporate bond interest rate will increase the present value of the defined benefit obligation; however, this will be partially offset by an increase in the return on the plan's debt investments.
- 3) Salary risk: The present value of the defined benefit obligation is calculated by reference to the future salaries of plan participants. As such, an increase in the salary of the plan participants will increase the present value of the defined benefit obligation.

The actuarial valuations of the present value of the defined benefit obligation were carried out by qualified actuaries. The significant assumptions used for the purposes of the actuarial valuations were as follows:

The Corporation

| | December 31 | |
|-----------------------------------|-------------|-------|
| | 2023 | 2022 |
| Discount rates | 1.20% | 1.25% |
| Expected rates of salary increase | 2.50% | 2.50% |

CDIB Capital Group and subsidiaries

| | December 31 | |
|---|----------------|----------------|
| | 2023 | 2022 |
| Discount rates Expected rates of salary increase | 1.25% 2.50% | 1.25% 2.50% |

KGI Securities and subsidiaries

| | December 31 | | |
|---|----------------------------|----------------------------|--|
| | 2023 | 2022 | |
| Discount rates Expected rates of salary increase | 1.28%-6.75% 3.00%-4.00% | 1.22%-7.50% 2.50%-4.00% | |

KGI Bank and subsidiaries

| | December 31 | | |
|---|--------------------------------|--------------------------------|--|
| | 2023 | 2022 | |
| Discount rates Expected rates of salary increase | 1.200%-1.375% 2.500%-3.000% | 1.250%-1.500% 2.500%-3.000% | |

KGI Life Insurance

| | December 31 | | |
|-----------------------------------|-------------|-------------|--|
| | 2023 | 2022 | |
| Discount rates | 1.50% | 1.50% | |
| Expected rates of salary increase | 0.00%-2.29% | 0.00%-2.29% | |

China Development Asset Management Corporation

| | December 31 | | |
|-----------------------------------|-------------|-------|--|
| | 2023 | 2022 | |
| Discount rates | 1.25% | 1.25% | |
| Expected rates of salary increase | 2.50% | 2.50% | |

KGI Securities Investment Trust Co., Ltd

| | December 31 | | |
|-----------------------------------|-------------|-------|--|
| | 2023 | 2022 | |
| Discount rates | 1.16% | 1.22% | |
| Expected rates of salary increase | 3.00% | 2.50% | |

If possible reasonable change in each of the significant actuarial assumptions occurs and all other assumptions remain constant, the present value of the defined benefit obligation will increase (decrease) as follows:

The Group

| | December 31 | | |
|-------------------------------------|----------------------|----------------------|--|
| | 2023 | 2022 | |
| Discount rate(s) | | | |
| 0.25-1.00% increase | \$ (109,031) | <u>\$ (110,765)</u> | |
| 0.25-1.00% decrease | \$ 115,787 | <u>\$ 119,386</u> | |
| Expected rate(s) of salary increase | | | |
| 0.25-1.00% increase | <u>\$ 134,938</u> | \$ 142,304 | |
| 0.25-1.00% decrease | <u>\$ (126,006</u>) | <u>\$ (130,774</u>) | |

The sensitivity analysis presented above may not be representative of the actual change in the present value of the defined benefit obligation as it is unlikely that the change in assumptions would occur in isolation of one another as some of the assumptions may be correlated.

| | December 31 | |
|--|-------------------|-------------------|
| | 2023 2022 | |
| The expected contributions to the plan for the next year | <u>\$ 120,150</u> | <u>\$ 238,842</u> |
| The average duration of the defined benefit obligation | 4-16 years | 5-17 years |

Note: Par value of NT\$10.

The Corporation's issuance of new restricted employee shares was approved by the Financial Supervisory Commission. On November 19, 2021, the Corporation's board of directors approved the issuance of 109,991 thousand common shares, with a par value of NT\$10 and the record date for the capital increase is set on December 1, 2021. On May 20, 2022, the Corporation's board of directors approved the issuance of 1,100 thousand common shares, with a par value of NT\$10 and the record date for the capital increase is set on June 20, 2022.

Preferred shares

On October 1, 2021, the Corporation adopted a resolution of the extraordinary shareholders' meeting to take KGI Life Insurance as a 100%-owned subsidiary through share conversion. The Corporation issued 1,893,044 thousand preferred shares B, with a par value of NT\$10. The issue price is NT\$10 per share. According to the resolution of the board of directors on November 16, 2021, the date of the capital increase on December 30, 2021, and it is classified under equity. The rights and obligations are as follows:

1) If the Corporation has a surplus after the year-end final accounts, it should first pay taxes and make up the losses accumulated from preceding years. After setting aside the legal reserve and setting aside or reversing the special reserve as required by law, if there is any remaining balance, it may first distribute the dividends for the year to which the preferred shares are entitled.

- 2) The dividend on the preferred shares is calculated at an annual rate of 3.55% (seven-year IRS 0.75% + 2.80%) based on the issue price per share. The seven-year IRS rate will reset on the business day following the seventh year from the issue date and every seven years thereafter. The interest rate reset record date is two Taiwan bank days prior to the interest rate reset date. The interest rate index seven-year IRS is the arithmetic average of Reuter's TAIFXIRS and COSMOS3 seven-year interest rate swap quotes priced at 11:00 a.m. on the interest rate reset record date. If such quotes are not available on the interest rate reset record date, The Corporation will decide in good faith and based on reasonable market conditions.
- 3) The dividend on the preferred shares is paid annually in cash after the board of directors set the record date for the distribution of the preceding year's dividend after the financial report is approved by the shareholders at the annual general meeting. The number of dividends paid in the year of issuance and the number of dividends received in the year of recovery are calculated based on the actual number of days the preferred shares are outstanding in that year.
- 4) The Corporation has the discretion to distribute dividends on the preferred shares. If the Corporation has no or insufficient surplus to distribute dividends on the preferred shares in its annual accounts, or if the distribution of dividends on the preferred shares will cause the Corporation's capital adequacy ratio to fall below the minimum requirements set by law or by the competent authorities, or if there are other necessary considerations, the Corporation may resolve not to distribute dividends on the preferred shares shall not dissent.
- 5) The preferred shares are noncumulative, and any undistributed or under-distributed dividends will not be accumulated and deferred in coming years.
- 6) The preferred shareholders shall not participate in the distribution of earnings and capital surplus in cash and capitalization of common shares, except for receiving the dividends set forth in (2).
- 7) The preferred shareholders shall have priority in the distribution of the residual property of the Corporation over the common shareholders, and the shareholders of each class of preferred shares shall be paid in the same order, provided that such distribution shall not exceed the original amount of issuance.
- 8) The preferred shareholders shall not have voting rights at general shareholders' meetings, but may be elected as directors, and shall have voting rights at shareholders' meetings of preferred shares and at shareholders' meetings concerning the rights and obligations of preferred shareholders.
- 9) Preferred shares shall not be converted into common shares.
- 10) The preferred shares issued by the Corporation have no expiration date and the preferred shareholders have no right to require the Corporation to buy back the preferred shares held thereby. On the day following the expiration of seven years from the date of issuance, the Corporation may redeem all or part of the preferred shares issued at the actual issue price, and the un-redeemed preferred shares shall continue to be subject to the rights and obligations of the aforementioned terms of issuance. If the Corporation decides to pay dividends in the current year, the dividends payable as of the date of recovery are calculated based on the actual number of days the preferred shares are outstanding in that year.
- 11) When the Corporation issues new shares for cash, the preferred shareholders have the same right of first refusal to purchase the new shares as the common shareholders.

KGI Securities' board of directors, on behalf of the shareholders' meeting, approved the reduction of the above-mentioned preference stock of 310,901 thousand shares held by KGI Securities on February 18, 2022. The Corporation's board of directors approved the capital reduction and wrote off the treasury stock on April 25, 2022, which was endorsed by the FSC on June 13, 2022; the record date is July 8, 2022.

b. Capital surplus

| | December 31 | |
|--|-----------------------------|-----------------------------|
| | 2023 | 2022 |
| Difference between consideration and carrying amounts adjusted arising from changes in percentage of ownership in subsidiaries Additional paid-in capital | \$ 18,488,215 13,003,878 | \$ 18,488,215 13,003,878 |
| Arising from treasury stock transactions Others | 1,682,294 414,215 | 1,682,294 452,418 |
| | <u>\$ 33,588,602</u> | <u>\$ 33,626,805</u> |

The premium from shares issued in excess of par (share premium from issuance of common shares, treasury share transactions and excess of consideration received over the carrying amount of the subsidiaries' net assets during disposal or acquisition) and donations may be used to offset a deficit; in addition, when the Corporation has no deficit, such capital surplus may be distributed as cash dividends or transferred to capital limited to a certain percentage of the Corporation's capital surplus and once a year.

The capital surplus from long-term investments may not be used for any purpose.

Under Order No. 10200017220 issued by the Financial Supervisory Commission (FSC), if the capital surplus obtained by a financial holding company through a stock conversion comes from its subsidiaries' unappropriated earnings net of legal reserve and special reserve, the surplus may be distributed as cash dividends or transferred to capital in the period of conversion, and the distribution is exempted from the appropriation restrictions of Article 41 of the Securities and Exchange Act and Article 8 of the Securities and Exchange Act Enforcement Rules.

c. Special reserve

According to Rule No. 09900738571 issued by FSC and Rule No. 10000002891 issued under Regulations Governing Securities Firms, Grand Cathay and GCFC reclassified the default reserve and the trading loss reserve that had been set up until December 31, 2010 to special reserve. The Group also recognizes special revenue according to the percentage of holdings by the Group to subsidiaries directly and indirectly.

This special reserve should be used only to offset a deficit or when the legal reserve has reached 50% of the Corporation's paid-in capital, up to 50% thereof may be transferred to paid-in capital or according to Rule No. 09900738571 issued by FSC, the Corporation reclassified the legal reserve which exceed paid-in capital, then reversed the surpass part to retained earnings into line with the approval of FSC.

The Corporation recognizes or reserves special revenue under Article 41 of the Securities and Exchange Act, Rule No. 1090150022 issued by the FSC and Order No. 11102279031 issued by the FSC.

d. Appropriation of earnings

Considering the necessity of business development and earnings enhancement, as well as in compliance with the relevant laws and regulations, the Corporation adopts a residual dividends policy. Cash dividend may not be less than 10% of total dividend.

Where the Corporation made profit after annual final accounting, the profit shall be first utilized for paying taxes, making up losses for previous years, setting aside legal reserve as well as setting aside or reversing special reserve in accordance with the laws and regulations, and then the remaining of the profit together with the addition of adjusted undistributed retained earnings in the beginning of the period shall be used as the basis for the distribution of dividends and bonus to shareholders. After the distribution of preferred share dividends according to the Articles of Incorporation, the remaining is subject to the range from 30% to 100% of the basis for the distribution as dividend for common shareholders. The distribution plan shall be proposed by the Board of Directors and resolved in the annual general shareholders meeting.

The appropriation of earnings should be resolved by the shareholders in the following year and given effect to in the financial statements of that year.

The appropriation of earnings of 2022 and 2021 was approved in the shareholders' meeting on June 17, 2023 and June 17, 2022 as follows:

| | Earnings Appropriation | | Dividends Per Share (NT\$) | | | Share | |
|---|------------------------------------|----|------------------------------------|----|----|-------|------|
| | 2022 | | 2021 | 20 | 22 | 2 | 021 |
| Earnings appropriation | | | | | | | |
| Legal reserve Appropriation of special reserve Cash dividends | \$ 1,909,777 48,566,551 - | \$ | 3,668,049 123,680 16,848,554 | \$ | - | \$ | 1.00 |
| Preference share dividend | - | | 3,077 | | | | |

For the year ended 2021, KGI Life Insurance became the Corporation's 100% owned subsidiary through a share swap. KGI Securities held the Corporation's shares. The Corporation converted the shares into treasury shares at the price of the share conversion. KGI Securities' board of directors, on behalf of the shareholders' meeting, approved the reduction of the Corporation's common stock of 340,714 thousand and preference stock of 310,901 thousand on February 18, 2022; the record date for the capital reduction is April 8, 2022. The Corporation's board of directors approved the capital reduction and written-off the treasury stock on April 25, 2022, which was endorsed by the FSC on June 13, 2022; the record date is July 8, 2022.

Under the Securities and Exchange Act, the Corporation should not acquire treasury stock in excess of 10% of its total shares outstanding. In addition, the Corporation should not spend more than the aggregate amount of the retained earnings, paid-in capital in excess of par value, and realized capital surplus arising from gains on disposal of properties and donated capital. The Corporation should not use treasury shares to secure any of its obligations and should not exercise any shareholders' rights on those shares.

| Depreciation and amortization expenses | <u>\$ 3,795,211</u> | <u>\$ 3,531,131</u> |

The Company's Articles of Incorporation stipulate to distribute employees' compensation and remuneration to directors at the rates no less than 1% and no higher than 1%, respectively, of net profit before income tax, employees' compensation, and remuneration to directors.

For the years ended December 31, 2023 and 2022, the compensation of employees was \$195,000 thousand and \$179,000 thousand, and the remuneration of directors and supervisors was \$194,000 thousand and \$178,000 thousand.

The amounts of employees' compensation were \$179,000 thousand and \$357,000 thousand for 2022 and 2021, respectively, and the differences between the amount of employees' compensation and the amount recognized in the financial statements were both \$0; the amounts of directors' compensation were \$178,000 thousand and \$290,000 thousand for 2022 and 2021, respectively; the differences between the amount of directors' compensation and the amount recognized in the financial statements were \$0 and \$(65,000) thousand, respectively, the aforementioned differences were due to changes in accounting estimates and were recorded as profit or loss in the following year.

The information on the proposed and approved compensation to employees and directors and supervisor is available on the Market Observation Post System (M.O.P.S.) website of the Taiwan Stock Exchange.

43. INCOME TAX

Under Rule No. 910458039 issued by the Ministry of Finance on February 12, 2003, a financial holding company and its domestic subsidiaries holding over 90% of shares issued by the financial holding company for 12 months within the same tax year may choose to adopt the linked-tax system for income tax filings in accordance with Article 49 of Financial Holding Company Act and Article 40 of Business Mergers and Acquisitions Act. Thus, the Corporation adopted the linked-tax system for income tax filing with its eligible subsidiaries, income tax and unappropriated earnings tax filings.

The principle adopted by the Group under the linked-tax system is to reduce the income tax liabilities of the Group and to consider the fairness of the tax borne by all the companies in order to maximize the synergy of the Group. The Group adopt the linked-tax system for tax filings. The different amounts between tax expense and deferred tax liabilities and assets based on consolidation with its qualified subsidiaries are allocated and adjusted to income tax expense/benefit on the Corporation and each subsidiary pro rata; related amounts are recognized as receivables from parent or payable on parent.

a. Income tax expense recognized in profit or loss

The major components of tax expense (benefit) were as follows:

| | For the Year Ended December 31 | |
|---|--------------------------------|-----------------------|
| | 2023 | 2022 |
| Current income tax | | |
| Current period | \$ 699,754 | \$ 687,179 |
| Income tax on unappropriated earnings | - | 859,327 |
| Prior years | (31,267) | (310,523) |
| - | 668,487 | 1,235,983 |
| Deferred income tax | 960,276 | 4,315,695 |
| Income tax expense recognized in profit or loss | <u>\$ 1,628,763</u> | <u>\$ 5,551,678</u> |

b. The reconciliation of accounting income and current income tax expense adjustments were as follows:

| computation of basic EPS | 16,742,073 | 16,742,073 |
| Effect of dilutive potentially common shares: | | |
| Restricted shares | 58,484 | 39,850 |
| Weighted average number of common shares outstanding in | | |
| computation of diluted EPS | 16,800,557 | 16,781,923 |

45. SHARE-BASED PAYMENT ARRANGEMENTS

On November 19, 2021, the board of directors of the Corporation has decided to issue restricted shares for \$1,099,910 thousand in total, and with a par value of \$10 per share, i.e., a total of 109,991 thousand shares at issue price of \$0. Further, the board of directors made December 1, 2021 the record date for the issuance of shares. On May 20, 2022, the board of directors of the Corporation has decided to issue restricted shares for \$11,000 thousand in total, with a par value of \$10 per share, i.e., a total of 1,100 thousand shares at issue price of \$0. Further, the board of directors made June 20, 2022 the record date for the issuance of shares. The fair value of the stock on the grant date is measured by performance indicators.

The vesting portion of shares was measured according to the achievement of the performance indicators, and the vesting rate of the shares is 40%, 30% and 30% in instalments. Employees who have not met the vesting conditions cannot sell, pledge, transfer, donate, ask the Corporation to buy them back or in any other way dispose of these shares except in the case of inheritance. Besides, employees do not have preemptive rights when capital increase but do share the same rights of issued common stock (which includes but are not confined to cash dividends, stock dividends, capital decrease, capital surplus cash (stock) or any rights originated from the legal subject such as consolidation, split or stock-exchange which we called "allocated rights" thereafter). Allocated rights have to be in the trust before meeting the vesting conditions.

After the restricted shares are allocated to employees, the Corporation will retrieve and cancel the stocks with no reimbursement if the vesting conditions are not met. The Corporation will also retrieve the allocated rights at the rate of shares of vesting conditions not met divided by shares allocated, with no reimbursement. If the stocks are retrieved, they shall be cancelled in each year of the vesting period.

For the years ended December 31, 2023 and 2022, the Corporation recognized \$319,201 thousand and \$423,072 thousand as compensation cost.

48. SIGNIFICANT CONTINGENT LIABILITIES AND UNRECOGNIZED CONTRACTUAL COMMITMENTS

Commitments and contingencies of the Group, except for those disclosed in Notes 50 and 52 were summarized as follows:

a. Securities and Futures Investors Protection Center sued Grand Cathay (KGI Securities as the survivor company after merging on June 22, 2013) and claimed that due to the fact that KGI Securities was the lead underwriter of Taiwan Kolin Co., Ltd. 2nd convertible bonds which issued on November 7, 2007, KGI Securities must have but not performed sufficient audits on the contents disclosed in the prospectus of Taiwan Kolin Co., Ltd. 2nd convertible corporate bonds, which against the Article 20 and 32 of Securities and Exchange Act and the Article 184 and 185 of Civil Code. On June 14, 2010, the plaintiffs sued KGI Securities, Taiwan Kolin Co., Ltd., the principal of formerly management team, Moore Stephens and the auditor with jointly liability amounted to \$133,308 thousand plus 5% interest. The Taipei District Court judged that KGI Securities won favorable decisions in the first instance on January 29, 2021. After an appeal by the Securities and Futures Investors Protection Center, the case is currently being heard by the Taiwan High Court.

- b. Plaintiffs, Digital Imaging Solution Global Ltd. ("Digital") and Minda Consulting Ltd. ("Minda"), advocated that GT based on stock pledge generated from loans of HK\$10,000 thousand with Minda and Minda transferred its pledge right on Digital to GT, GT transferred a pledge right of 35,000 thousand shares of Cyber China to Minda in exchange. However, GT and its fund managers, including KGI Limited, disposed the 2,000 thousand shares of eCyberChina without Minda's approval and thus violated the pledge agreement. Therefore, Digital and Minda filed a lawsuit to the GT in November 2007 and requested for compensation of HK\$119,130 thousand and related expenses and interest. In February 2008, Digital and Minda added KGI Limited as a defendant. On July 21, 2008, the appeal was dismissed by courts of Hong Kong and the plaintiffs appealed to a higher court. In December 2008, the courts of appeals dismissed the appeal by Digital while the appeal by Minda is still pending in the courts of appeals.
- c. The case KGI Bank acted vigorously in regard to Prince Motors' overdue debt. In December 2012, a third party filed a lawsuit claiming that the KGI Bank fraudulently infringed upon the property rights of creditors on Dun Nan building. On February 14, 2014, the Taipei District Court adjudicated that the mortgage is cancelled and the KGI Bank has to return the amount of \$1,786,318 thousand. The KGI Bank has appealed against this sentence on March 10, 2014. The original adjudication in favor of the third party was revoked by the court. The third party filed a new appeal, and the Supreme Court ordered the high court to conduct a new trial on November 9, 2018. The High Court issued a judgment on August 17, 2021, upholding the original Taipei District Court's decision to revoke the part of the mortgage, and dismissed the third party's request for the KGI Bank to pay the received money. The KGI Bank and the third party each filed a third-instance appeal for losing part of the lawsuit on September 2021. As of the day which board of directors adopts the consolidation financial report, the case is being heard by the Taiwan Supreme Court.

50. HIERARCHY AND FAIR VALUE INFORMATION OF FINANCIAL INSTRUMENTS

- a. The definitions of each hierarchy are as follows:
 - 1) Level 1 fair values are quoted prices in active markets for financial instruments.
 - 2) Level 2 fair values refer to directly or indirectly observable inputs other than Level 1 quoted prices, such as the quoted prices of similar financial instruments in active markets; in less active markets, fair values are quoted prices of the same or similar financial instruments or financial instruments that can be generated by using pricing models that use inputs such as interest rates and volatility rates, which are derived from or can be corroborated with observable market data.
 - 3) Level 3 refers to inputs that are not based on observable market data.

(%)

b. Fair value

1) The fair value hierarchy of financial instruments were as follows:

December 31, 2023

2) Evaluation technology at fair value

For financial assets and liabilities at fair value through profit or loss and financial assets at fair value through other comprehensive income, fair value is determined at quoted market prices. When market prices of the Group's various financial instruments are not readily available, fair values are estimated by using appropriate valuation models or other banks' transaction prices. The information the Group uses for fair value estimation is consistent with that generally used in the market; the basis of the theory are commonly recognized by the industry. The type of relevant methodology can roughly divided into analytical solution model (for example: Black-Scholes model) and numerical method model (for example Monte Carlo simulation).

- 3) Reconciliation of fair value
 - a) The limitation of valuation techniques and uncertain inputs

Valuation techniques incorporate assumptions are dependent on the instrument type and available market data. However, certain model inputs may be less readily determinable from valuation techniques. In these circumstances, valuation model would adopt additional parameters and/or model assumptions such as model risk or Liquidity Risk and so on, to make fair value adjustment. According to our policies of Valuation management and relevant control procedure, the Corporation's management considers that Valuation adjustments are necessary and appropriate. To accept approaches and principles for the making the appropriate adjustments, all parameters and price information should be evaluated thoroughly and make reference from market situation.

b) Credit risk valuation adjustments

Credit risk valuation adjustments are classified into Credit value adjustments and Debit value adjustments, and definitions are the following:

- The credit value adjustment is an adjustment to the valuation of OTC derivative financial instruments to reflect within fair value the possibility that the counterparty may default and that the Corporation may not receive the full market value of the transactions.
- The debit value adjustment is an adjustment to the valuation of OTC derivative financial instruments to reflect within fair value the possibility that the Group may default, and that the Group may not pay full market value of the transactions.

The Group calculates their debit valuation adjustment on the basis of their international credit assessment and model and international accounting standard of a counterparty's probability of default (PD), which is subject to standard supervisory parameters, take loss given default (LGD) into consideration and multiplied by their estimates of the counterparty's exposure at default (EAD). On the contrary, the Group calculates their credit valuation adjustment on the basis of the Group's PD, which is subject to standard supervisory parameters, take LGD into consideration and multiplied by their estimates of the Group's EAD.

The Group calculates the counterparty's EAD with OTC derivative financial instruments market to market value and the counterparty's LGD, which is 60 percent of EAD based on Taiwan Stock Exchange (TWSE) guidance.

The Group takes Credit risk valuation adjustments for determining the fair value of financial instruments and reflect counterparty's credit risk and the Corporation's credit quality.

4) Transfer between the Level 1 and Level 2

There was no transfer from level one into level two or level two into level one in 2023 and 2022.

5) Reconciliation of Level 3 items of financial instruments

The movements of financial assets with Level 3 fair value were as follows:

For the Year Ended December 31, 2023

(In Thousands of New Taiwan Dollars)

| | | Valuation Gain | Amount o | f Increase | Amount o | f Decrease | |
|-----------------------------|----------------------|--|----------------------|------------------------|---------------------------------|--------------------------|-------------------|

The total gains or losses for the years ended December 31, 2023 and 2022 included a gain of \$2,488,362 thousand and gain of \$1,440,266 thousand relating to assets and liabilities measured at fair value on Level 3 fair value measurement and held at the end of reporting date.

6) Quantitative information about significant unobservable inputs (Level 3)

KGI Bank and subsidiaries

The table below lists quantitative unobservable inputs of Level 3 financial instruments:

| | Fair Value at December 31, 2023 | Valuation Technique(s) | Significant Unobservable Inputs | Range | The Relationship Between Inputs and Fair Value |
|---|---------------------------------------|---|---|--|--|
| Repetitive basis to fair value measurement items | 2020 | | inputs | | |
| Non-derivative financial | | | | | |
| Financial assets at FVTPL | \$ 413,347 | Quoted price of counterparties | Liquidity discount ratios | Beyond estimation | Fair value is inversely proportional to discount for liquidity discount ratios |
| Financial assets at FVTOCI | 923,832 | Market approach | P/B Discount for lack of liquidity | 1.28 27.20% | Multiplier is proportional to fair value; fair value is inversely proportional to |
| | | Net asset method | Discount for lack of liquidity and control | 11% | discount for lack of liquidity. Fair value is inversely proportional to discount for lack of liquidity and control. |
| Derivative financial instruments | | | | | |
| Financial assets at FVTPL | 1,160,254 | Hull White Model, Libor Market Model, BS Model, discounted cash flow/quoted price of counterparties | Mean Reversion, Sigma, Correlation, shift Parameter/ liquidity discount ratios | Adjusted daily based on market information/ beyond estimation | The used evaluation model parameters cannot be obtained directly from market information or inputs of parameters do not conta into linear relation; thus, analyzed by comparing correctness, stability, rationality, efficiency of performance and other different aspects of the outcome. Then the KGI Bank and its subsidiaries select the applicable one according to the analysis; fair value is inversely proportional to discount for liquidity discount ratios |
| Financial liabilities at FVTPL | 1,160,272 | Hull White Model, Libor Market Model, BS Model, discounted cash flow/quoted price of counterparties | Mean Reversion, Sigma, Correlation, shift Parameter/ liquidity discount ratios | Adjusted daily based on market information/ beyond estimation | The used evaluation model parameters cannot be obtained directly from market information or inputs of parameters do not contain linear relation; thus, analyzed by comparing correctness, stability, rationality, efficiency of performance and other different aspects of the outcome. Then the KGI Bank and its subsidiaries select the applicable one according to the analysis; fair value is inversely proportional to discount for liquidity discount ratios |

| | Fair Value at December 31, 2022 | Valuation Technique(s) | Significant Unobservable Inputs | Range | The Relationship Between Inputs and Fair Value |
|---|---------------------------------------|---|---|--|--|
| Repetitive basis to fair value | | | | | |
| Non-derivative financial instruments | | | | | |
| Financial assets at FVTPL | \$ 390,720 | Quoted price of counterparties | Liquidity discount ratios | Beyond estimation | Fair value is inversely proportional to the liquidity discount rate. |
| Financial assets at FVTOCI | 951,062 | Market approach | P/B Discount for lack of liquidity | 1.10 27.20% | Multiplier is proportional to fair value; fair value is inversely proportional to |
| | | Net asset method | Discount for lack of liquidity and control | 11% | discount for lack of liquidity. Fair value is inversely proportional to discount for lack of liquidity and control. |
| Derivative financial instruments | | | | | |
| Financial assets at FVTPL | 936,660 | Hull White Model, Libor Market Model, BS Model, discounted cash flow/quoted price of counterparties | Mean Reversion, Sigma, Correlation, shift Parameter/ liquidity discount ratios | Adjusted daily based on market information/ beyond estimation | The used evaluation model parameters cannot be obtained directly from market information or inputs of parameters do not conta into linear relation; thus, analyzed by comparing correctness, stability, rationality, efficiency of performance and other different aspects of the outcome. Then the KGI Bank and its subsidiaries select the applicable one according to the analysis; fair value is inversely proportional to discount for liquidity discount ratios |
| Financial liabilities at FVTPL | 936,647 | Hull White Model, Libor Market Model, BS Model, discounted cash flow/quoted price of counterparties | Mean Reversion, Sigma, Correlation, shift Parameter/ liquidity discount ratios | Adjusted daily based on market information/ beyond estimation | The used evaluation model parameters cannot be obtained directly from market information or inputs of parameters do not contain linear relation; thus, analyzed by comparing correctness, stability, rationality, efficiency of performance and other different aspects of the outcome. Then the KGI Bank and its subsidiaries select the applicable one according to the analysis; fair value is inversely proportional to discount for liquidity discount ratios |

KGI Securities and subsidiaries

The explanation of quantitative information about significant unobservable inputs in fair value measurement and sensitivity analysis significant unobservable inputs used by repetitive basis to fair value Level 3 financial asset of KGI Securities and subsidiaries were as follows:

December 31, 2023

| | Fair Value | Valuation Techniques | Significant Unobservable Inputs | Quantification Information | The Relationship Between Inputs and Fair Value |
|---|--------------|---|--|-------------------------------|--|
| Financial assets | | | ^ | | |
| Non-derivative financial assets Financial assets at FVTPL - equity instruments | \$ 3,613,204 | Recent strike price. Market approach | Not applicable Discount for lack of liquidity | Not applicable 26%-29% | Not applicable Assets at fair value is inversely proportional to discount for lack of |
| | | Discounted cash flow approach | Discount for lack of liquidity | 29% | liquidity. Assets at fair value is inversely proportional to discount for lack of liquidity. |
| | | | WACC | 7.18% | Assets at fair value is inversely proportional to WACC |
| | | | Growth rate | 5.50% | Assets at fair value is proportional to growth rate |
| | | Asset method | Discount for lack of controlling | 11% | Assets at fair value is inversely proportional to control discount. |
| Financial assets at FVTOCI - equity instruments | 21,077 | Option pricing model | Discount for lack of liquidity | 26% | Assets at fair value is inversely proportional to discount for lack of liquidity. |
| | | | History volatility | 44.51% | According to condition of contract, fair value of asset may be higher or lower. |
| Derivative instruments Financial assets at FVTPL Structured products - options | 310 | Martingale pricing | History | 47.77% | According to condition of |
| Suddared products - options | | technique | volatility | -7.7770 | contract, fair value of assets may be higher or lower. |
| Financial liabilities | | | | | |
| Derivative instruments Financial liabilities at FVTPL Structured products - options | 3,086,977 | Martingale pricing technique | History volatility | 0.00%-16.92% | According to condition of contract, fair value of liabilities may be higher or lower. |

December 31, 2022

| | Fair Value | Valuation Techniques | Significant Unobservable Inputs | Quantification Information | The Relationship Between Inputs and Fair Value |
|---|--------------|----------------------------------|---|-------------------------------|--|
| Financial assets | | | | | |
| Non-derivative financial assets | | | | | |
| Financial assets at FVTPL - equity and debt instruments | \$ 3,019,692 | Recent strike price. | Not applicable | Not applicable | Not applicable |
| -1 | | Market approach | Discount for lack of liquidity | 26%-29% | Assets at fair value is inversely proportional to discount for lack of liquidity. |
| | | Discounted cash flow approach | Discount for lack of liquidity | 29% | Assets at fair value is inversely proportional to discount for lack of liquidity. |
| | | | WACC | 6.53% | Assets at fair value is inversely proportional to WACC |
| | | | Growth rate | 2.95% | Assets at fair value is proportional to growth rate |
| | | Asset method | Discount for right of controlling | 11% | Assets at fair value is inversely proportional to control discount. |
| Financial assets at FVTOCI - equity instruments | 52,097 | Option pricing model | Discount for lack of liquidity | 26% | Assets at fair value is inversely proportional to discount for lack of liquidity. |
| | | | History volatility | 41.82% | According to condition of contract, fair value of asset may be higher or lower. |
| | | Asset method | Discount for lack of liquidity | 15% | Assets at fair value is inversely proportional to discount for lack of liquidity. |
| Derivative instruments Financial assets at FVTPL Structured products - options | 1,422 | Martingale pricing technique | History volatility | 52.83%-54.85% | According to condition of contract, fair value of assets may be higher or lower. |
| Financial liabilities | | | | | |
| Derivative instruments Financial liabilities at FVTPL Structured products - options | 2,939,313 | Martingale pricing technique | History volatility | 0.00%-19.37% | According to condition of contract, fair value of liabilities may be higher or lower. |

History volatility used by Martingale Pricing Technique in KGI Securities depends on moving weighted average method, and sampling period refer to maturity in initial contract; if maturity is less than 6 months, sampling period is between 20 to 180 days; if maturity is between 6 months to 12 months, sampling period is between 20 to 360 days; if maturity is more than 12 months, sampling period is between 20 to initial maturity days.

KGI Securities and subsidiaries adopts pricing model and pricing parameters cautiously, producing reasonable fair value measurement, however, different pricing model or parameters may lead to different outcome. To those financial assets and liabilities categorized into Level 3, effects of current period net income or loss or other comprehensive income affected by changes in pricing parameters were as follows:

KGI SITE

KGI SITE financial instruments that use Level 3 inputs to measure fair value are "financial assets measured at fair value through other comprehensive - equity investments".

The equity investments without an active market that use Level 3 inputs to measure fair value due to the use of significant unobservable inputs. The significant unobservable inputs of the equity investments are independent, therefore, there is no correlation. Quantitative information has not been disclosed since the relationship between significant unobservable inputs and fair value cannot be fully controlled.

| Project | Valuation | Significant | Relationship Between Inputs and |
|--|------------|------------------------------------|--|
| | Techniques | Unobservable Inputs | Fair Value |
| Financial assets at fair value through other comprehensive income - No active market equity instrument investment | Net assets | Lack of market liquidity discounts | When the higher the discount for lack of liquidity, the lower of fair value. |

7) Pricing process of Level 3 fair value

KGI Bank and subsidiaries

KGI Bank's risk management department is responsible for the pricing process of Level 3 fair value. The pricing models and conditions assumed are conform to market practice; the basis of the theory are commonly recognized by the industry as a basis of valuation in conducting measurement of fair value. Further, the department confirms whether the sources of the information are independent or not, reasonably reflecting the prices in normal circumstances, and examines and adjusts fair value periodically to insure results of the valuation is reasonable.

KGI Securities and subsidiaries

When KGI Securities has those derivatives that their fair value are hard to reach or they are categorized as derivative financial assets with no active market, reasonability of fair value of those financial assets are assessed by related department according to the Guidelines of Asset Valuation Operation set by KGI Securities, and the outcomes of the valuation will be recorded in the book by accounting department.

CDIB Capital Group and subsidiaries

The valuation method and parameters adopted by CDIB Capital Group and subsidiaries conform to the general market practice which the theoretical basis is generally identified by the industry. Besides, the department exams and adjusts inputs that pricing model needed periodically to insure outcomes are reasonable.

KGI Life Insurance

KGI Life Insurance is responsible for validating the fair value measurements and ensuring that the results of the valuation are in line with market conditions and the sources are independent, reliable, based on independent and reliable inputs which are consistent with other information, and represent exercisable prices. KGI Life Insurance analyses the movements in the values of assets and liabilities which are required to be re-measured or re-assessed according to KGI Life Insurance's accounting policies at each reporting date.

- c. Fair value of financial instruments not carried at fair value
 - 1) Fair value information

Assets and liabilities measured at cost, excluding debt investments measured at amortized cost and guarantee deposits paid, have carrying amounts that are reasonably close to their fair value; thus, their fair values are not disclosed.

2) The fair value hierarchy of financial instruments were as follows:

December 31, 2023

| | | | (In Tl | housands of N | ew Taiwan Dollars) |
|---|-------------------|-------------------|--------|---------------|--------------------|
| | Level I | Level 2 | | Level 3 | Total |
| Financial assets | | | | | |
| Debt instruments measured at amortized cost | \$ 579,335,610 | \$ 763,810,437 | \$ | - | \$ 1,343,146,047 |
| Non-financial assets | | | | | |
| Guarantee deposits paid - bonds | 110,116 | 6,313,909 | | - | 6,424,025 |
| December 31, 2022 | | | | | |
| | | | (In Tl | housands of N | ew Taiwan Dollars) |
| | Level I | Level 2 | | Level 3 | Total |
| Financial assets | | | | | |
| Debt instruments measured at amortized cost | \$ 528,977,922 | \$ 803,780,274 | \$ | - | \$ 1,332,758,196 |
| Non-financial assets | | | | | |
| Guarantee deposits paid - bonds | - | 7,874,205 | | - | 7,874,205 |

- 3) Measurement technique
 - a) The carrying amounts of financial instruments such as cash and cash equivalents, due from the Central Bank and call loans to financial instruments, securities purchased under resell agreements, receivables, other financial assets, guarantee deposits paid, due to the Central Bank and other banks, securities sold under repurchase agreements, payables, deposits and remittances, bonds payable, other financial liabilities and guarantee deposits received and remittances approximate their fair values because of the short maturities of these instruments.
 - b) The base rate (floating rate) is usually adopted as the loan rate because it can reflect the market rate. Thus, using the carrying amount for considering the probability of repossession and estimating the fair value is reasonable.
 - c) The fair value of debt investments measured at amortized cost is estimated by
 - i. Referring to the quoted price from electronic bond trading system of Taipei Exchange and Bloomberg.
 - ii. Referring to the discounted expected cash flow, of which the discount rate is referenced to interest rates with similar maturity date.
- 4) Reclassification Information

The bond portfolios held by KGI Life Insurance classified as financial asset measured at fair value through other comprehensive income is a business model invested to strengthen the solvency of the liabilities, and must take into account the collection of interest and principal and capital gains. However, under the extremely rare scenario of aggressive interest rate hikes by the central banks in many countries around the world, KGI Life Insurance's management of cash flow from such portfolios has changed from taking into account both the collection of contractual cash flow and capital gains from disposing of assets to receiving contractual cash flow. Not only has the proportion of disposals decreased quarterly, but also the capital gains from disposal decreased significantly. In response to changes in KGI Life Insurance's management and business model of the portfolio, KGI Life Insurance decided to reclassify the financial assets based on the results of external and internal changes on September 30, 2022, and October 1, 2022 was the date of reclassification.

In accordance with IFRS 9, the measurement classification of financial assets is reclassified from fair value through other comprehensive income to financial assets measured at amortized cost. The financial assets shall be reclassified at the fair value on the reclassification date. However, the cumulative gain or loss previously recognized in other comprehensive income is removed from equity and adjusted against the fair value of the financial asset at the reclassification date. As a result, the financial asset is measured at the reclassification date as if it had always been measured at amortized cost. The impact of the aforesaid reclassification on the financial report is that the financial assets measured at fair value through other comprehensive profits and losses decreased by \$128,095,306 thousand, the financial assets measured at amortized cost increased by \$167,607,578 thousand; the deferred income tax assets decreased by \$7,070,854 thousand; and other equity increased by \$32,441,418 thousand.

The fair value of the aforementioned reclassified financial assets that had not been derecognized was \$124,234,556 thousand and \$128,736,451 thousand on December 31, 2023 and 2022.

If the aforementioned financial assets had not been reclassified, the fair value gain of \$3,744,273 thousand (\$3,225,655 thousand after tax) would have been recorded in other comprehensive income from the date of reclassification on December 31, 2022, and the change in the amount of unrealized valuation gain or loss measured at fair value through other comprehensive income would have been an increase of \$3,821,146 thousand (\$3,287,180 thousand after tax).

If the aforementioned financial assets had not been reclassified, the fair value gain of \$2,927,984 thousand (\$2,344,076 thousand after tax) would have been recorded in other comprehensive income from the date of reclassification on December 31, 2023, and the change in the amount of unrealized valuation gain or loss measured at fair value through other comprehensive income would have been an increase of \$2,940,466 thousand (\$2,354,028 thousand after tax).

51. INFORMATION OF INSURANCE CONTRACTS

- a. Objectives, policies, procedures and methods of insurance contracts risk management
 - 1) Framework of risk management, organization structure and responsibilities:

The board of directors should ensure the effectiveness of risk management and bear the ultimate responsibility for risk management, responsible for formulating KGI Life Insurance's overall risk appetite and risk tolerance, review and approve KGI Life Insurance's risk management objectives and strategies. "Risk Management Committee" is set under the board of directors. Various risk management report and related issues are first report to risk management committee and made the final approval by the board of directors. Besides the risk management committee, KGI Life Insurance set up an assets and liabilities risk management team to strengthen the risk management organization and structure.

In addition, KGI Life Insurance establishes the risk management department independent to the business units, which is responsible for the implementation of various risk management measures and the fulfillment of each risk management system, including monitoring the daily risks, measuring and evaluating related issues, assisting the board to develop Company's risk appetite, executing the risk management policies approved by the board of directors. Moreover, the business units should be responsible for the risks identification, report the risk exposure, measure the impact of risks, review the various risks and limits regularly, and make sure that the internal control procedures of each unit are implemented effectively in accordance with related regulations and KGI Life Insurance's risk management policy.

2) Risk management policies, procedures and methods:

According to risk management policies, KGI Life Insurance sets an effective mechanism to proceed identification, measurement, monitoring, reporting and response to risk, establishes clear objectives for risk management, controls approaches and attribution of responsibility to make sure that each operational risk is controlled under the tolerable range, making the largest surplus and profits for shareholders. KGI Life Insurance follows the principle of centralized management and specialization and assigns responsible risk management department to manage various risks based on the sources of risk. In addition, KGI Life Insurance develops management guidelines for various types of risk, standardizes measurement and evaluation methods, and regularly issues risk reports to monitor the various risks.

3) Risk management policies, procedures and methods related to reserves:

Reserve-related risks refer to risks that various reserves are unable to deal with future obligations due to understatement of liability for premium business. KGI Life Insurance sets and implements the appropriate risk management system for the insurance business reserves and related risks.

4) Risk management policies, procedures and methods related to matching assets and liabilities:

Risks related to matching assets and liabilities indicate risks arising from inconsistent movement of assets and liabilities. KGI Life Insurance sets appropriate asset-liability management system based on the attributes and complexity of insurance liability risks. The system allows KGI Life Insurance to form, implement, monitor and correct related strategies within the tolerable range and achieves KGI Life Insurance's predetermined financial goals. The contents include the following items:

- a) Risk identification related to matching of assets and liabilities.
- b) Risk measurement related to matching of assets and liabilities.
- c) Risk responses related to matching of assets and liabilities.
- b. Information of insurance risks
 - 1) Sensitivity of insurance risks insurance contracts and financial instruments with discretionary participation features:

Insurance companies set aside various reserves according to the legal requirements and regularly conduct adequacy test of liability to assess the adequacy of insurance liabilities of KGI Life Insurance as a whole.

For the insurance contracts and financial instruments with discretionary participation features underwritten by KGI Life Insurance, the main risks include mortality, morbidity, surrender, expense and investment returns rate. When doing the liability adequacy test, various actuarial assumptions are made based on available information at assessment point for all insurance contracts and financial instruments with discretionary participation feature, to assess whether the insurance liability of KGI Life Insurance is adequate. If the test result indicates the insurance liability is not adequate, then set aside the insufficient amount as liability adequacy reserve according to the provision. The reserve will affect current profit and loss.

As at December 31, 2023, assuming a 5% change in mortality, morbidity, surrender and expenses, and a decrease in investment return of 0.1%, all insurance contracts and financial instruments with discretionary participation feature will not cause KGI Life Insurance's insurance liability inadequate.

- 2) Interpretation for concentration of insurance risks:
 - a) KGI Life Insurance's insurance business is mainly in Taiwan, Republic of China and there is no significant difference in insurance risk between each region. KGI Life Insurance had set tolerable cumulative risk limits for each risk unit and incident. Insurance risks that exceed the limits will be transferred through reinsurance. Please refer to Note 32 for concentration of risk before and after the reinsurance for KGI Life Insurance.
 - b) Furthermore, according to "Regulations Governing the Setting Aside of Various Reserves by Insurance Enterprises", the annual increased special capital reserve, excluding taxes, for major incidents and fluctuation of risks for abnormal changes in loss ratio and claims of each type of insurance needs to be recognized in special capital reserve under equity in accordance with IAS 12.

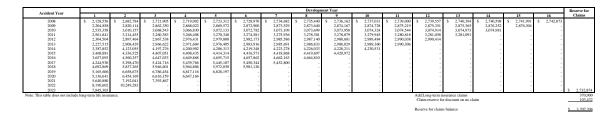

3) Claim development trend:

a) Direct business loss development trend

b) Retained business loss development trend

KGI Life Insurance recognizes claim reserve for reported claims (reported but not paid) and unreported claims (incurred but not reported). Due to uncertainty, estimation, and judgment involved in recognition, there is a high degree of complexity in claim reserves. Any changes of the estimation or judgment are treated as the changes of the accounting estimates and can be recognized as profit and loss in current year. KGI Life Insurance was not notified of some claims in time. Also, the expected payment for unreported claims involves major subjective judgment and estimation on the past experience. Thus, it is uncertain that the estimated claim reserve on the balance sheet date will be equal to the final settled amount of claim payments. The claim reserve recorded on the book is estimated based on the current available information. However, the final amount probably will differ from the original estimates because of the follow-up development of the claim events.

The charts above show the development trend of claim payments (not including cases whose payment and time will be confirmed within a year). The accident year is the actual year for the occurrence of the insurance claim events; the x-axis is the year of the development for the settlement cases. Each slash represents the cumulative amount of compensation for each accident event at the end of the year. The occurred claims include decided and undecided claims which represent the accumulated estimated dollar amounts need to be paid for each accident year as time passes. It is possible that the circumstances and trends affecting dollar amount of recognition for claim reserve in the current year will be different from those in the future. Thus, the expected future payment amount for the settlement cases cannot be determined by the charts above.

4) Credit risk:

For insurance contracts undertaken by KGI Life Insurance, the credit risk comes from reinsurers who fail to fulfill their obligation of reinsurance contracts, causing KGI Life Insurance to be exposed to the risk of financial loss. If KGI Life Insurance disputes with the reinsurers, then it may lead to impairment of reinsurance assets. In addition, the account receivables of insurance brokers and agents also have credit risk.

KGI Life Insurance's highest risk exposure for the reinsurance contracts are the carrying amount of reinsurance assets. In order to manage that risk and avoid credit losses, KGI Life Insurance decides to deal with reinsurance companies that have good credits. KGI Life Insurance sets related selection standard, makes regular assessment and monitors the reinsurers' financial business condition, credit status and rating. Also, it will adjust the business scope and scale based on the circumstances to prevent from over concentration of credit risk.

5) Liquidity risk:

As at December 31, 2023 and 2022, the maturity analysis of liquidity risk for insurance contract liabilities of KGI Life Insurance are as follow:

| | Wi | ithin 1 Year | 1 | to 3 Years | 3 | 3 to 5 Years | 5 | to 15 Years | Over 15 Years |
|---|----|--------------|----|---------------|----|--------------|----|-------------|------------------|
| December 31, 2023 | | | | | | | | | |
| Insurance liabilities of investment contracts with discretionary participation features Reserve for insurance contracts with feature of financial instruments | \$ | 30,139,007 | \$ | 85,667,869 | \$ | 113,631,199 | \$ | 649,337,923 | \$ 4,129,317,824 |
| December 31, 2022 | | | | | | | | | |
| Insurance liabilities of investment contracts with discretionary participation features Reserve for insurance contracts with feature of financial instruments | | 41,692,062 | | - 116,585,911 | | 123,717,709 | | 643,541,839 | 4,047,223,485 |

- Note 1: This table estimates net cash flow of all related insurance liabilities at it starting point.
- Note 2: The actual maturity date will change according to the exercise of termination right by the policyholders.
- Note 3: The table cannot match with the liabilities of balance sheet because the above contracts use the undiscounted contractual cash flow analysis. In addition, it includes the cash inflows of future renewal premiums.

6) Market risk:

Pursuant to the "Regulations Governing the Setting Aside of Various Reserves by Insurance Enterprises", when KGI Life Insurance measures insurance liabilities, it sets aside the reserve by using the discount rate required by the authorities. Since the discount rate assumption does not move in the same direction with the interest rate, changes in market risks have no significant influence on KGI Life Insurance's profit or loss and equity for insurance contracts. However, changes in market risks may have influence on liability adequacy test evaluated based on available information. But, it has little influence on the adequacy of current recognized insurance liabilities.

52. FINANCIAL RISK MANAGEMENT

a. Risk management policies and framework

The Corporation

The Corporation has established its risk management policies, which combine business management and risk management to form a corporate culture and business strategies that place a fundamental importance on risk management. The results of quantified and qualified risk management measures serve as a reference for formulating business strategies. The board of directors has approved the documentation of both overall and specific risk management policies, including business, operational and liquidity risks.

The Corporation has established a risk management committee supervising the implementation of risk management policies, inspecting risk control reports and dealing with related issues. The Corporation also has a risk management department to plan and manage the risk management system, supervise the implementation of risk management of subsidiaries and provide related information to the management and the board of directors.

KGI Bank and subsidiaries

KGI Bank has planned a proper risk management system regarding market risk, credit risk, and operating risk related to the operation of company as a basis of following risk management procedures.

KGI Bank also planned the mechanism of analysis, monitoring, and report related to overall risk management. Further, it reports to senior management, and committee or board of directors with risk management function; KGI Bank keeps related information updated in response to the actual risks encountering significant changes in macroeconomics or financial market to monitor and response effectively.

KGI Bank's risk management not only focuses on individual department but consider the comprehensive effects from an overall corporation perspective.

KGI Bank undertakes risk identification with consistent asset portfolio classification as well as correlation between each other, and establishes a consistent measure according to the different types of exposure.

KGI Bank's risk management divisions are as follows:

1) Board of directors

The KGI Bank's board of director supervise the establishment of risk management structure and culture, ensures efficiency of operation in risk management, reviews important risk control report and bear the ultimate responsibility of risk management.

2) Risk management committee

KGI Bank has established a risk management committee supervising the implementation of risk management policies, inspecting risk control reports and dealing with related issues.

3) Business and management departments

The department is responsible for ensuring compliance of risk management regulations while conducting the operations to practice the control of daily risk.

4) Risk management department

KGI Bank establishes a risk management department which is independent from operating departments to take charge of planning and managing of risk management system and to provide overall risk management information to senior management and the board of directors.

5) Internal audit department

The department takes charge of establishment of all risk mechanisms and audit the compliance and implementation of mechanism.

Risk management is a joint duty to all KGI Bank's department including business, legal, compliance of law, finance, accounting, administration, operating, audit departments and so on, should all practice it actively, and through coordination of intra-departments to carry out the overall risk management.

KGI Securities and subsidiaries

1) Financial risk management objectives

To effectively manage the risks related to the operation of KGI Securities and strengthen KGI Securities Competitive advantage, According to the laws by authorities, risk management policy by parent company, and business development strategy by KGI Securities, which set risk management policy as compliance basis for risk management.

2) Risk management organization

KGI Securities' risk management organization framework, which monitors, plans, and executes related risk management affairs, includes the board of directors, risk management department, business department and other related departments. KGI Securities' business departments and back offices should comply with risk management regulations and reports all anomalies and their effects to Risk Management Committee (RMC) and Investment Review Committee (IRC) in time. Risk management organizations' functions and responsibilities are as follows:

The board of directors is the highest decisive department in KGI Securities, and it also bears ultimate responsibility while monitoring the execution of overall risk management system.

Functions and responsibilities of committees: RMC executes risk management decisions made by the board of directors, which include reviewing KGI Securities' every department's, risk budget, limit and their management system, reviewing guidelines regarding risk management, and inspecting related countermeasures according to risk reports submitted by departments; IRC examines underwriting of securities, assisting of business projects consistent long-term investments; and Merchandise Review Committee (MRC) sets up the reviewing system of KGI Securities' for sale of commodities, trusted investment and management of new business and financial instruments.

Business department is responsible for setting risk management systems, managing and reporting daily risks which belong to its department and executing internal controls effectively which correspond to the government regulations and risk management policies.

Risk management department's functions and responsibilities are ensuring the execution of policies approved by board of directors, making risk management rules and guidelines, controlling the measuring, monitoring and evaluating of daily risk, producing periodic (daily, weekly or monthly) risk management reports and submitting them to management, and developing or assisting the exploitation and maintenance of risk management information system.

Legal affair department's functions and responsibilities are providing comprehensive management of KGI Securities company law, legal consultations, drafting, reviewing and taking custody of major contracts and monitoring litigation and non-litigation cases.

Legal compliance department's functions and responsibilities are conveying laws, providing legal consultation, negotiating and facilitating communications. It is also responsible to make sure that all operations and management guidelines are updated accordingly as related regulations are amended. It also supervises as all units conduct an overview of the feasibility of legal compliance.

Fund dispatching department is responsible for KGI Securities' dispatching and usage of capital, setting up and maintaining finance credits with financial institution, lowering capital costs and managing liquidity risks.

Internal audit department's function and responsibilities are auditing execution of regulations and business operations, proposing amendments in time, and tracing improving progresses after reporting defects and anomalies to the board of directors.

Finance department, settlement department, information department and other related department should understand the risk facing in its industry thoroughly on the basis of risk management related regulations, take necessary risk control measures into consideration while setting up operating management guidelines to assist in completing the whole cooperation's various risk management tasks, and monitor transaction processes regarding valuation, confirmation of price information, preparation of income statement, processing and confirming of transaction, settling, verifying of accounts, asset control, information safety and maintenance of information.

3) Risk management system

KGI Securities has planned proper risk management system regarding market risk, credit risk, operating risk, liquidity risk, legal risk and other risks related to the operation of company as a basis of following risk management procedures.

The risk management policies, various risk management standards and operation of merchandise guidelines are established by competent unit. The competent unit makes a draft and asks the related department for advices and opinions, and it will be conducted following established guidelines and related standards of parent company, CDFH.

4) Risk management mechanism

The process of various risk managements include risk identification, risk measurement, risk monitoring and control and risk reports. The evaluation and strategies of important risk are explained as follows:

a) Market risk

KGI Securities restricts the risk level to which it is exposed to an acceptable level through structuring risk management system, enacting market risk management policies, and formulating merchandise operation guidelines. It also restraint risk through allocating venture capital, subject to management strategies and risk appetite, setting various risk-based limits, and conducting risk monitoring on a daily basis.

KGI Securities implemented the MSCI Risk Manager, a market risk management system, as a quantitative management instrument. The system integrates all holding positions and provides in a daily basis various analyzing metrics and comprehensive computation results, including equity, interest rate, exchange rate, etc., as well as adjustment and application of diverse derivatives models. Also, the risk management department controls risk-based limits by business units on a daily basis to enforce and manage market risk capital allocation.

To establish efficacy of estimation at risk (VaR) model, risk management department conducts Back testing periodically to examine the validity of the model. Additionally, it builds various scenarios for Stress Testing and scenario analysis, to understand the risk tolerance level of KGI Securities.

b) Credit risk

KGI Securities takes into account the credit rating of issuers or counterparties, the features of transactions, and the characters of instruments, etc. to adopt appropriate ways of measurement, and considers KGI Securities' net value, risk measurement and concentration of risk to set proper credit limits. KGI Securities would periodically inspect the credit records of counterparties, holding positions, and collaterals, then report the use of various credit risk limits to management as well as related departments.

KGI Securities use the external part of credit rating by rating comparison table to evaluate the credit risk of the counterparties or transaction subjects. Among them, the external part of credit rating refers to the TCRI of Taiwan Economic Journal, Taiwan Ratings, S&P, Moody's, and Fitch. Not only update the credit rating information of the external rating agency on the counterparties or transaction subjects, but also appropriately adjust the credit risk limits when the credit rating changes.

The risk management department applies for credit risk capital toward the board of directors annually. Establish proper credit risk expected loss limitation amount relating to the firms. Also, set different Pre-Settlement Risk (PSR) limitation amount base on countries, same groups, high-risk industries, high-risk groups, etc. Also, routinely examine KGI Securities' credit risk exposure, credit risk change of counterparties or transaction subjects, and the use of various credit risk limitation amount to enforce management of credit risk.

c) Liquidity risk

The liquidity risk could be divided into two categories: Market liquidity risk and fund liquidity risk. The measurement of market liquidity risk is the trading volume of holding position of KGI Securities and serves as the basis of information disclosure. The fund liquidity risk management has established independent fund transfer unit, considering the timing and net cash flow of need by various departments, to effectively control the fund liquidity risk.

d) Operating risk and other risks

All units conduct operation risk management respectively by their own business. This management contains authorization related to operation risk, process, operation content, plan following the division of front and back desk operation and principle of control and segregation of duties. Operation risk controls include information security and maintenance, clearing, trade confirmation, statements preparation, segregation of duties, relating party trade control as well as the internal control, etc.

Each business unit is responsible for examining and controlling its own operation risk. In addition to the compliance of law and regulation, the internal audit department would implement examination by the regulation and procedure of internal control system to ensure the effectiveness of risk management.

When abnormal events occur, all business units should comply with "Announcement of Abnormal Events and Handling Procedures" by KGI Securities. According to the necessity of the abnormal event, the internal audit unit reports to the director of the board of directors and the internal audit unit of the parent company to effectively manage the operation risk of loss event. When KGI Securities discover material risk events during the execution of their business, they should comply with "Method for Notification of Material Risk Events" by parent company and "Announcement of Abnormal Events and Handling Procedures" by KGI Securities. in addition, risk management unit should review whether material risk events are notified in time.

KGI Securities have obtained the related qualification for the option under the sensitivity analysis (Delta Plus) method to use the advanced calculation method of Securities firm's capital adequacy ratio. In order to calculate the capital adequacy ratio and other statutory ratios required for financial product evaluation models, model management operations have been used.

KGI Securities regularly detects business risks. The detections include financial institutions' capital adequacy, asset quality, management capabilities, profitability, liquidity, sources of profit, foreign exposure, investment positions, off-balance sheet, and material customer complaints. Measurement unit inspects frequency and measures detection indicators and alert values, and sends the measurement results and their increase or decrease data to the risk management unit for monitoring and storage.

5) Risk hedge and mitigation strategy

KGI Securities have set "Financial Commodity Transaction Processing Procedures" and "Operation Guidelines for Derivative Financial Commodity Transactions in Business Locations" to standardize relevant policies for hedging and mitigating risks:

- a) All business departments engaged in derivative transactions should confirm their transaction objectives and hedging nature in advance. After the transaction, the transaction objective cannot be changed at will.
- b) The transaction nature means buying and selling derivatives based on price expectations to take risks and earn the spread. Hedging means to reduce the market risk of existing assets or liabilities and prospective transactions through the trading derivatives.
- c) For positions held for hedging, the hedging and hedged positions should be regarded as one entity, and notice to the relation between the changes in profit and loss of the hedging and the hedged positions.

CDIB Capital Group and subsidiaries

CDIB Capital Group has established its risk management policies, which combine business management and risk management to form a corporate culture and business strategies that place a fundamental importance on risk management. The results of quantified and qualified risk management measures serve as a reference for formulating business strategies. The board of directors has approved the documentation of both overall and specific risk management policies.

CDIB Capital Group has established the risk management committee, which belongs to the board of directors supervising the implementation of risk management policies, inspecting risk control reports and dealing with related issues. CDIB Capital Group also has a business risk committee, which belongs to administration department and a risk management department to plan and manage the risk management system and supervise the implementation of risk management of subsidiaries and provide related information to the management and the board of directors.

KGI Life Insurance

KGI Life Insurance's financial risk management objectives are primarily managing risks arising from holding financial assets. According to KGI Life Insurance's risk management policies, the main financial risks is market risk, credit risk and liquidity risk. KGI Life Insurance has established guidelines related to the management of the financial risk.

b. Credit risk

KGI Bank and subsidiaries

1) Definition and source of credit risk

Credit risk is the risk of financial loss to KGI Bank if a creditor or counterparty fails to meet its contractual obligations or has negative changes in its credit quality. Credit risk management covers all operating activities that involve credit risk, including loans, call loans to banks, banking book securities investment, financial derivatives, repurchase agreement transactions and other operating activities.

2) Credit risk management policy

KGI Bank has standard control procedures for credit risk identification, measurement, and generation of disclosures and reports to be used for a rational identification, measurement, disclosure, and effective control of credit risk. These procedures include applying standard screening criteria for target clients, credit investigations for credit approval or rejection, careful deliberation of applications for certain exceptions, credit review, management of non-performing loans and requests, and control over all related documents and information. KGI Bank also adjusts the credit risk structure accordingly so that credit portfolios are within KGI Bank's risk appetite. Further, KGI Bank assesses the changes in the economy to adjust risk structure and develops strategies in response to these changes to raise shareholders' value and ensure the risk is bearable.

Based on the risk management policies, the management process is carried out as follows:

a) Credit investigation

In screening target clients, KGI Bank asks for all the necessary documents from the clients in order to get an accurate understanding of their backgrounds accurately and control credit portfolios within the acceptable range.

b) Credit approval

Cases that have passed the credit investigation are reviewed by the credit authority at each level.

The credit authorities approve credits in accordance with KGI Bank's credit limit structure and authorization policies. KGI Bank's credit approval structure and policies are based not only on the Banking Act and other government rules for credit extended to the same person or affiliated enterprises/groups, industry, real estate loans, investment securities and country, but also on the professionalism of KGI Bank's credit authorities and the quality of asset control. The amounts of credit authorized are reviewed by the credit authorities occasionally.

c) Post-lending loan review

The corporate banking segment of KGI Bank tracks the borrowers' financial and business conditions, generates risk assessment reports on credit asset portfolios regularly, operates a risk warning system and adjusts business development strategies as needed to cope with economic conditions and changes in asset quality through the use of an account management scheme and a regular-reassessment system. For consumer banking business, they track and control the changes in asset quality through the use of regular-assessment system, and handle the changes in borrowers' credit quality instantly through the use of regular-reassessment system. For delinquent loans, KGI Bank uses the concentration management method, together with information systems and analysis models, to enhance and expedite the collection of non-performing loans.

d) Risk report and information disclosures

The risk management department is responsible for measuring risk, preparing quarterly risk report, including all risk management index and risk capital requirement assessment and reporting to risk management committee and board of directors.

3) Credit risk hedge or mitigation policies

Considering the asset hedge market and liquidity, KGI Bank takes the necessary risk reduction strategies, mainly on credit loan objects and hedge transactions involving assets with doubtful collectability or a long period of duration, including methods for increasing appropriate collateral with good liquidity, or transferring to credit guarantee institutions such as the Small and Medium Enterprise Credit Guarantee Fund of Taiwan to maximize the collateral. For determining the value of foreclosed collaterals, liquid securities will be evaluated at their market value; other collateral will be subject to field surveys by appraisal institution for their fair value assessment, which will be used as a basis for demanding additional collateral or adjusting the credit amount to ensure that risks are within KGI Bank's tolerance range.

If clients are found to have bad credit features, KGI Bank will strengthen the monitoring of the credit of borrower and guarantor and take measures, such as demanding an early repayment or additional collateral in mitigating KGI Bank's credit risk. In addition, KGI Bank sets different credit limits for counterparties involved in derivative transactions and enters into collateral support agreements with counterparties to ensure that risks are under control.

4) Maximum exposure to credit risk

The maximum exposure to credit risk from on-balance sheet financial assets was equal to their carrying values; without taking into collateral or other credit enhancements and unused revolving credit without credit card and cash card, the maximum exposure of credit risk from irrevocable off-balance sheet financial instruments was as follows:

| | Decem | ıber 31 |
|---|---------------|---------------|
| | 2023 | 2022 |
| Irrevocable loan commitments, guarantees and letters of | | |
| credit | \$ 43,737,382 | \$ 42,507,746 |

KGI Bank believes that stringent selection processes and conducting regular review afterwards are the reasons why they can continuously control and minimize the credit risk exposure from their off-balance sheet items. KGI Bank and subsidiaries' book values of maximum exposure credit risk for major credit assets were as follows:

5) Collaterals and credit enhancement

KGI Bank and its subsidiaries' pledged collaterals associated with credit include discounts, loans and receivables which contain real estate, properties (e.g.: Machinery), rights certificates and securities (e.g.: Certificates of deposit, stocks), notes receivable arose from borrowing of business transactions, deposits guaranteed by authorities of treasury department of government, banks or guarantee institutions authorized by government (e.g.: SME credit guarantee fund and letter of credit guaranteed) and mortgages set in accordance with the laws including registration of land rights. Financial assets held by KGI Bank are part of corporate bonds guaranteed by financial institutions as credit enhancement.

KGI Bank and subsidiaries observe collateral's value of financial instrument closely, and consider recognizing impairment for financial assets with credit impairment. KGI Bank and subsidiaries' financial assets with impairment, and collateral's values for mitigation of potential losses were as follows:

The amount of the KGI Bank and subsidiaries' financial assets which has been written off and still has recourse activities of outstanding contract amount is \$1,041,276 thousand and \$530,220 thousand for the years ended December 31, 2023 and 2022.

6) Concentrations of credit risk

Concentrations of credit risk arise when there is only one counterparty, or when there is a number of more than one counterparties but they are engaged in similar economic activities and have similar economic characteristics, so that their collective ability to meet contractual obligations is uniformly affected by changes in economic or other conditions.

Credit risk concentration can arise from a bank's assets, liabilities, or off-balance sheet items through the execution or processing of transactions (either product or service), or through a combination of exposures across these broad categories. It includes credits, due from and call loans to banks, investments, receivables and derivatives, etc. KGI Bank maintained a diversified loan portfolio to mitigate the credit risk concentration to the same customers or the same counterparty; total transaction of the same customers or the same counterparty in discounts and loans are not material. To manage credit risk concentration, KGI Bank maintains a diversified portfolio and monitors its exposure continually. KGI Bank's most significant concentrations of credit risk are summarized as follows:

a) By object

| Object | December 3 | 1, 2023 | December 31, 2022 | | |
|-------------------------------|----------------|---------|-------------------|--------|--|
| Object | Amount | % | Amount | % | |
| Public and private enterprise | \$ 234,684,241 | 58.36 | \$ 241,584,897 | 60.43 | |
| Natural person | 167,453,281 | 41.64 | 157,964,018 | 39.51 | |
| Non-profit organization | - | - | 256,724 | 0.06 | |
| Total | \$ 402,137,522 | 100.00 | \$ 399,805,639 | 100.00 | |

b) By region

| Decion | December 3 | 1, 2023 | December 31, 2022 | | |
|----------|----------------|---------|-------------------|--------|--|
| Region | Amount | % | Amount | % | |
| Domestic | \$ 327,247,935 | 81.38 | \$ 316,427,583 | 79.15 | |
| Overseas | 74,889,587 | 18.62 | 83,378,056 | 20.85 | |
| Total | \$ 402,137,522 | 100.00 | \$ 399,805,639 | 100.00 | |

c) By collateral

| Collateral | December 3 | 1, 2023 | December 31, 2022 | | |
|----------------------|----------------|---------|-------------------|--------|--|
| Collateral | Amount | % | Amount | % | |
| Non-collateral | \$ 209,655,063 | 52.14 | \$ 207,343,404 | 51.86 | |
| Collateral | | | | | |

7) Management of foreclosed collateral

Foreclosed collaterals are recorded at cost, using lower-at-cost or market approach as of the balance sheet date. For those foreclosed collaterals which were not disposed of within the statutory period, except for applying for an extension of the disposal period, if the competent authority ask for the increase of its provision for possible losses, KGI bank should execute as required.

| | Decem | ber 31 |
|---|---------------------------------|---|
| | 2023 | 2022 |
| Foreclosed collateral Accumulated impairment | \$ 588,985 <u>(588,985</u>) | \$ 588,985 (588,985) |
| | <u>\$</u> | <u>\$ </u> |

Foreclosed collateral will be sold when it is actually available for sale. The foreclosed collateral is classified as other assets in balance sheet. The difference amount between the disposition price and the book value is recognized as net other noninterest profit and gain.

9) Judgements of a significant increase in credit risk since initial recognition

Credit business

KGI Bank assesses changes in credit quality during the expected lifetime of various types of credit assets on each reporting date to determine if there has been a significant increase in credit risk since the initial recognition, primarily consideration of indicators and supporting information (including prospective information) were as the follows:

a) Quantitative index

When the contractual payments are overdue for more than 30 days, the credit risk of the credit assets are considered to be significantly increased since the initial recognition.

- b) Qualitative index
 - i. Changes in the current or predicted operating, financial, or economic conditions that are expected to cause a significant change in the ability of the borrower to perform its obligations.
 - ii. Actual or expected significant changes in borrower's operating results.
 - iii. The credit risk of other credit contracts of the same borrower has increased significantly.
 - iv. Individual credit assets, if the client did not suffer from financial difficulties at the time of the agreement can be included after assessment.

For the various types of credit assets of KGI Bank which are not be regarded as low credit risk, it can be assumed that the credit risk of such assets has not increased significantly since the initial recognition.

10) Definition of default and credit impaired financial assets

The definition of default of the financial assets of the KGI Bank is the same as that of the impaired credit assets. If one or more of the following conditions are met, KGI Bank determines that the credit asset has defaulted and the credit is impaired:

- a) Quantitative index
 - i. When the borrower's overdue payment of the contract is more than 90 days.
 - ii. Changes in external rating of guarantor or issuer of the notes or bonds.
- b) Qualitative index

For credit assets, there is evidence that the borrower will be unable to settle the loan, or has significant financial difficulties, such as:

- i. Borrower has been bankrupt or may file a petition for bankruptcy or financial restructuring.
- ii. Borrower's loan contract has been reclassified to nonperforming loans or has been written off as bad debts by the KGI Bank.
- iii. Due to financial or contractual reasons related to the financial difficulties of the borrower, the creditor of the borrower gives the borrower concessions that would not have been considered or agreed (agreements).

- iv. For cases involving the sale of non-performing loans and suits.
- v. Payment by the bank to fulfill off-balance sheet financial contracts (e.g., guarantee advances).

The aforementioned definition of default and credit impairment applied to the credit assets held by KGI Bank is consistent with the definition of credit assets used for internal credit risk management purposes, and the relevant impairment assessment model is used.

The credit asset will be restore to the state of compliance and is not considered a credit impaired credit assets in default if it no longer meets the definition of default and credit impairment.

A debt instrument investor may also be deemed to have a credit impairment on the financial asset if the rating of the bond guarantor or issuer's rating deteriorates significantly, for example, from an investment grade to a junk bond rating, or if one or more of the following conditions are met:

- i. The guarantor or issuer cannot repay the principal or interest on the maturity date of the note or bond.
- ii. Before the maturity of the note or bond, it can be objectively determined that the bond guarantor or issuer of note or bond may not be able to repay the principal and interest of the note or bond on time.
- iii. Before the maturity of the note or bond, the bond guarantor or issuer of note or bond is in bankruptcy or in reorganization or taken over due to financial difficulties.
- iv. Before the maturity of the note or bond, the bond guarantor or issuer of note or bond closes down or is in the process of perform other financial restructuring.

11) Write-off policy

The KGI Bank shall write off bad debts for non-performing loans and overdue receivables that meet one of the following requirements:

- a) When reaching the criteria of write-off of the regulation.
- b) There is a need to expedite the reduction of non-performing loans or for certain businesses that needs to comply with the requirements of the governing authorities.
- c) Written off by the governing authorities or the financial inspection authorities.
- d) Although the collateral has been collected, if it is difficult to dispose of the collateral or it may take a long time to recover the loan, the creditor's balance shall be written of within the period which specified in a).
- e) Obtaining the documentary evidence or supporting documents with the assessments that it is not possible to recover the loan.
- 12) Amendment of contract cash flows of financial assets

KGI Bank may amend the contract cash flows of credit assets as a result of financial difficulties of borrowers, improvement of problematic debtors' recovery rate. The contract amendments include the extension of the contract period, interest payment time modification, contract interest rate modification, or exemption of part of the debts.

13) Measurement of expected credit losses

For the purpose of measuring expected credit losses, KGI Bank divides credit assets into the following groups; for corporate banking, they are grouped according to scale, while for consumer banking, they are grouped according to product characteristics.

| Business | Combination | Definition | | |
|-------------------|--|-------------------------------|--|--|
| | Large enterprises + Stage 1 | Credit risk has not increased | | |
| | Small and medium enterprises + Stage 1 | significantly. | | |
| Cornerate hanking | Large enterprises + Stage 2 | Credit risk has increased | | |
| Corporate banking | Small and medium enterprises + Stage 2 | significantly. | | |
| | Large enterprises + Stage 3 | Cradit impaired | | |
| | Small and medium enterprises + Stage 3 | Credit impaired. | | |
| | Product Stage 1 | Credit risk has not increased | | |
| | Product + Stage 1 | significantly. | | |
| Consumer banking | Product + Stage 2 | Credit risk has increased | | |
| | Flouder + Stage 2 | significantly. | | |
| | Product + Stage 3 | Credit impaired. | | |

KGI Bank measures the allowance loss for financial instruments that did not have a significant increase in credit risk since initial recognition based on the 12-month expected credit loss. For financial instruments that had a significant increase in credit risk or are credit impaired since initial recognition, the allowance loss is measured by lifetime expected credit losses.

To measure the expected credit losses, KGI Bank takes into account the borrower's probability of default ("PD") for the next 12 months and the period of existence, and include the loss given default ("LGD"). Multiply by the Exposure at default ("EAD") and taking into account the impact of the time value of money, the expected credit losses for 12 months and duration are calculated.

Probability of default is the probability of default of the borrower (or the counterparty) over a period of time; the loss given default refers to the probability of loss of the borrower (or the counterparty) due to inability to recover the debt at the end of the reminder procedures. The probability of default and loss given default are used in the impairment assessment of KGI Bank credit business are based on internal historical information (such as credit loss experience, etc.) of each group, and adjust the history data based on the current observable data and forward-looking general economic information (such as GDP and employment rate, etc.) which are used to calculate the probability of default on expected losses.

The exposure at default mean that KGI Bank can claim compensation for the book value held by borrowers (or the counterparty) after borrowers have defaulted. KGI Bank's exposure at default amount has taken into account the amount of credits that have been used and the amounts that may be used in the future for the exposure at default amount. The amount of credits is used as an assessment of exposure at default of on balance sheet credits or part of credits that were already used; off-balance sheet or committed credits that are not yet used are based on the corresponding Credit Conversion Factor (CCF) which considered the credits that are expected to be used within 12 months after the reporting date or expected lifetime to calculate exposure at default of expected credit loss.

14) Considerations of forward-looking information

KGI Bank incorporates forward-looking information when measuring expected credit losses on loans and receivables. Based on the business characteristics, KGI Bank selected the appropriate overall indicators as an adjustment parameter for default probability of lending. Based on the type of business, KGI Bank used different overall indicator. The Corporate banking business takes the Economic Growth Rate (GDP) as an adjustment parameter; the consumer banking business takes employment rate variation as adjustment parameter. KGI Bank will make reference to external information (predicted value of internationally renowned economic forecasting institutions) or group expert assessments to provide forecasting information on economic factors. quarterly. For example, the changes of leading index and interbank offered rate as basic economic conditions; it contains the best estimate of the economic situation in the next five years.

The measurement of expected credit loss of the Bank's debt instruments is based on an external credit migration matrix method to calculate the Probability of default (PD), which is incorporated in the information of forward-looking factors.

KGI Securities and subsidiaries

Credit risk analysis

1) Source of credit risk

The credit risks that KGI Securities and subsidiaries are exposed to during financial transactions include issuer's credit risk, and counterparty credit risk, etc.

- a) Issuer's credit risk refers to the risk of financial loss that KGI Securities and subsidiaries face while possessing financial debt instruments when an issuer (or guarantor) or a bank defaults, files for bankruptcy or liquidates assets and in turn cannot honor the stipulations and fulfill the obligation of paying back (or fulfilling a guarantee).
- b) Counterparty credit risk refers to the risk of financial loss that KGI Securities and subsidiaries face when a counterparty in derivative financial instrument transactions or other counterparties do not complete a transaction or fulfill a payment obligation on the appointed date.
- 2) Credit risk management

The investment, acquisition of fixed-income securities, other financial assets, and credit risk management of current counterparties are handled in accordance with KGI Securities and subsidiaries' internal control procedures and related regulations, and most of them have reached an external credit rating investment grade or above, so credit risk is very low.

- 3) Default and credit derogation definition of financial assets
 - a) The definition of the credit assets default of the KGI Securities and subsidiaries are the same as that of the impaired credit assets. If there is evidence that the issuer or counterparty will be unable to pay, or has significant financial difficulties, such as:
 - i. The issuer or counterparty has been bankrupt or may file a petition for bankruptcy or financial restructuring.
 - ii. The contract of the other financial instrument of the issuer or counterparty has been breached.
 - iii. The active market for the financial asset disappeared due to the financial difficulties of the issuer or counterparty.
 - iv. Purchase or initiate financial assets at a substantial discount that reflects credit losses that have occurred.
 - b) The aforementioned definition of default and credit impairment applies to all financial assets held by KGI Securities and subsidiaries are consistent with the definition of financial assets used for internal credit risk management purposes, and is used in the relevant impairment assessment.
 - c) If a credit asset is assessed to no longer meet the definition of default and credit impairment, it should return to the state of compliance, and is no longer considered a credit asset for default and credit impairment.
 - d) KGI securities and subsidiaries' financial assets are written-off if they are unable to reasonably expect that financial assets will be recovered (e.g., significant financial difficulties for the issuer or the debtor, or bankrupt).

- 4) Credit risk statement for financial assets
 - a) Cash and cash equivalents

KGI Securities and subsidiaries mainly deposit cash such as cash in bank in creditworthy financial institutions and deposit a certain amount of securities in a specific accounts appointed by the futures companies when engaging in future trading. KGI Securities and subsidiaries regularly evaluate the financial, operating and credit risk status of financial institutions and futures companies, and control the credit risk with the results. The evaluated credit risk is under KGI Securities and subsidiaries' control.

b) Financial assets measured at fair value through profit or loss - current

KGI Securities holds the unsecured corporate bonds, convertible (exchangeable) corporate bonds and part of the CB Asset Swap. Issuers of unsecured corporate bonds are listed/OTC companies or financial institutions. Issuers of convertible (exchangeable) corporate bonds are listed/OTC companies in Taiwan and partial of them are secured by bank. In most other holdings, KGI Securities conducts CB asset swap and issues Credit Linked Note to transfer credit risk and lower the credit risk exposure of the issuer. Therefore, the credit risk of the issuer has been effective control.

c) Financial assets measured at fair value through other comprehensive income (excluding equity instrument investments)

KGI Securities and subsidiaries holds mainly the medium and long-term bond investment position. KGI Securities and subsidiaries pays attention to the credit rating of each investment and the financial status of the issuer (or guarantee institution) in order to minimize credit risk.

d) Bonds purchased under resell agreements

The counterparties with bonds purchased under resell agreements are mainly creditworthy financial institutions and companies. Because KGI Securities and subsidiaries holds bonds purchased under resell agreements as collateral, it can effectively reduce underlying exposure the counterparty's credit risk.

e) Receivables

Receivables mainly include margin loans receivable, trading securities receivable, futures commission merchant receivable and accounts receivable, etc. The main credit risk is receivable on margin loans and trading securities receivable of credit trading customers. KGI Securities and subsidiaries closely monitor market fluctuations and counterparties credit history, and enforce related control measures to minimize the credit risk.

f) Customer margin accounts

The exclusive account for depositing customer margin accounts is mainly opened in creditworthy banks, financial institutions and companies with investment grades, so there is no significant credit risk.

g) Stock borrowing collateral price and guarantee deposits - borrowed securities

When KGI Securities borrows securities from outside, they must deposit the guaranty fund into the financial institution designated by the other parties. Because KGI Securities holds the foregoing borrowed securities simultaneously, it can effectively reduce the risk of the counterparty's credit risk. h) Other non-current assets

Other non-current assets are mainly operating guarantee deposits, clearing and settlement funds and guarantee deposits-out. KGI Securities and subsidiaries carefully evaluates the counterparty in accordance with the amount of deposit. The counterparties are a large number and the amount of each deposit is not high. The credit risk has been effectively dispersed, so the credit risk is very low.

5) Assessment of expected credit losses

a) Consideration of forward-looking information

KGI Securities and subsidiaries take forward-looking information into consideration when assessing whether there has been a significant increase in financial assets' credit risk after initial recognition and when measuring of expected credit losses.

Probability of default of debt instrument investment (except for at fair value through profit or loss) used by KGI Securities and subsidiaries is based on the probability of default contained forward-looking general economic information and regularly announced by international credit rating agencies.

Except for debt instrument investments, financial assets of KGI Securities and subsidiaries are analyzed using historical data to determine the economic factors that affect the expected credit losses of each asset portfolios, and supplemented by the best expectation announced by the government-affiliated institutions and academic research units. The best estimate of expected credit losses are reevaluate and revised on each financial reporting date.

b) Receivables and other financial assets

KGI Securities and domestic subsidiaries

KGI Securities and its domestic subsidiaries use simplified approach of IFRS 9 to measure the allowance losses by lifetime expected credit losses. The lifetime expected credit losses are based on historical records, current information, and relevant forward-looking information calculated by a regression model. For the fact that KGI Securities and domestic subsidiaries' historical records of credit losses indicate that there is no significant difference in the loss patterns of different customer groups, it is not measured in groups.

Overseas subsidiaries

The financial assets of overseas subsidiaries whose credit risk do not increase significantly after initial recognition are measured as 12-month expected credit losses. For financial assets whose credit risk has increased significantly after initial recognition, they are measured as lifetime expected credit losses. Customers' past default records, counterparty credit ratings, current information and relevant forward-looking information are take into consideration when assessing expected credit losses. For the fact that there is no significant difference in the loss patterns of different customer groups of overseas subsidiaries, it is not measured in groups.

c) Debt instrument investment (except at fair value through profit or loss)

The original purchase is based on the premise that the credit risk is low, it is assessed whether the credit risk is significantly increased and whether the credit risk is impaired after the initial recognition on each balance sheet date. The three stages are no significant increase in credit risk (Stage 1), low credit risk (Stage 2) and credit impairment (Stage 3). For the determination of significant increase in credit risk since initial recognition, the main indicators to be considered include the external credit rating and its change in grade (from investment grade to non-investment grade or credit rating dropping by more than a certain level compared to the original recognition date), and other market information related to the issuer indicating that its credit risk has increased significantly, etc. For the determination of credit impairment, it refers to default, significant financial difficulties, bankruptcy or financial reorganization of the issuer, or a combination of certain events that may have caused the financial assets to become credit impaired. If the credit risk of a financial asset at the balance sheet date is determined to be low, the allowance for loss is measured at the expected credit loss over 12 months, assuming that the credit risk of the financial asset has not increased significantly since initial recognition, and for financial assets that have increased significantly since initial recognition or are impaired, the allowance for loss is measured at the expected credit loss over the remaining period.

In order to measure expected credit losses, KGI Securities and subsidiaries consider the probability of default (PD) of financial assets or the issuer or counterparty for the next 12 months and lifetime, which collectively consider the loss given default (LGD), and is multiplied by exposure at default (EAD). KGI Securities assess financial assets measured at amortized cost with exposure at default and consider the impact of time value of money to calculate the expected credit losses for 12 months and lifetime, respectively.

Probability of default is the probability that the issuer or the counterparty will default, and loss rate given default is the rate of loss caused by default by the issuer or counterparty. The probability of default and loss given default used by KGI Securities and subsidiaries in related assessment of impairment are mainly relied on the probability of default and loss given default that are regularly announced by international credit rating agencies.

6) The estimation techniques or material assumptions used by KGI Securities and subsidiaries to assess expected credit losses did not change significantly for the years ended December 31, 2023 and 2022.

Disclosure of total book value and allowance loss for financial assets' expected credit loss

1) Summary of KGI Securities and subsidiaries' total book value and allowance loss as of December 31, 2023 and 2022 are listed as follows:

Financial assets at fair value through other comprehensive income

Total book value for financial assets at debt instruments at fair value through other comprehensive income as of December 31, 2023 and 2022 were \$45,542,812 thousand and \$45,927,185 thousand, respectively, and allowance were \$21,091 thousand and \$20,697 thousand, respectively.

The aforementioned total book value of receivables and others were influenced by the impact of securities market transactions.

CDIB Capital Group and subsidiaries

CDIB Capital Group and subsidiaries are exposed to credit risk due to default on contracts by counterparties. As of the balance sheet date, CDIB Capital Group and subsidiaries' maximum exposure to credit risk due to the counterparties' default on obligations is equal to the book value.

The maximum exposure to credit risk held by CDIB Capital Group and subsidiaries of the financial instruments is equal to the book value.

KGI Life Insurance

- Credit risk analysis
 - 1) Credit risk refers to the counterparties fail to fulfill obligations of contract, resulting in the risk of loss of value. Credit risks of KGI Life Insurance result from operating and financing activities, which mainly include lending, investing in financial instruments and receivables.

The departments of KGI Life Insurance follow credit risk policies, procedures and controls to manage credit risks. The credit risk assessment of all issuers or counterparties is based on comprehensive consideration of their financial status, credit ratings, historical transaction records, current economic environment, KGI Life Insurance's internal rating indicators, and etc. Also, KGI Life Insurance uses certain credit enhancement tools in due course to reduce the credit risk of a particular issuer or counterparty.

For investments of financial instruments, its original purchase is based on the premise that the credit risk is low, and on each balance sheet date, it is assessed whether the conditions of low credit risk are still met to determine the method of measuring the allowance. Also, KGI Life Insurance dispose those investments to reduce credit losses in appropriate time, such as there is a significant increase in credit risk. In addition, KGI Life Insurance has established credit VaR model to assess the maximum loss of the credit positions due to changes of credit rating or default of issuer. Besides, KGI Life Insurance also evaluates concentration risk based on issuer's region, industry and credit rating within portfolios.

Lending of KGI Life Insurance is determined by the factors that affect the risk based on the 5P principle which gives different weights according to the impact of the risk so as to calculate the credit score of each borrower. The credit score comprehensively measures the rationality of the purpose of the loan, the collateral area, value and number, the customer's credit report, historical interest payment record, financial status, debt repayment ability, and etc. Once a delay occurs, it is promptly collected in accordance with the procedures to avoid financial losses.

KGI Life Insurance assesses expected credit losses in accordance with IFRS 9, except for some of receivables, which allowance are measured by lifetime expected credit losses. The original purchase of the rest, which do not belong to debt instruments measured at fair value through profit or loss, is based on the premise of low credit risk and uses credit risk as the basis of the differentiation group. On each balance sheet date, assessing whether the credit risk is significantly increased after the initial recognition to determine the method of measuring the allowance loss. The main considerations for determining whether the credit risk has increased significantly include objective evidence such as the external credit rating and its degree of change, other market information related to the issuer which shows that its credit risk has increased significantly, etc. For the judgment of credit impairment, it refers to the default of contract, the overdue payment of interest or principal for holding debt instruments for more than 90 days, the happening of major financial difficulties, bankruptcy or financial reorganization of the issuer, or the combined effect of certain events that may have caused financial assets to become credit impaired. If the credit risk of a financial asset at the balance sheet date is low, it is assumed that the credit risk of the financial asset has not increased significantly since the initial recognition and the allowance loss is measured at the 12-month expected credit loss amount; For financial assets with a significant increase in credit risk or credit impairment since initial recognition and the allowance loss is measured at the amount of expected credit loss during the lifetime.

Expected credit losses will be measured by the probability of default (PD) of the issuer or the counterparty over the next 12 months and the lifetime, multiplied by the loss given default (LGD) and the exposure at default (EAD), and is considered by the impact of the time value of money. The expected credit losses for 12 months and duration is calculated, respectively.

Probability of default is the probability that the issuer or the counterparty will default, and the loss given default is the rate of loss caused by default by the issuer or counterparty. KGI Life Insurance employs information on the default probability and default loss rate published by external credit rating agencies and adjusts it based on forward-looking general economic information or market conditions.

KGI Life Insurance employs amortized cost of financial assets plus accrued interest and receivables as a measure of exposure at default, while loans are calculated as the sum of the principal balance of the debtor at the time of calculation, interest, and payable as a measure of exposure at default.

Some of the allowance losses of part of receivables are measured by its expected credit losses for its lifetime. The expected credit losses during the existence period is considered by the past default records and current information, and the expected credit loss rate is set based on the overdue days of receivables.

- 2) Financial assets credit risk concentration analysis
 - a) The largest credit risk exposure of the financial debt instrument investments held by KGI Life Insurance or deposit in the bank is listed in accordance with the regional distribution as follows:

December 31, 2023

| Financial Assets | | Taiwan | | Asia | | Europe | | America | Global | | Total |

c. Liquidity risk

KGI Bank and subsidiaries

1) The source and definition of liquidity risk

Liquidity risk of KGI Bank refers to the risks of bearing profit or capital loss because of the inability to obtain funds with reasonable price to meet the financial obligation with a reasonable time, such as early termination of deposits, deteriorating of the source and condition of financing from banks influenced by specific market, abnormal recover of funds due to default from borrowers, inability to liquidate financial instruments and early exertion of rights of rescission of interest sensitive product by the assured. The aforementioned situation may reduce cash source of loan, transactions and investment. In some extreme cases, the lack of liquidity may result in a decrease in the overall position of the balance sheet, sale of assets and failure to perform loan commitments.

2) Management policy of liquidity risk

KGI Bank's liquidity risk management uses gap limit management strategy, which is the net cumulative mismatch of inflows and outflows, and calculates the maximum cumulative cash outflow (MCO) to monitor the daily funding gap by each currency as a basis for controlling the liquidity risk. For Liquidity gap management, KGI Bank also actively deconcentrates funding sources, distributes the fund maturity date based on the gap report, disperses the call loans (lending) from counterparties and increases the renewal rate of enterprises' deposits to enhance the stability of the resources of funds.

- 3) Maturity analysis of financial assets and non-derivative financial liabilities held for liquidity risk management
 - a) Financial assets held for liquidity management

The KGI Bank holds cash and highly liquid and high-grade profit-generating assets to pay off obligations and meet any potential emergency funding needs in the market environment. The assets held for liquidity management include cash and cash equivalents, due from the Central Bank and call loans to banks, financial assets at fair value through profit or loss, financial assets at fair value through other comprehensive income, securities purchased under resell agreement, accounts receivable, and discounts and loans, etc.

b) Maturity analysis of non-derivative financial liabilities

The following tables show the cash outflows on the KGI Bank's non-derivative financial liabilities based on the remaining period from the balance sheet date to the maturity date of the contract. However, because the amounts disclosed were based on contractual cash flows, some of them will not match the amounts shown in the balance sheets.

KGI Securities has established statement of capital liquidation gap to estimate how all financial assets and liabilities in future cash flows can affect KGI Securities and subsidiaries when it comes to fund dispatching. Cash flow gap statement from December 31, 2023 and 2022, show that the sums from deducting cash outflow from cash inflow are \$44,474,570 thousand and \$38,284,976 thousand, respectively, all indicating sufficient fund liquidity.

Although an analysis of funds gap shows that the cash outflow during partial periods. Net cash inflow calculated from net spot financial assets are sufficient to cover the net cash outflows generated from subsequent periods, an indicator of sufficient fund liquidity.

2) Control mechanism of capital liquidity risk

The independent fund-dispatching department established by KGI Securities takes into consideration the needs of net cash flow and their timings from various departments and predicts future cash flows based on the requests submitted by departments with a need for funds. The department has also established a simulation analysis mechanism for capital flows after considering short-term capital dispatching in Taiwan as well as international or cross-market transactions in order to better predict futures needs of funds and set up contingency measures.

KGI Securities also offers suggestions over a secure amount of reserve fund and reports it to the RMC. The department reviews the standard amount of reserve capital and will take the following action if available capitals are below 120% of the safe reserve amount:

- a) Except all due payments and those whose use of capital cannot be restricted due to the nature of their business, all the requests for capitals from all business departments need to be approved by the fund-dispatching department in order to maintain a safe amount of reserve capital.
- b) Fund-dispatching department will propose contingency measures to the RMC, which includes disposal of low yield or unnecessary assets, expanding repurchase agreements with the Central Bank of Taiwan, financing from securities finance corporations or exploring other fund-raising methods that will increase available funds to KGI Securities.

CDIB Capital Group and subsidiaries

The management of liquidity risk is aimed to deal with financing CDIB Capital Group's operations and mitigate the effects of fluctuations in cash flows by monitoring and maintaining a level of cash and cash equivalents. The management of CDIB Capital Group and its subsidiaries supervise the use of bank financing lines and ensure compliance with the terms of the loan contracts.

Bank borrowings is an important source of liquidity for CDIB Capital and its subsidiaries. For the unused financing amount of CDIB Capital and its subsidiaries, please refer to the table below:

| | Decem | ber 31 | |
|--------------------------------|----------------------------|----------------------------|--|
| Bank Financing | 2023 | 2022 | |
| Unsecured bank overdraft | ¢ 4.245.040 | ф. <u>а о 10 до</u> р | |
| Used amounts Unused amounts | \$ 4,345,948 15,347,377 | \$ 3,940,762 13,368,538 | |
| | | | |
| | <u>\$ 19,693,325</u> | <u>\$ 17,309,300</u> | |

CDIB Capital Group's Management policies of liquidity risk are as follows:

- 1) Disposal of capital surplus should consider possible future capital requirements, diversification of capital sources and reasonable liquidity of liability structure.
- 2) Pursuant to liquidity risk control, CDIB Capital Group uses performance index of financial structure and dispatching of funds to set up a system to monitor daily funding gap.

As of December 31, 2023 and 2022, CDIB Capital Group's other financial liabilities are \$0 thousand, and the rest of non-derivative financial liabilities are \$7,301,161 thousand and \$6,366,195 thousand, respectively, and are mainly current liabilities.

KGI Life Insurance

1) Liquidity risks are classified to "funding liquidity risk" and "market liquidity risk." "Funding liquidity risk" represents that KGI Life Insurance is not able to obtain sufficient funds at a reasonable funding cost to meet the demands within reasonable time. "Market liquidity risk" represents the risk that KGI Life Insurance sells at loss to meet the demand for cash.

KGI Life Insurance assesses the characteristics of business, monitors short-term cash flows, and constructs the completed mechanism of liquidity risk management. Furthermore, KGI Life Insurance manages market liquidity risk cautiously by considering market trading volumes and adequacy of holding positions with symmetric. To decentralize market risk when investment and to maintain investment each aspect (such as asset category, maturity, region, currency and tools) diversification. Planning emergency financing plan in order to assess how KGI Life Insurance in the long term illiquid environment still regularly operate to pay emergency and major funding requirements.

KGI Life Insurance regularly monitors market liquidity and formulates plans to use the funds depending on market conditions and funding demand arrangements for liquidity assets portfolio. To deal with possible liquidity risk early, KGI Life Insurance reports duration of assets and liabilities quarterly, creates cash flow model and reviews cash flow status regularly.

- 2) Financial assets held for managing liquidity risk and maturity analysis of non-derivative financial liabilities
 - a) Financial assets held for managing liquidity risk

KGI Life Insurance holds cash, highly liquid and superior assets to deal with payment obligation and the potential urgent funds needs to dispatch in the market environment. Financial assets for managing liquidity risk are cash and cash equivalents, financial assets at fair value through profit or loss, financial assets at fair value through other comprehensive income, financial assets at amortized cost, etc.

b) Maturity analysis of non-derivative financial liabilities

The analysis of cash outflows to KGI Life Insurance is listed below and based on the residual term from the date of balance sheet to the maturity. The disclosed amount is in accordance with cash flows on contracts, so the partial disclosed items are not the same as related items in the balance sheet.

Non-derivative financial instruments

| | December 31, 2023 | | | | | | | |
|--|-------------------------------|----|------------------------|-----------|-------------------------|----|---------------------------------------|--|
| | In 1 Year | 1 | -5 Years | Over | 5 Years | | Total | |
| Payables Bonds payable Lease liabilities | \$ 14,285,297 - 147,991 | \$ | 20,903 - 396,225 | , | - 000,000 627,254 | \$ | 14,306,200 20,000,000 4,171,470 | |

| | In 1 Year | 1. | -5 Years | Over | 5 Years | | Total | |
| Payables Bonds payable Lease liabilities | \$ 12,076,846 - 153,814 | \$ | 75,836 - 457,752 | , | - 000,000 610,180 | \$ | 12,152,682 10,000,000 4,221,746 | |

c) Maturity analysis of derivative financial liabilities

KGI Life Insurance operates derivatives including foreign exchange derivative instruments (such as currency forward contracts, foreign exchange forward).

KGI Life Insurance has enough operating capital, including cash and cash equivalents, and highly liquid securities, such as government bonds to pay the investment and liabilities at maturity. Therefore, the risk of liquidity is extremely low. KGI Life Insurance enters into forward contracts and cross currency swaps derivative financial instruments, whose currencies are highly liquid, so the possibility of selling out and the risk of market liquidity are low. The forward contracts and cross currency swaps will be operated continually and the capital is enough to pay for settlement, so the risk of capital liquidity is low.

KGI Life Insurance's maturity structure of derivative financial liabilities is as follows:

| | | | December 31, 2023 | | |
|--|---------------------|-------------------|---------------------|-------------|---------------------|
| | In 90 Days | 91-180 Days | 181 Days- 1 Year | Over 1 Year | Total |
| Financial liabilities at fair value through profit or loss | <u>\$ 5,424,429</u> | <u>\$ 141,855</u> | <u>\$ 45,853</u> | <u>\$</u> | <u>\$ 5,612,137</u> |

| Financial liabilities at fair value through profit or loss | <u>\$ 7,260,162</u> | <u>\$ 615,985</u> | <u>\$</u> | <u>\$</u> | <u>\$ 7,876,147</u> |

d. Market risk

KGI Bank and subsidiaries

1) Source and definition of market risk

Market risk is defined as an unfavorable change in macroeconomic and financial market variables, (such as interest rates, exchange rates, stock prices and commodity prices) which may cause a potential loss on balance sheet and off-balance sheet items.

2) Risk management policies

In order to have a common language of market risk management, definition, communication and measurement, then comply with the requirements of the governing authorities, KGI Bank has developed "Market Risk Management Standard" based on Regulations Governing the Capital Adequacy Ratio of Banks (the CAR Regulations) related market risk calculation tables announced by the FSC, international standards, and CDFH's market risk management policy framework.

The "Market Risk Policy" is applicable to "Trading Book" positions defined by the Regulations Governing the Capital Adequacy Ratio of the KGI Bank related market risk calculation tables and the KGI Bank's book management approach to financial instrument handling.

Following the "Market Risk Policy", the KGI Bank sets up the "Market Risk Management Procedure to Trading Activities" to manage market risk throughout the Firm. This procedure includes risk identification and assessment, risk measurement, risk monitoring and response, risk reporting and contingency management processes.

3) The procedure of market risk measuring, monitoring, and reporting

The KGI Bank's market risk limits include position sensitivities, stop-loss limits, Value-at-Risk (VaR).

Risk factors analyzed through the KGI Bank's risk measurement systems are sufficient to determine all market risks of trading positions on balance sheet, including interest rates risk, foreign exchange risk, equity risk and commodity risk, as well as volatility risks which arise out of the option transactions.

The KGI Bank's market risk report includes profit or loss on trading positions, limits usage, stress testing, trading portfolio risk assessment, as well as significant exception if any.

The risk management unit of the KGI Bank independently performs daily market risk limit controls, and monthly reports to both the Risk Management Committee and Risk Management Committee of parent company, CDFH. Besides, the above reports are regularly presented to the Board for reference.

4) Mitigation of risks or hedging of market risk

The KGI Bank's market risk positions or hedging positions are marked to market on a daily base through techniques such as model evaluation. All market parameters are updated at least daily in accordance with changes in market conditions to conduct value assessment of products. Market Risk Limits are reviewed and controlled based on the revaluation results of traders' position risk value, position sensitivity and profit and loss figure on the daily basis.

5) Valuation techniques of market risk

The KGI Bank uses the VaR model and stress testing to evaluate the potential and extreme risk of trading portfolios. Through variations of the assumptions on market conditions, these techniques can be used to assess the market risk of positions held and the maximum expected loss.

VaR is calculated using a one-day time horizon with a 95% confidence level.

| | | the Year En cember 31, 20 | | For the Year Ended December 31, 2022 | | | |
|--------------------|-----------|------------------------------|----------|---|-----------|----------|--|
| | Average | Highest Lowest | | Average | Highest | Lowest | |
| Interest rate risk | \$ 13,066 | \$ 41,141 | \$ 6,565 | \$ 46,303 | \$ 99,773 | \$ 8,226 | |
| Equity risk | 4,816 | 14,619 | 155 | 7,427 | 31,542 | - | |
| Exchange rate risk | 17,665 | 29,632 | 6,664 | 18,708 | 36,355 | 5,344 | |

(In Thousands of New Taiwan Dollars)

6) Interest rate risk in banking book

The scope of interest rate risk in banking book includes interest rate sensitivity of assets and liabilities, but do not include risk management of trading book. Interest rate risk in banking book measures the adverse effects on net interest income of assets, liabilities and off-balance sheet as a result of adverse fluctuations in interest. Risk assessment not only builds the sensitivity gap between assets and liabilities, but also quantifies through the dimension of retained earnings and economic value perspectives.

7) Interest rate risk management of the banking book

The interest rate risk management strategy involving the Bank's banking book is to minimize the negative impact of changes in interest rates on net interest income and the net economic value of equity. The asset-liability management committee (ALMCO) approves the annual banking book interest rate risk limits and monitors the Bank's interest rate risk exposures every day. The interest rate risk management processes involving the banking book include risk identification, risk measurement, risk control, risk monitor and others. The unit monitoring the banking book interest rate risk reports interest rate risk exposures regularly to ALMCO and adjust the structure of assets and liabilities according to the report, lowering the amount of exposure. For risk monitoring, the asset and liability management system outputs an analysis report, which is provided to the interest rate risk execution unit and top management. If risk missing or excess of limit occurred from monitor, written notices will be passed to interest rate risk implementation units to adjust and improve the program reported to ALMCO.

8) The effect of interest rate benchmark reform

KGI Bank is exposed to USD LIBOR which is subject to interest rate benchmark reform. The exposures arise on derivatives and non-derivative financial assets and liabilities. SOFR (Secured Overnight Financing Rate) is expected to replace USD LIBOR. There are key differences between USD LIBOR and SOFR. USD LIBOR is "forward looking", which implies market expectation over future interest rates, and includes a credit spread over the risk-free rate. SOFR is currently a "backward-looking" rate, based on interest rates from actual transactions, and excludes a credit spread. To transition existing contracts and agreements that reference USD LIBOR to SOFR, adjustments for these differences might need to be applied to SOFR to enable the two benchmark rates to be economically equivalent.

KGI Bank has established a LIBOR conversion task force, is responsible for promoting cross-departmental conversion work, drafting conversion plans and time schedule planning, conducting impact assessments. This task force also focuses on product conversion business strategy adjustments, customer communication, system, operating process changes, evaluation, risk models, financial reports and tax implications. This task force reports to the Risk Management Committee and the Board of Directors on the implementation situation quarterly. KGI Bank has completed all the aforementioned assessments and conversion work, which the financial instruments subject to interest rate benchmark reform have been quoted using other benchmark interest rate.

9) Concentration of currency risk information

The financial assets and liabilities denominated in foreign currency and with material influence on KGI Bank and subsidiaries were as follows:

KGI Securities and subsidiaries

Market risk is the risk of potential loss or change in valuation for securities or financial products that KGI Securities and subsidiaries hold due to the fluctuations of the market risk factors. Such factors include interest rates (including credit spread) and risk of equity securities and exchange rates and commodity risk.

KGI Securities and subsidiaries utilize risk factor sensitivity and value at risk to measure and contain market risks. KGI Securities and subsidiaries also holds regular stress test to help the management understand the estimated influence on the income of investment portfolio under potential extreme events or circumstances.

1) Risk factor sensitivity

Using product identification and analysis procedure held by KGI Securities, the corresponding market risk factor can be determined. Individual risk factor's entire exposure can be measured by observing how the value of a financial instrument changes as each risk factor changes. KGI Securities and subsidiaries monitor the following risk factor sensitivities:

- a) Interest rate risk sensitivity: Measured by the change of present value of future cash flows of the measured holding with each yield curve or credit spread moved 0.01% horizontally.
- b) Equity securities risk sensitivity: Measured by the change of the value of investment portfolio with the price of the underlying assets linked to the equity securities (as the potential loss amount given that the TAIEX and stock of respective companies drop 1%), which could divided into two types by distribution of financial instrument:
 - i. Equity delta: Measured by the change of present value of stock with the price of the underlying assets linked to the equity securities. (As the potential loss amount given that the TAIEX and stock of respective companies drop 1%).
 - ii. Debt delta: Measured by the change of present value of bond with the price of the underlying assets linked to the debt securities. (As the potential loss amount given that the beneficiary certificates and funds, included preferred stocks and bond ETF drop 1%).
- c) Exchange rate risk sensitivity: Measured by the change of present values of corresponding holdings of currencies with exchange rate for each currency (as the potential loss amount given that the foreign currencies depreciate 1% against NTD).
- d) Commodity risk sensitivity: Measured by the change of present values of corresponding holdings of currencies with commodity for each currency (as the potential loss amount given that commodity currencies depreciate 1% against NTD).

The risk sensitivities in the portfolio held by KGI Securities and subsidiaries are as follows:

Comparisons of Risk Sensitive Factors

| Risk Sensitivity | December 3 2023 | 31, December 31, 2022 |
|------------------------|--------------------|--------------------------|
| Interest rate risk | \$ 6,64 | 41 \$ 1,861 |
| Equity securities risk | | |
| Equity delta | 5,479,50 | 05 4,433,631 |
| Debt delta | (832,97 | 6,245 |
| Exchange rate risk | 1,073,70 | 2,948,548 |
| Commodity risk | (3,09 | 91) 5,969 |

(In Thousands of New Taiwan Dollars)

2) Value at risk

Value at risk ("VAR") is a statistical measurement used to measure the maximum potential loss of a portfolio in a certain future time horizon and confidence level. KGI Securities and subsidiaries uses parametric in estimating a value at risk at 99% of confidence interval at duration of 1 day. This means that among 100 trading days, 1 trading day might see the loss of the positions exceeding the value at risk estimated the day before. KGI Securities and subsidiaries continue to conduct backtesting daily to ensure the effectiveness of the estimations made by the risk value model.

The comparison of risk value in the trading portfolio held by KGI Securities and subsidiaries were as follows:

| | For the Yo | ear Ended Decemb | oer 31, 2023 | December 31, 2023 |
|------------------------------------|-----------------------|---------------------|-----------------------|-----------------------|
| | Average VAR | Minimum VAR | Maximum VAR | Ending VAR |
| Equity securities Interest rate | \$ 132,248 128,317 | \$ 76,283 27,672 | \$ 229,011 249,078 | \$ 119,611 140,214 |
| Exchange rate Commodity | 46,537 18,132 | 23,531 150 | 82,253 39,766 | 71,205 |
| - | | | | December 31, |
| | For the Ye | ear Ended Decemb | oer 31, 2022 | 2022 |
| | Average VAR | Minimum VAR | Maximum VAR | Ending VAR |
| Equity securities | \$ 176,834 | \$ 92,083 | \$ 355,679 | \$ 179,623 |
| Interest rate | 181,662 | 109,009 | 247,993 | 166,268 |
| Exchange rate | 79,785 | 40,482 | 126,400 | 85,877 |

3) Stress test

Commodity

Stress test is one of the tools for risk management. It mainly evaluates the effects extreme changes in market risk factors in an investment portfolio to help KGI Securities' board of directors and management understand how potential extreme incidents can affect the market risk sensitivity and the profit/loss of an investment portfolio.

141

15,100

1,184

The main methods of stress test are historic analysis and hypothetical scenarios analysis. The results will be regularly reported to the risk management committee and the board of directors of KGI Securities.

3,893

4) The financial assets and liabilities denominated in foreign currency and with material influence on KGI Securities and subsidiaries were as follows:

(In Thousands of Foreign Currencies/New Taiwan Dollars)

CDIB Capital Group and subsidiaries

Market risk is defined as an unfavorable change in financial market variables, (such as interest rates, exchange rates, stock prices and commodity prices) which may cause a potential loss on financial assets held for trading. Market risk as explained as follows:

1) Exchange rate risk

The financial assets and liabilities denominated in foreign currency and with material influence on CDIB Capital Group and subsidiaries were as follows:

| | December 31, 2023 | | | | | |

Sensitivity analysis

The following table details CDIB Capital Group and subsidiaries' sensitivity to a 1% increase and decrease in New Taiwan dollars (the functional currency) against the relevant foreign currencies. The sensitivity analysis included only outstanding foreign currency denominated monetary items, and adjusts their translation at the end of the reporting period for a 1% change in foreign currency rates. A positive number below indicates a decrease (increase) in pre-tax profit (loss) associated with the New Taiwan dollar strengthening 1% against the relevant currency. For a 1% weakening of the New Taiwan dollar against the relevant currency, there would be an equal and opposite impact on pre-tax profit (loss), and the balances below would be negative.

| | A | Impact on Profit or Loss For the Year Ended December 31 | | |
|----------------|-----------------|--|--|--|
| | For the Year En | | | |
| | 2023 | 2022 | | |
| Monetary items | | | | |
| USD | \$ 69,210 | \$ 32,806 | | |
| CNY | 13,292 | 13,024 | | |
| KRW | 5,277 | 5,413 | | |
| AUD | 2,194 | - | | |

2) Interest rate risk

The primary financial assets of CDIB Capital Group and subsidiaries with exposure to interest rates as of December 31, 2023 and 2022 were cash in banks. Management believes that interest rate changes would have been no significant effect on CDIB Capital Group and subsidiaries.

3) Other price risk

CDIB Capital Group and subsidiaries were exposed to equity price risk through its investments in principal investment business. CDIB Capital Group manages this exposure by setting risk acceptance limitation concerning industry, country, affiliated groups, and the same group.

If equity prices had been 1% higher/lower, the post-tax income for the years ended December 31, 2023 and 2022 would increase/decrease by \$171,110 thousand and \$154,079 thousand, respectively as a result of the changes in fair value of financial assets at fair value through profit or loss.

KGI Life Insurance

1) Market risk analysis

Market risk refers to financial assets and liabilities due to market risk factors volatility, making the change of the value to cause the risk of loss.

KGI Life Insurance has built value at risk (VaR) model. All financial assets involve market risks regularly monitor by risk management system and calculate the VaR. Risk control indices are notional amount and VaR. It will issue risk management reports and execute routine control and process when over limit. We also report VaR, the use of risk limits and the results of backtesting regularly to the board of directors or risk management committee.

2) Exchange rate risk

KGI Life Insurance's exchange rate risk is primarily related to foreign currency assets and foreign currency liabilities in its accounts. If the foreign currency assets and foreign currency liabilities are part of the same currency, it will have a natural hedging effect, and the remaining parts may have the risk of value changes due to the exchange rate changes. KGI Life primarily uses foreign exchange and foreign exchange derivatives to avoid exchange rate risks, and controls it in accordance with relevant laws and requirements for internal control.

3) Interest rate risk

Interest rate risk refers to the risk resulting from changes in market interest rates which causes fluctuations in the fair value of financial instruments. KGI Life Insurance manages interest rate risk by combinations of fixed and floating interest rate products. Because they do not meet the requirements for hedge accounting, hedge accounting is not adopted.

4) Equity price risk

KGI Life Insurance holds equity securities of listed and unlisted companies, and OTC-traded and non-OTC traded companies. The price of such equity securities will be affected by uncertainties about the future value of the underlying investment. KGI Life Insurance diversified its investment and set investment limits for a single equity security to manage price risk of equity securities. Portfolio information of equity securities is required to be regularly reported to senior executives of KGI Life Insurance. The Board of Directors should authorize the senior executives to review and approve the equity securities of all investment decisions.

5) Value at risk

Value-at-risk is the maximum loss on the portfolio with a given probability defined as the confidence level, over a given period of time. KGI Life Insurance uses 99% VaR to measure the market risk over the next ten days.

VaR model must be able to reasonably and appropriately measure the maximum potential risk of financial instruments and investment portfolio. VaR model used to manage risk must perform model validation and backtesting to show that the model can reasonably and effectively measure the maximum potential risks of the financial instruments or investment portfolio.

6) Stress testing

KGI Life Insurance measures and evaluates potential risks of the occurrence of extreme and abnormal events regularly in addition to Value at Risk models. Stress testing measures the potential impact on the value of the investment portfolio when extreme fluctuations of financial variables occur.

KGI Life Insurance performs stress testing regularly by using "Simple Sensitivity" and "Scenario Analysis" methods. The test is capable of representing the position loss resulted from the movement of a specific risk factor under different kinds of historical scenarios:

a) Simple sensitivity

Simple Sensitivity measures the dollar amount change for the portfolio value from the movement of specific risk factors.

b) Scenario analysis

Scenario Analysis measures the dollar amount changes for the total value of investment positions if stress scenarios occur. The types of scenario include:

i. Historical scenario:

Adding fluctuating risk factors to a specific historical event, KGI Life Insurance simulates what the dollar amount of losses for the current investment portfolio would be in the same period of time.

ii. Hypothetical scenario:

KGI Life Insurance makes hypothesis with rational expectations from the extreme market movements to assess the dollar amount of losses for the investment position by taking into consideration the movement of relevant risk factors.

Risk management department performs the stress testing with historical and hypothetical scenarios regularly. KGI Life Insurance's risk analysis, early warning, and business management are in accordance with the stress testing report.

Summary of Factor Sensitivity Analysis December 31, 2023

| Risk Factors | Changes (+/-) | Changes in Income | Changes in Equity |
|----------------------------------|--------------------------|----------------------|----------------------|

e. Transfers of financial assets

KGI Bank and subsidiaries

Transferred financial assets not qualifying for full derecognition

Among daily operations of KGI Bank, most of the transactions of transferred financial assets not qualifying for full derecognition are debt securities under repurchase agreements. As KGI Bank's right to receive cash flows of the financial assets transferred to the counterparties and reflecting the obligation to repurchase the transferred financial assets for a fixed price at a future date, the transferred financial assets cannot be used, sold or pledged in the duration of the transaction. KGI Bank does not derecognize it entirely because KGI Bank remains exposed to interest rate risk and credit risk on these pledged instruments.

Related information of financial assets and liabilities not qualifying for full derecognition was listed below:

KGI Securities and subsidiaries

1) Transferred financial assets not qualifying for full derecognition

Among daily operations of KGI Securities and subsidiaries, most of the transactions of transferred financial assets not qualifying for full derecognition are debt securities held by counterparties as collateral under repurchase agreements or equity securities lent under securities lending agreements. As the substance of these transactions is secured borrowing, securities that has transferred to counterparties during the transaction causes KGI Securities and subsidiaries' right to receive cash flows of the financial assets transferred to the counterparties; KGI Securities and subsidiaries only recognized related liabilities reflecting the obligation to repurchase the transferred financial assets at a fixed price in the future, and the transferred financial assets cannot be used, sold or pledged in the duration of the transaction. KGI Securities and subsidiaries do not derecognize it entirely because KGI Securities and subsidiaries remain exposed to interest rate risk, credit risk and market risk on these pledged instruments.

Related information of financial assets and liabilities not qualifying for full derecognition was listed below:

| December 31, 2023 | | | | | | | | |

2) Transferred financial assets qualifying for full derecognition

KGI Securities uses convertible bonds acquired by an underwriter or dealer as the trading object of the asset swap transaction, then KGI Securities receives consideration by selling it, and exchange interests arise from convertible bonds for compensation interests according to the contracts, and has the right to redeem the bonds at any time before the maturity date. KGI Securities does not retain the control over the transferred assets and derecognizes them since counterparties have the ability to sell financial assets to third party and no restrictions will be made to counterparties. KGI Securities still retain the call option of the object, and the maximum exposure of the loss is the book value of the pledged instruments.

Related information of transferred financial assets and liabilities qualifying for full derecognition are as follows:

| Period | Types of Continuing Involvement | Outflows of Repurchased Transferred (Derecognized) | Book Value of Continuing Involvement in the Balance Sheet | Fair V Continuing | Maximum of Loss Exposure | |
|-------------------|---------------------------------------|---|---|----------------------|-----------------------------|--------------|
| | | Financial Assets | Financial Assets at FVTPL | Assets | Liabilities | |

KGI Life Insurance

KGI Life Insurance holds financial instruments in accordance with paragraph 42 of IAS 32 recognized by the FSC and the related assets and liabilities are offset on the balance sheet.

KGI Life Insurance may perform transactions not meeting the requirements of offsetting, but has enforceable master netting arrangement or other similar agreements with the counterparties. When both parties agree to settle in net amount, financial assets and financial liabilities could be offset and settled in net amount, and if not, in total amount. However, if any party in the transaction defaults, the other party can choose net settlement.

Related information about above offsetting financial assets and financial liabilities are as follows:

53. CAPITAL MANAGEMENT

a. Capital management objective

The basic management objective includes eligible capital to meet the requirements of the regulation and achieve the minimum capital adequacy ratio so as to control all risks within the risk appetite. In order to undertake all kinds of risk, the Group conducts risk management based on the risk portfolio and the assessment of risk characteristics to design the best capital allocation.

b. Capital management procedures

The Group had met the authorities' minimum requirements for capital adequacy ratio and reported to the authority quarterly. Eligible capital and legal capital were calculated according to the "Regulations Governing the Capital Adequacy of Financial Holding Companies".

c. Group's capital adequacy ratio (CAR)

The Corporation has become a full-functioning financial platform for its customers by improving the overall business performance of the Corporation through integrating the insurance, investment, trust custody and channel of banking, securities and life insurance.

c. Cross utilization of information or locations and business utilities

In compliance with Article 43 of "Financial Holding Companies Act", "Financial Holding Subsidiaries Cross-selling Activities Acts", "Self-disciplinary Standards" and other related regulations from FSC, the Corporation has advocated cross-selling activities among China development Financial Holdings and its Subsidiaries. In addition, the Corporation and its subsidiaries, which joined the cross selling business disclosure protection measures of customer information on official website to limit the use of the data, secure the customer information and related rights when handling cross-selling activities.

d. Allocation of revenues, costs, expenses, profits and losses

Revenue, costs, expenses, profits or losses arising from integrated business activities among subsidiaries are allocated to each subsidiary based on the related business features or other reasonable allocation methods.

58. CONTINGENCIES AND COMMITMENTS, DISASTER DAMAGES AND SUBSEQUENT EVENTS OF SUBSIDIARIES

Please refer to Note 48 to the consolidated financial statements. Information on disaster damages: None.

59. SUBSIDIARIES' ASSET QUALITY, MANAGEMENT, PROFITABILITY, LIQUIDITY AND SENSITIVITY TO MARKET RISK

Please refer to Notes 49 and 52 to the consolidated financial statements.

60. SPECIFIC RISK FROM FUTURES DEALING

The futures dealer needs to maintain adequate liquidity in case of its clients fail to fulfill the contracts in the futures transactions with the features of low financial leverage nature and unpredictable market fluctuation. If the dealing business fails to maintain the amount of margin, the open contracts may be closed. Thus, the margin may be lost entirely and may require further payment of deficiency.

64. SEGMENT INFORMATION

The reportable segments of the Corporation are Commercial banking, Securities, Venture Capital and Insurance. Under the Banking Act of the Republic of China and relevant regulations, Commercial banking engaged in consumer banking, corporate banking and global market and financial institution. Under the Securities and Exchange Act and relevant regulations, Securities engaged in wealth management business, trading business and investment banking business. Venture Capital engaged in investment business directly. Insurance department operates life insurance business based on the provisions of the insurance law.

The accounting policies of the operating segments are the same as the Corporation's accounting policies described in Note 4. The Corporation uses income after tax as the measurement for segment profit and the basis of performance assessment. The net profit and income before income tax are composed of revenues and expenses directly attributable to an operating segment.

Note 1: The consolidated entities are identified in the No. column as follows: Parent company - 0; subsidiaries - numbered from 1 by company.

Note 2: Transaction flows are as follows: (1) from parent to subsidiary; (2) from subsidiary to parent; and (3) between subsidiaries.

Note 3: The ratio is calculated as follows: For asset and liability accounts - Transaction amount in the ending period/Total consolidated assets; for income and expense accounts - Transaction amount in the midterm/Total consolidated net profit.

Note 4: The transaction criteria for related parties are similar to those for third parties.

Note 5: Transactions each amounted to at least NT\$100 million.

(Concluded)

(Continued)

e. In order to implement corporate governance and enhance the functions of the Company's Board of Directors and establish performance targets (KPIs) to enhance the efficiency of the Board's operations, the Board of Directors of the Company has passed the stipulation of the "Board Performance Evaluation Criteria", which requires that the Board of Directors of the Company shall perform an internal performance evaluation of the Board of Directors at least once a year, which will include the evaluation of the performance of the Board as a whole, individual Board members and functional committees, and that the external performance evaluation or external expert scholar at least once every three years to enhance the independence and efficiency of the Boards' performance evaluation. The Remuneration Committee and the board formulated the "Guidelines for Remunerations Payment to Directors and to Functional Committee Members The Company's directors' remuneration is taking into account each director's degree of participation in and contribution to the operation of the Company, the nature of his or her duties, future risks and other factors, as well as the results of a comprehensive assessment of the directors' individual performance.

The performance of the company's managers is not only related to financial indicators, but also related to some important indicators, such as the sustainable management, talent cultivation project, and etc.

The performance indicators of managers include the following:

- Financial indicators: Including business performance and cost control.
- Management indicators: Including statute compliance, information security, leadership management, and etc.
- Special indicators: Special contributions or influential events would be taken into consideration while evaluating performance and remuneration.

A manager's remuneration is determined by the individual's job function and work experience, with due consideration of the Company's financial performance, wage growth across the job market, price fluctuations, prospective risks, and other internal/external factors. Ultimately, it is the Company's goal to present remuneration packages relevant with job performance and competitive to talent recruiting.
